QUARTERLY RETURN

OF THE

MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE

PROVINCES, COUNTIES, POOR LAW UNIONS, OR SUPERINTENDENT REGISTRARS'
DISTRICTS, AND REGISTRARS' DISTRICTS IN IRELAND,

WITH

*Certain Detailed Information Relative to the Deaths in each Registrar's District ;
Persons Vaccinated, &c., &c., &c.**By Authority of the Registrar-General.*

DUBLIN: PUBLISHED BY HIS MAJESTY'S STATIONERY OFFICE.

To be purchased either directly or through any Bookseller, from

WYMAN & SONS, LIMITED, FETTER LANE, E.C.; or

OLIVER & BOYD, TWEEDDALE COURT, EDINBURGH; or

E. PONSONBY, LTD., 116, GRAFTON STREET, DUBLIN.

PRINTED BY ALEXANDER THOM & CO., LIMITED, ABBEY STREET.

Price One Shilling.

Marriages:—OCT., NOV., DEC., 1910.

Births and Deaths:—JAN., FEB., MAR., 1911.

During the quarter ended 31st March last, there were registered in the 827 Registrars' Districts in Ireland 25,799 births—a number equal to an annual birth-rate of 23.6 in every 1,000 of the estimated population*—and 20,820 deaths, representing an annual rate of 19.1 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 4,109 persons emigrated.

In England and Wales last quarter, the birth-rate represented was 24.4 in every 1,000 of the estimated population, and the death-rate 15.7 per 1,000.

The birth-rate in Ireland for the quarter is 0.1 below the average rate for the corresponding quarter of the ten years 1901–1910, but 0.1 above the rate for the first quarter of 1910. The deaths are 463 below those registered in the corresponding quarter of 1910; the death-rate is 0.4 below the rate for that quarter, and 1.4 below the average for the fourth quarter of the ten years 1901–1910.

Compared with those for the corresponding quarter of 1910, the returns of pauperism furnished by the Local Government Board show a decrease of 3,836 in the average number of Workhouse inmates on Saturdays during the quarter, and a decrease of 16,083 in the average number of persons on out-door relief.

Compared with the averages for the first quarter of the ten years 1901–1910, the number of Workhouse inmates shows a decrease of 5,241, and the number of persons on out-door relief shows a decrease of 18,521, the total under both heads being 22.7 per cent. under the average for the first quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 0.7 per cent.

The annual marriage-rate (4.8 per 1,000 of the population) represented by the marriages registered during the fourth quarter of 1910 is 0.1 above the average rate for the corresponding quarter of the preceding ten years.

* See page 64.

TABLE I.—Showing for each PROVINCE and COUNTY in Ireland, the Annual Rate per 1,000 of the population,* represented by the number of MARRIAGES registered during the Quarter ended 31st December, 1910, and by the BIRTHS and DEATHS registered in the Quarter ended 31st March, 1911.

* The rates for the total of Ireland and for the county boroughs of Dublin and Belfast and Londonderry county and county borough are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1901. See note (*) page 19.

MARRIAGES.

The Marriages (5,198) registered in Ireland during the fourth quarter of 1910 are equivalent to an annual rate of 4.8 per 1,000 of the estimated population, being 0.1 above the rate for the corresponding quarter of 1909, and also 0.1 above the average rate for the fourth quarter of the ten years 1900–1909. Of the total number of marriages, 3,396 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,802 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 4.2 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6.4 per 1,000 of the members of all other religious persuasions. The rate under each heading is equal to the average rate for the corresponding quarter of the previous ten years.

Of the 22,120 marriages registered last year, 5,999 were registered in the first quarter, 5,459 in the second, 5,464 in the third, and 5,198 in the fourth.

TABLE II.—Showing by QUARTERLY PERIODS the MARRIAGES registered in Ireland in each of the eleven years 1900–1910, and the average number for the ten years 1900–1909.

BIRTHS.

The number of births registered during the quarter ended 31st March last was 25,799—13,377 boys and 12,422 girls—being equal to an annual ratio of 1 in every 42.3, or 23.6 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years, 1901–10, was 26,026, equivalent to an annual rate of 23.7 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 23.8 per 1,000 of the population according to the Census of 1901; Munster, 22.2; Ulster, 23.6; and Connaught, 22.4.

The highest county or county borough birth-rate* is 32.3 for Dublin county borough, and the lowest 17.5 for Cavan county. Of the intermediate rates the highest five are—Belfast county borough, 28.5; Mayo, 26.8; Kildare, 25.2; Kerry, 24.4; and Limerick county and county borough, 23.5. The lowest five are—Wicklow, 17.6; Leitrim, 18.2; Dublin county, 18.6; Longford, 18.8; and King's County, 18.9.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 31st March last was 20,820—10,398 males and 10,422 females—affording an annual ratio of 1 in every 52.4, or 19.1 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years, 1901–10, was 20.5 per 1,000.

The death-rate in Leinster was 21.3 per 1,000 of the population according to the Census of 1901; in Munster, 17.1; in Ulster, 19.0; and in Connaught, 15.9.

The county or county borough death-rates* range from 13.9 in Kerry to 26.6 in Dublin county borough. Between these rates the lowest five are—Leitrim, 14.5; Roscommon, 15.5; Mayo, 15.5; Galway, 15.9; and Tipperary, N.R., 16.4; and the highest five are—Longford, 23.1; Armagh, 21.7; Tyrone, 21.1; Meath, 19.9; and Carlow, 19.3.

* See note (*) on page 2.

TABLE III.—Showing by QUARTERLY PERIODS the number of BIRTHS and DEATHS registered in Ireland in each of the ten years 1901–1910, and the average number for that period ; also the number registered during the first quarter of the year 1911 :—

AGES.—Of the 20,820 deaths registered last quarter, 2,471, or 11.9 per cent., were of infants under one year of age ; and 9,045, or 43.4 per cent., were of persons aged 65 years and upwards. The deaths of infants under one year old are equal to 95.8 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under one year old equalled 13.4 per cent. of the total deaths registered therein ; in Munster, 11.8 per cent. ; in Ulster, 11.9 per cent. ; and in Connaught, 8.3 per cent. The deaths of persons 65 years old and upwards registered during the quarter in Leinster are equal to 37.8 per cent. ; in Munster, to 45.4 per cent. ; in Ulster, to 42.3 per cent. ; and in Connaught, to 56.6 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

DISEASES.—The total number of deaths from the principal epidemic diseases* is 892, and is equivalent to an annual rate of 0.82 per 1,000 living.

The following tabular statement shows the mortality from some of the principal epidemic diseases, as registered during the March quarter of 1911, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years, 1906–1910.

Name of Disease.	Number of Deaths in March quarter, 1911.	Average number of Deaths in March quarter of the 5 years, 1906–1910.
Enteric Fever,	86	86
Typhus,	14	18
Small pox,	—	—
Measles,	137	145
Scarlet Fever,	78	31
Whooping-cough,	238	287
Diphtheria,	100	92

* See note (†) on page 9.

Health of the People.

ENTERIC FEVER.—There were 86 deaths from enteric fever; this figure is equal to the average for the 5 years 1906–1910, and represents an annual mortality rate of 0.08 per 1,000 of the population of Ireland, estimated to the middle of the year 1911. In each of the three preceding quarterly periods deaths from enteric fever were 61, 60, and 85. Of the 86 deaths, 20 belonged to Dublin county borough.

TYPHUS.—The deaths from typhus, 14 in number, are 4 below the average; in the three preceding quarters such deaths were 24, 11, and 21, respectively. The deaths occurred in the following Unions:—Four in Oughterard; 3 in Kilrush; 2 in Castlebar; and one in each of Ballymena, Belfast, Ennistimon, Galway, and Rathdrum.

The Registrar of Craggacknock district, in Kilrush Union, writes as follows:—"In one townland there were 18 cases of typhus fever; all removed to hospital, except two."

SMALL-POX.—The returns showed that there was no mortality or incidence of small-pox recorded in Ireland during the period under notice.

MEASLES.—The mortality rate represented by the deaths from measles, 137 in number, was 0.13 per 1,000. The average for the corresponding quarter of the past five years is 145, and the deaths occurring in the three preceding quarters—406, 189, and 120, respectively. Of the total deaths, 47 belonged to Dublin county borough; 20 to Tyrone county; and 10 to Londonderry county and county borough; deaths from measles occurred in certain Registrars' districts as follows:—In the Superintendent Registrar's district of Drogheda, 7 deaths; in Lurgan No. 1 Registrar's district, 6 deaths; in each of Dungannon and Clarendon, 5 deaths, and in each of Banbridge and Coal Island, 4 deaths.

SCARLET FEVER.—During the period there were 78 deaths from scarlet fever registered in the whole of Ireland. Of this total 23 belonged to Dublin county borough; 4 occurred in Belfast county borough; and 3 in each of the Superintendent Registrar's districts of Clarendon, Larne, Lisburn, and Tipperary. Deaths from scarlet fever were in excess of the average (31) for the preceding five years, and the mortality rose from 29 deaths in the June quarter of 1910 to 38 in the September quarter, to 64 in the December quarter, and again to 78 in the period under notice.

WHOOPIING-COUGH.—The number of deaths from whooping-cough, 238, is below the average (287), for the corresponding period in the five years preceding. The deaths represent an annual rate of 0.22 per 1,000 of the estimated population of Ireland. Deaths from whooping-cough in the three preceding quarterly periods numbered 366, 199, and 190, respectively. Of the total deaths, 69 belonged to Dublin county borough; 31 to Londonderry county and county borough; and 29 to Cork county and county borough.

DIPHTHERIA.—The mortality figures for diphtheria show that the deaths are a little over the average, the former being 100, and the latter 92. The 100 deaths are equal to an annual rate of 0.09 per 1,000 of the estimated population of Ireland. Deaths from diphtheria, which in each of the June and September quarters of 1910 numbered 73, rose to 88 in the December quarter of the year, and again rose to 100 in the period under notice. Of the deaths 23 appertained to Dublin county borough, and 9 to the Registrar's District of Dundalk.

DIARRHOEAL DISEASES.—The total, 239, includes 4 deaths from dysentery, 58 deaths from diarrhoea of persons aged 2 years and upwards, and 177 deaths of children under 2 years of age from diarrhoea and *enteritis*. Of the latter, 50 belonged to Dublin county borough, and 22 to Belfast county borough.

TUBERCULOUS DISEASE.—According to the numerical returns furnished by the Registrars, there were 2,495 deaths from all forms of tuberculous disease registered during the March quarter of the year; this figure represents an annual mortality rate from the disease of 2.29 per 1,000 of the population of Ireland estimated to the middle of the year,

In the notes which follow, which have been kindly furnished by the Registrars of these respective districts, special information regarding the status of tuberculous disease, as well as observations on the sanitation of the country are included.

Waterford ; Woodstown.—“ Three cases of pulmonary tuberculosis were imported from outside the district during the past quarter, but no new cases have occurred in the district for the past two years. This I attribute to the healthy dwellinghouses that have been provided for the working classes, the thorough system of domestic scavenging practised in the villages of the district, the careful disinfecting of premises, and to the educational campaign that has been carried on throughout the country.”

Waterford ; Waterford Urban, No. 1.—“ There is a marked diminution in the proportion of deaths due to tubercle.”

Waterford ; Ullid.—“ It is notable that for the first time for fifteen years we have no death from tuberculosis or any infectious disease.”

Cavan ; Killashandra.—“ The branch of the Women's Health Association and Girls' Guild of same Society are doing valuable work in the district. They have got people to keep their windows open where I failed repeatedly.”

Oldcastle ; Ballyjamesduff.—“ A general improvement in the better living of all classes together with a better consideration for good sanitary surroundings.”

Milford ; Rosguill.—“ There appears to be a good prospect of improvement being affected in the sanitation of dwelling houses during the coming years, as there are no less than 140 applications for grants under the Congested District Board's new scheme for improvement of dwellings.”

Banbridge ; Loughbrickland.—“ There is very little tuberculosis in the district at present, seemingly getting less every year.”

Larne ; Waterfoot.—“ Only one case of tuberculous disease in the entire district.”

Castlereagh ; Loughglinn.—“ There is a marked improvement in the houses of the people as regards sanitation and ventilation.”

Kenmare ; Tuosist.—“ The remaining three cases of pulmonary tuberculosis *contracted in America*. The danger of allowing the return to their families of those poor victims of the scourge is obvious.”

Listowel ; Ballylongford.—“ Two deaths from Consumption proper. What is very remarkable in one case, the family of sisters and brothers, nine in all, died from same disease, ranging from 18 to 28 years of age.”

Youghal ; Clashmore.—“ There has been much bronchitis and broncho-pneumonia during last two months of quarter amongst children.—I would wish to call attention to the custom here of swathing children's chests in flannel ; it hinders respiration and prevents proper chest development and so may act as a predisposing factor in tuberculous phthisis. The use of light, elastic and warm underclothing for infants is very desirable, but in country districts the popular opinion is that weight is necessary for warmth.”

Lisnaskea ; Derrylin.—“ Consumption or tubercle in some of its forms is always with us, and is likely to stay.”

Stranorlar ; Killygordon.—“ There has been a larger ratio of deaths than usual from different forms of tuberculosis.”

Banbridge ; Ballyward.—“ The precautions taken against the spread of tuberculosis are scanty. Most of the poorer classes are ignorant of the danger of infection.”

Coleraine ; Aghadowey.—“ Mortality from tuberculous disease (7) particularly high.”

CANCER.—Under the head of cancer, 874 deaths were returned as registered during the quarter ; this number corresponds to an annual death-rate of 0.80 per 1,000. The rates in each of the three preceding quarters are 0.74, 0.73, and 0.83, respectively.

VIOLENCE.—The deaths from accidental violence, homicide, and suicide numbered 281.

The Registrars, in their Notes, report the presence of the following diseases:—Measles in 37 districts, scarlet fever in 47, whooping-cough in 46, diphtheria in 29, fever in 21—typhus in 7, and enteric in 14, influenza in 49, mumps in 8, and chicken-pox in 2 districts. [See Appendix to this Report commencing on page 65.]

INQUESTS.—There were 468 inquests reported to the Registrars during the quarter; this number being equal to 1 in every 45 of the total deaths registered.

In Leinster there was 1 inquest to every 50 deaths registered, in Munster 1 to 43, in Ulster 1 to 36, and in Connaught 1 to 83.

DEATHS IN PUBLIC INSTITUTIONS.—Of the 20,820 deaths registered, 4,276, or 20.5 per cent., occurred in public institutions. In Leinster the percentage was 27.5, in Munster 24.0, in Ulster 14.6, and in Connaught 15.1.

UNCERTIFIED DEATHS.—According to the returns, 5,196 of the 20,820 deaths which were registered during the quarter were uncertified, being nearly 25 per cent. of the total. In Leinster the percentage was 18, in Munster 27, in Ulster 21, and in Connaught the uncertified deaths were 50 per cent. of the total deaths registered in the province.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 31st March, 1911, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population:—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.									Percentage of Total Deaths.	Number in every 100,000 of the Population
		Enteric Fever.	Typhus.	Small-pox.	Measles.	Scarlet Fever.	Whooping-cough.	Diphtheria.	Diarrhœal Diseases.	Total.

VACCINATION.

According to the Returns of Primary Vaccinations received for the first quarter of the year 1911, there were 16,303 persons successfully vaccinated.

EMIGRATION.

The Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, show that the number of emigrants who left Ireland during the quarter ended 31st March last was 4,109 (2,615 males and 1,494 females), being 240 more than in the corresponding quarter of the year 1910, but 211 below the average number for the first quarter of the ten years 1901–1910.

TABLE VI.—EMIGRATION from IRELAND during the months of January, February, and March in 1910 and 1911:—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1910.	1911.	In-crease.	De-crease.	1910.	1911.	In-crease.	De-crease.	1910.	1911.	In-crease.	De-crease.
January,	376	414	38	—	239	230	—	9	615	644	29	—
February,	565	509	—	56	331	338	7	—	896	847	—	49
March,	1,530	1,692	162	—	828	926	98	—	2,358	2,618	260	—
TOTAL,	2,471	2,615	144	—	1,398	1,494	96	—	3,869	4,109*	240	—

* Including 2,460 emigrants to the United States of America, viz.:—351 in the month of January, 540 in February, and 1,569 in March. Of 2,097 steerage passengers, 536 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was 6*d.*, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the first quarter of the year 1910 the average price was 6½*d.*, and in the corresponding quarter of 1901 it was 5½*d.*

The average price of oatmeal (1st quality) in Dublin for the quarter was 13*s.* 6*d.* per cwt. For the corresponding quarter of the year 1910 the average price was 14*s.* 6*d.*, and for the first quarter of 1910 the average price was 13*s.* 6*d.* per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 3*s.* 3*d.* to 4*s.* In the first quarter of 1910 the average prices were 3*s.* to 3*s.* 3*d.*, and the prices for the corresponding quarter of 1901 were 3*s.* 7*d.* to 4*s.* 5*d.*

The average prices of beef at the Dublin Cattle Market during the quarter were from 53*s.* to 59*s.* per cwt. In the corresponding quarter of 1910 the average prices were from 51*s.* 6*d.* to 57*s.* 6*d.*, and in the first quarter of 1901 they were from 51*s.* 6*d.* to 56*s.*

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter was 22*s.* per ton nett.

The highest price of Consols at the Dublin Stock Exchange for the quarter was 81½ and the lowest 79¼.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland was reduced on the 26th January from 5 per cent., at which it had stood from the beginning of the quarter, to 4½ per cent., and again to 4 per cent. on the 16th February, at which it remained at the close of the quarter.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the first quarter of 1911 was 40,984, or 3,836 below the average for the corresponding period of 1910.

The average weekly number of persons receiving out-door relief during the quarter was 40,185 being 16,083 below the average for the first quarter of 1910.

Of the persons receiving in-door relief during the first quarter of 1911, an average number of 1,632 in each week was located in asylums for the blind and the deaf and dumb, and in extern hospitals ; in the corresponding quarter of 1910 the average weekly number was 1,631.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the FIRST QUARTER of the year 1911, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week ; also the AVERAGE PRICES OF PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

PERIOD.	Average PRICES OF PROVISIONS.								PAUPERISM.			
									NO. OF PERSONS RELIEVED.			
	BREAD (4lb. Loaf.)		OATMEAL (Corn Exchange), per Cwt. 1st quality.	POTATOES (at Potato Market) per Cwt.		BEEF (at the Dublin Cattle Market), per Cwt.		In-door.	Ordinary relief.	Out-door.

(a) Messrs. Bolands, Limited.

(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4-lb. loaf *delivered* ; the price in Messrs Johnston, Mooney, and O'Brien's shops, exclusive of delivery was ½d. per 4-lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the "Dublin Gazette" ; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the first

* Latitude 53° 21' 48-25" north ; longitude 6° 20' 59-15" west. Height above the sea 155-3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

quarter of the years 1906 to 1911, respectively, furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 14).

The mean height of the barometer during the first quarter of 1911 was 29.942 inches, being 0.095 above the average for the corresponding quarter of the five years 1906-1910; the highest reading (30.617 inches) was on the 1st February at 9 P.M., air calm, and the lowest (28.873 inches) on the 23rd February, at 9 A.M., wind S.W.

The mean temperature of the air during the quarter was 40.9° , being 0.4° below the average for the first quarter of the 5 years 1906-1910.

The maximum temperature of the air during the quarter was 58.8° and the minimum 18.5° . The maximum heat in sun was 85.5° .

Rain or snow fell on 47 days during the quarter. The rain-fall measured 3.927 inches, being 1.733 inches below the average for the first quarter of the five years 1906-1910. The greatest monthly rainfall was in March, when 1.678 inches were registered.

The wind blew on 22 days from W., on 18 days from S.W., on 9 days from E., on 6 days from S., on 5 days from N.E., on 4 days from S.E., on 3 days from N.W., on 3 days from N., and the air was calm on 20 days at 9 A.M.

January.—The mean height of the barometer during this month was 30.117 inches; the highest reading (30.569 inches) was on the 18th at 9 A.M., wind S.W.; and the lowest (29.397 inches) on the 6th, at 9 A.M., wind W. The mean temperature of the air was 39.9° the maximum registered was 54.8° , and the minimum 24.7° . The 25th was the warmest day, and the 13th the coldest night. The mean of the dry bulb was 39.5° , and of the wet bulb, 38.4° . The maximum heat in sun was 75.0° , and the minimum on the grass 20.2° . The total amount of sunshine recorded was 63.6 hours, the greatest daily amount being 7.8 hours on the 31st. The minimum on the grass was below 32° on 14 nights. The maximum ozone was 0.7, the minimum 0.0, and the mean 0.4. Rain or snow fell on 12 days. The rain-fall measured 0.868 inches; the greatest amount in 24 hours was 0.290 inch on the 5th.

February.—The mean height of the barometer during this month was 29.914 inches; the highest reading (30.617 inches) was on the 1st at 9 P.M., air calm, and the lowest (28.873 inches) on the 23rd, at 9 A.M., wind S.W. The mean temperature of the air was 41.3° , the maximum registered was 58.8° , and the minimum 18.5° . The 14th was the warmest day, and the 1st the coldest night. The mean of the dry bulb was 41.0° , and of the wet bulb 39.8° . The maximum heat in sun was 84.5° , and the minimum on the grass 14.6° . The total amount of sunshine recorded was 80.5 hours, the greatest daily amount being 9.0 hours on the 19th. The minimum on the grass was below 32° on 8 nights. The maximum ozone was 0.7, the minimum 0.0, and the mean 0.5. Rain or snow fell on 16 days. The rain-fall measured 1.381 inches; the greatest amount in 24 hours was 0.270 inch on the 18th.

March.—The mean height of the barometer during this month was 29.795 inches, the highest reading (30.231 inches) was on the 25th at 9 P.M., wind N.E., and the lowest (29.467 inches) on the 12th, at 9 P.M., wind N.N.W. The mean temperature of the air was 41.6° the maximum registered was 56.6° , and the minimum 23.9° . The 2nd was the warmest day, and the 17th the coldest night. The mean of the dry bulb was 40.9° , and of the wet bulb 39.5° . The maximum heat in sun was 85.5° , and the minimum on the grass 20.0° . The total amount of sunshine recorded was 109.3 hours, the greatest daily amount being 10.0 hours on the 27th. The minimum on the grass was below 32° on 14 nights. The maximum ozone was 0.8, the minimum 0.0, and the mean 0.5. Rain or snow fell on 19 days. The rain-fall measured 1.678 inches; the greatest amount in 24 hours was 0.270 inch on the 3rd.

TABLE OF METEOROLOGICAL DATA FOR IRELAND.

Prepared in the Meteorological Office under the direction of W. N. Shaw, Esq., LL.D., Sc.D., F.R.S.

In compiling the following Table (pp. 16 and 17), the stations have been grouped into two Districts, namely, 1. Ireland, North; 2. Ireland, South, the former being represented by six stations and the latter by seven.

The stations selected, with the names of the Observers, are as follows:—

LIST OF STATIONS AND OBSERVERS.

STATION.	OBSERVER.
IRELAND NORTH:—	
Malin Head,	Meteorological Office.
Blacksod Point	Do.
Markree Castle,	J. R. Armstrong, for Captain Cooper.
Donaghadee,	Meteorological Office.
Armagh, The Observatory, ..	J. L. E. Dreyer, PH.D.
Belfast, Queen's College, ..	John Wylie, B.A.
IRELAND, SOUTH:—	
Dublin (City),	Sir John W. Moore, M.D.
Waterford,	J. N. White, Esq.
Birr Castle,	O. Boeddicker, PH.D., for the Earl of Rosse.
Killarney,	E. W. Griffin, M.D.
Valencia,	Meteorological Office.
Roche's Point,	Do.
Limerick, Mungret College, ..	Rev. W. O'Leary, S.J.

NOTES ON THE STATISTICAL TABLES.

Hours of Observation.—The hours of observation are indicated by the type in which the names of the stations are printed. CAPITALS, normal climatological stations, 9 a.m. and 9 p.m.; *ITALIC CAPITALS*, telegraphic reporting normal climatological stations, 7 a.m., 1 p.m., 9 p.m.; Roman, telegraphic reporting stations, 7 a.m., 1 p.m., 6 p.m.; *Italics*, auxiliary climatological stations, 9 a.m. only. At Valencia (and at Limerick during February and March) an additional observation was taken at 3 p.m. The after noon observations are used in preparing the wind summaries and in computing the number of days of "overcast" or "clear sky." At telegraphic reporting stations (italic capitals or Roman type) the results given under "hygrometer" and "cloud" are based on the morning observations only.

Barometer.—The correction for latitude has not been applied. The values are for station level. They are the means of readings at 9 a.m. and 9 p.m.; or 7 a.m., 1 p.m., 9 p.m.; or 7 a.m., and 6 p.m., as the case may be.

Hygrometer.—At certain stations the vapour pressure and relative humidity are the results obtained from the daily values. These are entered in italic type. At other stations the calculations are made from the monthly means of the dry and wet bulb readings.

Rainfall.—The amounts are for the 24 hours commencing at the time of morning observation.

Weather Phenomena.—The number of days of rain, Snow, Hail, Thunderstorm, Fog, and Gale, are counted irrespective of the hours at which the phenomena occur. Except in the case of rainfall (see above) the day is the civil day. A day is reckoned as a day of "clear sky," if the average of the estimates of the "amount of cloud" at the hours of observation is less than 2, and as an "overcast" day if the average is greater than 8.

Wind Summaries.—The results given under wind direction, and the number of observations of calms and of fresh or strong wind, are based on the observations at fixed hours. At Valencia and Armagh the wind observations are based on the records of a standard Robinson anemometer (factor 2.2). Velocities of between 13 and 38 miles in the hour have been entered as "fresh or strong winds," velocities of 39 miles in the hour, or above, as gales.

Averages.—The averages used for stations are—Temperature and Rainfall for the 35 years 1871–1905; Bright Sunshine for the 25 years 1881–1905.

District Values.—The district values of temperature, rainfall, and sunshine are computed from the data for the stations included in the Weekly Weather Report of the Meteorological Office. Only a selection of these stations is included in this Report. The average values with which the current district values are compared are for the 25 years, 1881–1905. The district values for "amount of cloud" and for the extremes of temperature and the largest rainfall in a day, are taken from the Monthly Weather Report of the Meteorological Office.

TABLE IX.—Meteorological Table.

STATIONS.	Height of Barometer Station above M.S.L.	Barometer. Mean Pressure at 32° F. at Level and Latitude of Station.	Air Temperature.								Hygrometer.				Earth Temperature.		Bright Sunshine.		
			Mean of		Mean of A and B.	Difference from Normal.	Absolute Maximum and Minimum.				Mean of Observations at 9 a.m. and 9 p.m., or at 7 a.m.				At 1 foot depth.	At 4 feet depth.	Total Observed.	Difference from Normal.	Per cent. of Possible.
			A Maximum.	B Minimum.			Maximum.	Day of Month.	Minimum.	Day of Month.	Dry Bulb.	Depression of Wet Bulb.	Vapour Pressure.	Humidity.

* Throughout this Return the Unions and Districts have been grouped according to the Administrative Counties as formed under the Local Government (Ireland) Act, 1898.

† Formerly described as "Simple Continued Fever."

‡ Including accidental deaths, homicides, and suicides.

§ The Returns for Killungan District, in Mullingar Union, and for Clara District, in Limerick Union, not having been received in time for press, the numbers of Births and Deaths registered in the corresponding Quarter of 1910, have been adopted.

ABSTRACT II.—SUPERINTENDENT REGISTRARS' DISTRICTS OR POOR LAW UNIONS, ARRANGED BY PROVINCES AND COUNTIES.*

COUNTIES AND SUPERINTENDENT REGISTRARS' DISTRICTS.	Area in Statute Acres.	Popula- tion in 1901.	Mar- riages. Registered in the Quarter ending 31st December, 1910.	Births Registered in the Quarter ending 31st March, 1911.	Deaths.		The Deaths registered during the Quarter are stated by the Registrars to include												Inquest Cases.	Deaths in Public Institutions.	Number of Un- certified Deaths.	Number of successful Vaccinations in the Quarter ending 31st March, 1911.				
					Averages in the Quarters ending 31st March, in the 10 years, 1901-1910.	Registered in the Quarter ending 31st March, 1911.	Deaths of		Deaths from																	
							Infants under 1 year of age	Persons aged 65 years and up- wards.	Enteric Fever.	Typhus.	Small-pox.	Measles.	Scarlet Fever.	Whooping-cough.	Diphtheria.	Dysentery.	Tuberculous Disease.	Cancer.					Diarrhoea.		Enteritis of Chil- dren under 2 years.	Violence.
																							Of Children under 2 years of age.	2 years of age and upwards.

ending from 1st January, 1911

ned to the respective district

† Exclusive of 8 deaths in 1961.

§ Formerly described as "Si

* The Registrars' Districts (827 in number) are Sub-divisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispensary Districts of the same names formed under the Medical Charities Act. The letter W denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.
† The details concerning Births and Deaths in the above table for Districts marked thus (†) on pages 29 and 30 are extracted from the Weekly Returns made by the Registrars, and relate to the 13 weeks extending from 1st January, 1911, to 31st March, 1911. With the exception of 132 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions in these districts have been assigned to the respective districts comprised in the "Dublin Registration Area," from which the deceased were admitted.
‡ Exclusive of 8 deaths in the Rathdown Union Workhouse of persons admitted from Blackrock and Kigdstown, to which Urban Districts they have been assigned.

† Exclusive of 8 deaths in the Rutldown Union Workhouse of persons admitted from Blackrock and Kingstown, to which Urban Districts they have been assigned.

§ Formerly described as "Simple Continued Fever,"

NOTE.—This table has been constructed for the years 1837 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851 ; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872–1911.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872–81, 1882–91, and 1892–1901, to allow for the discrepancy between the number thus arrived at for 1881, 1891, and 1901 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Rathvilly*.—An epidemic of scarlet fever occurred in the district during the quarter. The district is now healthy.

CARLOW; *Bagenalstown*.—During the quarter one death was registered from pulmonary tuberculosis; otherwise the district is healthy.

CARLOW; *Fennagh and Myshall*.—The district was comparatively healthy for this quarter.

CARLOW; *Leighlinbridge*.—Epidemic of influenza, with bronchitis; otherwise health of district good.

Dublin County.

BALROTHERY; *Kilsallaghan*.—The health of the district during the past quarter has been excellent, with the exception of an epidemic of whooping cough, fortunately without any fatal results. Four cases of scarlatina occurred in the same house, source of infection being outside district. The prophylactic measures taken to prevent spread evidently proved effective, as no further cases occurred. One death from carcinoma and one death from pulmonary tuberculosis registered. Vaccination satisfactory.

DUBLIN, SOUTH; *Crumlin*.—The district is very healthy for this time of the year, and we have no infectious diseases in the locality.

RATHDOWN; *Blackrock and Stillorgan, No. 2*.—District healthy during quarter.

Dublin County Borough.

DUBLIN, NORTH; *North City, No. 1; West*.—Very little epidemic disease except measles.

Kildare County.

ATHY; *Monasterevin*.—Sanitary arrangements fairly good.

BALTINGLASS; *Baltinglass, No. 2*.—One case of laryngeal diphtheria during the quarter. Vaccination postponed in consequence of colds amongst the children.

CELBRIDGE; *Celbridge, W*.—This district is very healthy.

CELBRIDGE; *Maynooth*.—District very healthy.

EDENDERRY; *Carbury*.—Vaccination delayed owing to colds amongst children.

NAAS; *Ballymore-Eustace*.—The district has been healthy. Only two deaths registered.

NAAS; *Naas and Carragh, W*.—Vaccinations postponed owing to the severe weather. The sewerage in the urban district is now opened for general connection.

NAAS; *Newbridge*.—Very extensive epidemics of measles and whooping-cough have been prevalent in the Curragh Camp during the quarter.

NAAS; *Robertstown and Kilmeage*.—The sanitary conditions of district are good. Vaccination postponed owing to weather conditions.

Kilkenny County.

CALLAN; *Callan, W*.—No case of cancer. District free from infectious disease.

CALLAN; *Kilmaganny*.—District healthy.

CARRICK-ON-SUIR; *Piltown*.—Health of district good. Sanitary condition good. Seven cases of influenza, accompanied with pneumonia.

CASTLECOMER; *Castlecomer, W*.—The district is free from any epidemic.

KILKENNY; *Tullaroan*.—The district is in a very healthy and sanitary condition.

NEW ROSS; *Dysartmoon*.—District healthy, with exception of slight outbreak of whooping-cough.

THOMASTOWN; *Inistioge*.—There has been an epidemic of whooping-cough in the district during the last quarter, with complications in some of the cases, and, as a result, vaccinations had to be postponed. One death was registered due to cancer of stomach; otherwise district was pretty healthy.

THOMASTOWN; *Knocktopher*.—Whooping-cough has been very prevalent during the last quarter, but so far has not proved fatal in any case. Sanitary conditions of the district are very satisfactory.

URLINGFORD; *Balleen*.—The sanitary condition is not good. There is a deficiency of pure drinking water in one portion of the district, and some of the houses are kept in a dirty state.

URLINGFORD; *Urlingford, W.*—Health of the district good. No epidemics. Very defective sewerage in parts of town of Urlingford. Vaccinations rather backward for past quarter.

WATERFORD; *Ullid.*—It is notable that for the first time for fifteen years we have no death from tuberculosis or any infectious disease.

King's County.

BIRR; *Banagher.*—The district very healthy. Vaccination well carried out.

BIRR; *Frankford.*—The condition of some of the houses in which poor people live is very bad; these houses are in bad repair, and kept badly, and there is a lot of overcrowding. I had to condemn several houses.

BIRR; *Kinnity.*—There were six deaths of persons aged 65 years and upwards, viz.:—83, 78, 77, 74, 70, and 65 years respectively. Water supply in Cadamstown and Longford defective. Extensive epidemic of parotitis during quarter.

MOUNTMELICK; *Clonygowan, No. 2.*—District healthy. Vaccinations in some cases postponed. Bronchial affections prevalent—one death registered at 96 years.

ROSCREA; *Roscrea, No. 2.*—Health of district very good. No case of tuberculosis or cancer in the district. Only two deaths registered—one at 75 years and the other 92 years.

ROSCREA; *Shinrone.*—Sanitary condition of district good.

TULLAMORE; *Clara.*—You will observe that during quarter I registered a death, the age given being one hundred years, and from personal inquiries I believe it to be correct. The sanitary condition of district is fairly good.

TULLAMORE; *Killoughy.*—The sanitary condition of this district is good, and it is free from any infectious disease.

TULLAMORE; *Philipstown.*—District healthy. Three deaths in the quarter of persons aged respectively 89, 86, and 82 years.

Longford County.

BALLYMAHON; *Abbeyshrule.*—Sanitary arrangements good. Fourteen deaths registered of persons aged from 72 to 90 years.

BALLYMAHON; *Ballymahon, W.*—The sanitary condition of the district is satisfactory.

GRANARD; *Ballinalee.*—The district is in a good sanitary condition, and free from contagious disease.

GRANARD; *Granard, W.*—The district is in good sanitary condition, and free from contagious disease.

GRANARD; *Scrabby, No. 2.*—Influenza, pneumonia, and whooping-cough were very prevalent in this district during the first two months of the quarter. Three cases of deaths from pulmonary tuberculosis are recorded. Vaccination backward.

Louth County.

ARDEE; *Castlebellingham.*—District healthy.

ARDEE; *Collon, No. 1.*—Sanitary arrangements good. District healthy.

ARDEE; *Dunleer.*—Sanitary arrangements good. District healthy.

DROGHEDA; *Drogheda, No. 1.*—Measles has been prevalent during the quarter.

DROGHEDA; *Termonfeckin.*—With the exception of a few cases of measles introduced during convalescence from a neighbouring district, my district has been free from infectious diseases for past quarter. By careful isolation, closing of the schools, and such protective precautions, the disease has not spread further so far.

DUNDALK; *Barronstown.*—The district is in a healthy state, and free from zymotic disease.

DUNDALK; *Dromiskin.*—District in a healthy state.

DUNDALK; *Dundalk, W.*—A severe epidemic of diphtheria prevailed during the greater part of the quarter, but I believe we are free from it now, as there has not been a case in the north portion of district for the past three and a half weeks, nor in the south part for nearly the same period.

Meath County.

ARDEE; *Collon, No. 2.*—Pertussis was very prevalent during quarter.

ARDEE; *Drumcondra.*—Influenza very prevalent during the quarter, with some cases of pneumonia.

DROGHEDA; *St. Mary's.*—The sanitary state of the district is good.

DUNSHAUGHLIN; *Killeen.*—Owing to the adverse climatic conditions and the prevalence of diphtheria in district, vaccinations postponed. Health of district good, and sanitary condition fairly satisfactory.

KELLS; *Nobber.*—Bronchial and pneumonia maladies are rather rife in one portion of the district. Many complaining in other portions from the natural results of the cold piercing winds of the east, which maintained for an unusually long spell from that point. The ten deaths recorded as 65 and above make an aggregate of 697 years, or an average of 69·7 years each.

NAVAN; *Painestown.*—Two cases of diphtheria and four of measles in the district during the quarter; otherwise a very healthy season.

OLDCASTLE; *Oldcastle, W.*—The district continues in a satisfactory condition.

TRIM; *Trim, W.*—Scarlatina of a mild type was prevalent during the quarter.

Queen's County.

ABBEYLEIX; *Durrow.*—Out of a total of 14 deaths during the past quarter, 6 were over 80 years.

ABBEYLEIX; *Rathdowney.*—The sanitary arrangements in the district are good.

ATHY; *Ballylynan.*—One death from tumour in stomach.

ATHY; *Stradbally.*—There were three deaths registered from pulmonary tuberculosis during the quarter just ended. There has been a mild epidemic of scarlatina in the district during the quarter, which caused one death.

MOUNTMELICK; *Clonaslee.*—The sanitary arrangements in my district are good; none of the principal epidemic diseases being present.

MOUNTMELICK; *Clonygowan, No. 1.*—District healthy. Vaccinations in many cases postponed. Bronchial affections amongst children prevalent.

MOUNTMELICK; *Mountmellick, W.*—The sanitary arrangements of this district are in a satisfactory condition.

ROSCREA; *Borris-in-Ossory*.—The health of this district has been fair during the past quarter.

Westmeath County.

ATHLONE; *Athlone, No. 1, W.*—Deaths of old people registered during the quarter aged 73 (3), 74 (2), 75 (2), 81, 83, and 86 years respectively.

MULLINGAR; *Castletown-Geoghegan*.—The condition of the district, and the sanitary condition for a country district are satisfactory.

MULLINGAR; *Milltown*.—Vaccination backward on account of the harsh weather. There is the *Grippe* epidemic at present, with one death. There was one death from phthisis. No deaths from cancer.

MULLINGAR; *Mullingar, W.*—There were some cases of scarlatina, otherwise district fairly healthy.

MULLINGAR; *Multyfarnham*.—Only two vaccinations, whooping-cough was so prevalent.

TULLAMORE; *Kilbeggan*.—Sanitary arrangements fairly good. One case of scarlatina. Vaccination postponed owing to bad weather.

Wexford County.

GOREY; *Coolgreany*.—Vaccinations had to be postponed in a large number of cases owing to prevalence of influenza and bronchial affections.

GOREY; *Gorey, W.*—Vaccination is practically nil, owing to local agitation against it.

NEW ROSS; *Fethard, No. 1*.—Sanitary conditions of the district fairly satisfactory. One case of diphtheria and two cases of scarlet fever during the quarter.

NEW ROSS; *Fethard, No. 2*.—Five cases of scarlet fever and seven of diphtheria occurred in the district during the quarter. The houses of these persons and the local schools were disinfecting. The rate of mortality amongst children under one year of age is very high. I consider that this is principally due to the custom of parents acting on the wrong advice of ignorant and unqualified persons.

NEW ROSS; *Old Ross*.—Vaccination postponed owing to severity of the weather.

WEXFORD; *Bannow*.—Whooping-cough is prevalent in the district. This accounts for the small number of vaccinations for the quarter.

WEXFORD; *Bridgetown*.—Vaccination was postponed owing to prevalence of whooping-cough.

WEXFORD; *Broadway*.—Whooping-cough prevalent throughout district, consequently very few vaccinations.

Wicklow County.

BALTINGLASS; *Baltinglass, No. 1, W.*—Six or seven cases of diphtheria during the quarter. Vaccinations postponed in consequence of diphtheria being epidemic and colds amongst the children.

BALTINGLASS; *Dunlavin*.—A healthy quarter; no infectious diseases.

BALTINGLASS; *Kiltegan*.—Diphtheria and scarlatina have been prevalent during quarter—two whole families of the working class having been sent to hospital on account of some of their members suffering from one or both diseases. Two shop assistants were also sent to hospital from this village. No cases have proved fatal, owing in a great measure, to prompt action of sanitary authorities.

NAAS; *Blessington*.—Influenza prevalent during the month of January; otherwise the district healthy. Low death-rate.

RATHDOWN; *Bray, No. 1*.—Deaths and births about the ordinary.

RATHDOWN; *Delgany*.—The health of the district is good.

RATHDRUM; *Annamoe*.—District healthy during quarter.

RATHDRUM; *Newcastle*.—General health of district very good. A widespread epidemic of a mild type of influenza existed for first two months of quarter. Twenty births registered and only eight deaths in this very extensive district.

SHILLELAGH; *Tinahely*.—There has been no case of infectious disease during quarter.

II. PROVINCE OF MUNSTER.

Clare County.

BALLYVAGHAN; *Ballyvaghan, W.*—Health of district very good.

COROFIN; *Corofin, W.*—Health of district fair. Vaccination generally backward during this quarter of the year.

ENNIS; *Crusheen*.—Health of district good. The deaths registered were at 90, 87, 81, 80, 79, 78, 72, 62, and 55 years of age.

ENNIS; *Newmarket*.—The district was in a very healthy state during the past quarter. The deaths were confined principally to the aged, who were unable to withstand the severity of the season. The falling-off in vaccination was probably due to the same cause.

ENNISTIMON; *Ennistimon, W.*—The sanitary arrangements are satisfactory. Vaccination slow owing to pertussis.

ENNISTIMON; *Milltown-Malbay*.—District in a very satisfactory state. General health good.

ENNISTIMON; *Roadford*.—There have been a good many cases of pertussis during the quarter and influenza among children. Otherwise district is healthy.

KILLADYSERT; *Labasheeda*.—Health of the district continues good.

KILRUSH; *Carrigaholt*.—Influenza prevalent, with pulmonary complications. Otherwise health of district very good. A number of old people died during past quarter.

KILRUSH; *Craggaknock*.—In one townland there were 18 cases of typhus fever; all removed to hospital, except two. Scarlatina and whooping-cough were also prevalent in parts of district. I got several of the schools closed during the epidemic. I am glad to say that the district at present is healthy, and in a fair sanitary state.

KILRUSH; *Kilkee*.—The sanitary condition of the district is fairly good, and there was no epidemic disease of any sort during the quarter.

KILRUSH; *Kilmihil*.—Sanitary condition of district good. Slight outbreak of scarlet fever.

KILRUSH; *Kilrush, W.*—The health of the district is good. No infectious diseases at present.

LIMERICK; *Coolacasey*.—The sanitary condition of the district is satisfactory. The water supply is very good.

SCARRIFF; *Annacarriga*.—Public health good.

SCARRIFF; *Feakle*.—Health of district good. Relative to my inquiries re the case of cancer registered this quarter, I am told that no relative of the deceased was known to have cancer.

SCARRIFF; *Mountshannon, W.*—District very healthy generally. Vaccination very slow in general.

SCARRIFF; *Quin.*—The district continues in a healthy state.

Cork County and County Borough.

BANDON; *Innishannon.*—There were a few cases of whooping-cough. The district otherwise was healthy. The sanitation and water supply of this village are not satisfactory.

BANDON; *Kilbrittain.*—District very healthy, and in a very good sanitary state.

BANTRY; *Bantry, W.*—The sanitary condition of district is fairly good. We had two cases of diphtheria—they recovered; also three cases of scarlatina—they also recovered; also a few cases of typhoid fever.

BANTRY; *Durrus and Kilcrohane.*—Sanitary arrangements fairly good. Had to postpone most cases of vaccination owing to bad weather. No cases of tuberculosis registered. Of the 4 deaths registered, 3 were of the ages 85, 82, and 72 years.

BANTRY; *Glengarriff.*—District exceptionally free from disease. No tubercular case in it at present.

BANTRY; *Kealkill.*—District in fairly good sanitary condition. One case of diphtheria occurred during the month. No further case. Number of primary vaccinations satisfactory, despite the inclemency of the weather.

CASTLETOWN; *Kilcatherine.*—District healthy. Vaccination retarded by very severe weather.

CLONAKILTY; *Roscarbery.*—During the quarter there was an epidemic of lobar pneumonia in the district, with one death, which occurred in an untreated case.

CORK; *Dripsey.*—The sanitary condition is satisfactory, as the sanitary authority had orders made in court to close some old insanitary dwellings.

CORK; *Queenstown, No. 2.*—Whooping-cough has been prevalent during the quarter.

DUNMANWAY; *Ballineen.*—Did not vaccinate during the quarter, as weather was bad, and had an epidemic of mumps.

DUNMANWAY; *Coolmountain.*—The general health of my district is all that could be desired. There was a fair average of children for vaccination during the quarter.

DUNMANWAY; *Dunmanway, W.*—The sanitary condition of the district continues fairly satisfactory. There was no death from tuberculous disease. One death was registered as being due to carcinoma of liver. Vaccination was rather backward, owing to severe and inclement weather.

FERMOY; *Rathcormack.*—There was no death from cancer registered during the quarter. Bronchitis and broncho-pneumonia were prevalent during the quarter, especially amongst children, which accounts for the few vaccinations.

KANTURK; *Milford.*—District very healthy.

KANTURK; *Newmarket.*—Public health good.

KILMALLOCK; *Charleville.*—The district is very healthy.

KINSALE; *Ballyfeard.*—Health of district good. One death occurred at 83, one at 81, one at 80, one at 76, and one at 70 years.

MALLOW; *Ballyclogh.*—District healthy.

MALLOW; *Buttevant.*—Health of district satisfactory.

MALLOW; *Rahan.*—District healthy, except for ordinary illnesses which usually occur.

MIDDLETON; *Cloyne.*—The number of vaccination defaulters being on the increase, it is necessary that compulsory statutory notices be posted throughout the district.

MIDDLETON; *Middleton, No. 2.*—As a rule no children are vaccinated during the winter months.

MILLSTREET; *Cullen.*—Vaccinations have been postponed in consequence of prevalence of whooping-cough.

SKIBBEREEN; *Dromdaleague.*—District healthy. Water supply to village of Drimoleague unsatisfactory in quantity and quality.

SKIBBEREEN; *Skibbereen, W.*—District in a fair sanitary condition.

SKIBBEREEN; *Union Hall.*—Two cases of typhus fever have occurred in the district during the past week. District otherwise healthy.

SKULL; *Goleen.*—No children have been brought in for vaccination during the quarter.

SKULL; *Skull, W.*—The number of deaths is above the average. Five deaths are registered as having been due to some form of tuberculosis.

YOUGHAL; *Killeagh.*—Vaccinations postponed owing to illness amongst infants.

YOUGHAL; *Youghal, W.*—Vaccinations begin soon.

Kerry County.

CAHERSIVEEN; *Caher, W.*—There have been no vaccinations during quarter owing to the inclement weather. Measles and whooping-cough have now disappeared. I wish to point out the urgent necessity of the Cahersiveen supplemental water supply. At present the supply is very meagre, and if immediate steps are not taken the consequences during the summer months will certainly be very serious.

CAHERSIVEEN; *Darrynane.*—The district is in a fairly satisfactory sanitary condition, and free from zymotic diseases.

CAHERSIVEEN; *Emlagh.*—Sanitary state of the district fairly good.

CAHERSIVEEN; *Glanbehy.*—There are two deaths from cancer. The sanitary state of district good.

CAHERSIVEEN; *Valencia.*—District healthy. No epidemic during quarter. Of the deaths registered, six are those whose average age was exactly 75 years.

DINGLE; *Anascaul.*—Measles epidemic has now subsided, and children should be vaccinated.

DINGLE; *Castlegregory.*—The sanitary arrangements in the district are good. Whooping-cough is still in the district, but is less prevalent. There was only one death from this disease. The parents are not bringing in the children for vaccination, the reason of which I do not know.

DINGLE; *Dingle, W.*—There is an epidemic of measles in the eastern portion of the district, and the school has been closed. There has been no death from the disease up to the present.

DINGLE; *Ventry.*—Sanitary condition of the district fair. Vaccination very backward.

KENMARE; *Kenmare, W.*—District healthy.

KENMARE; *Kilgarvan.*—There was no vaccination during past quarter, owing to an epidemic of influenza with pneumonia.

KENMARE; Tuosist.—Of the 5 deaths registered, two were senile decay of persons aged 88 and 82 years; the remaining 3 cases of pulmonary tuberculosis contracted in America. The danger of allowing the return to their families of those poor victims of the scourge is obvious.

KILLARNEY; Coom.—With the exception of a small outbreak of scarlet fever, the district has been healthy during past quarter.

KILLARNEY; Killarney, No. 1, W.—No vaccination in consequence of epidemic cold amongst children. Pneumonia very prevalent amongst both children and adults.

KILLARNEY; Killorglin.—District healthy. Have had six cases of enteric fever, but no fresh cases for past seven weeks.

KILLARNEY; Milltown.—No vaccination during quarter ended March 31st, 1911.

KILLARNEY; Molahiffe.—Sanitary condition of district good.

LISTOWEL; Ballyhorgan.—The average age of 7 of the deaths registered during quarter was 76 years, which accounts for 7 uncertified cases. Sanitary state of district good.

LISTOWEL; Ballylongford.—District fairly healthy for quarter. No contagious disease visible. Two deaths from consumption proper. What is very remarkable in one case, the family of sisters and brothers, nine in all, died from same disease, ranging from 18 to 28 years of age. Postponed all vaccinations until summer quarter.

TRALEE; Ardfer.—The water supply in portions of the district is very bad.

TRALEE; Brosna, No. 1.—District healthy.

TRALEE; Castlemaine.—Whooping-cough and influenza very prevalent during quarter. Owing to this, vaccination backward.

TRALEE; Kilgobban.—District healthy.

TRALEE; Tralee, No. 1, W.—Vaccination had to be postponed owing to existence of mumps amongst children.

TRALEE; Tralee, No. 2.—Death-rate much lower than corresponding period of last year owing to absence of epidemic disease amongst children. Sanitary condition of district satisfactory.

Limerick County and County Borough.

CROOM; Castletown.—A healthy quarter.

KILMALLOCK; Bruff.—One case of diphtheria and one case of membranous croup reported in last quarter. Sanitary condition of district satisfactory.

KILMALLOCK; Bruree.—Some cases of influenza with lung complications. Otherwise district healthy.

KILMALLOCK; Hospital.—A few cases of scarlatina. Otherwise district healthy.

KILMALLOCK; Kilfinane.—District healthy. Only a few cases of scarlatina this quarter.

KILMALLOCK; Kilmallock, W.—Vaccinations below the average owing to the severity of weather and prevalence of bronchial affections.

LIMERICK; Annacotty.—Sanitary arrangements very fair. There have been some cases of influenza and mumps.

LIMERICK; Caherconlish.—District healthy. Sanitary condition good.

LIMERICK; Moroe.—District generally healthy, and in fairly good sanitary condition. Death-rate unusually low. Three deaths from cancer. None from tuberculosis. Outbreak of mumps just now. Vaccination up to date.

LISTOWEL; Glin.—There were two cases of scarlatina and one of diphtheria. Otherwise the public health of district was satisfactory.

MITCHELSTOWN; Galbally.—Owing to an epidemic of scarlatina, vaccination had to be postponed.

NEWCASTLE; Ardagh.—The sanitary state of the district is pretty fair. Influenza colds prevalent. A few cases of pneumonia; no deaths from same.

NEWCASTLE; Feenagh.—There has been no prevalence of any special disease.

RATHKEALE; Askeaton.—The district during the past quarter was healthy. Influenza of a mild character was prevalent.

RATHKEALE; Pallaskenry.—District fairly healthy.

RATHKEALE; Rathkeale, No. 1, W.—Notwithstanding the rather sharp and capricious weather, there was no undue mortality from pulmonary affections. There were some few cases of bronchial affections of a mild form, which contributed to hasten the end, associated with senile decay, which, in its advanced form of decrepitude, accounted for two deaths, aged respectively 97 and 91 years. There was one case of suicide by hanging of a young agricultural labourer aged 17. Of 18 deaths, 9 were of persons aged 97, 91, 84, 82, 80, 73, 72, 71, and 65 years respectively. One died of burns, aged 4½ years. There was an epidemic of mumps, but no other communicable disease prevailed in the district.

TIPPERARY; Grean.—District healthy.

Tipperary County, North Riding.

BORRISOKANE; Borrisokane, W.—Owing to epidemic of whooping-cough and severity of weather all vaccinations were postponed until the current quarter.

BORRISOKANE; CloghJordan.—The district is at present in a very healthy condition.

NENAGH; Nenagh, W.—Whooping-cough is prevalent in urban district just at present. Those affected are isolated as far as possible and ordered to be kept from school.

NENAGH; Newport.—There were a good many cases of mumps in district during quarter. No case of infectious disease reported.

NENAGH; Portroe.—District in a healthy condition.

NENAGH; Toomyvara.—One death was registered at 90 years, one at 82 years, and one at 80 years. The district is healthy.

ROSCREA; Roscrea, No. 1, W.—Two cases of typhus fever occurred in the town during March; they were sent to hospital, and are now convalescent. The disease has not spread. It is nearly 20 years since there was a case of this disease in the district before.

THURLES; Borrisoleigh.—The town of Borrisoleigh is in an insanitary state.

THURLES; Moyne.—District healthy. No disease.

THURLES; Templemore.—No vaccinations performed during quarter.

THURLES; Thurles, W.—Influenza, with pneumonia, prevalent during latter part of quarter.

Tipperary County, South Riding.

CALLAN; Ballingarry.—A severe type of influenza was prevalent during the quarter.

CALLAN; Mullinahone.—Sanitary condition of district fairly good. No disease prevalent. Vaccination well attended to, and the people in general getting to understand and appreciate sanitary precautions. No case of tuberculous disease or cancer under my observation at present.

CASHEL; Kilpatrick.—The district is free from zymotic disease.

CLOGHEEN; Caher.—No cases of an epidemic character occurred during the past quarter. Sanitary state of district is very good.

CLOGHEEN; Clogheen, W.—District continues particularly free from epidemic disease.

CLONMEL; Kilsheelan, No. 1.—One death from tuberculosis—*tabes mesenterica*.

TIPPERARY; Bansha.—District healthy.

TIPPERARY; Cappagh.—There were three cases of scarlatina, two of which were removed to hospital. Otherwise the district is healthy.

TIPPERARY; Emly.—A slight outbreak of scarlatina.

URLINGFORD; Kilcooly.—The sanitary arrangements of district are good, and fairly observed.

Waterford County and County Borough.

CARRICK-ON-SUIR; Rathgormuck.—The district is quite free from infectious disease, and the sanitary condition is satisfactory.

CLONMEL; Ballymacarbray.—Sanitary arrangements good. Very little sickness during quarter.

CLONMEL; Kilsheelan, No. 2.—An epidemic of influenza, with lung complications, occurred in this district.

DUNGARVAN; Dungarvan, W.—There were some cases of diphtheria in the urban district, which caused two deaths during the past quarter.

DUNGARVAN; Seskinan.—Sanitary condition of district good. Goitre is very prevalent in parts of district; cause unknown.

DUNGARVAN; Whitechurch.—Bronchitis prevalent among children. Two cases of chicken-pox.

KILMACTHOMAS; Bunmahon.—There was a very severe outbreak of broncho-pneumonia amongst young children in this district during the past quarter, from which 4 deaths were registered; the other 2 children who died were premature twins. District otherwise healthy.

WATERFORD; Kilmeadan.—District very healthy. No infectious diseases. One death from tuberculosis, and several cases under treatment. Sanitary arrangements good. Water supply plentiful, but requires improvement in a few places.

WATERFORD; Waterford Urban, No. 1, W.—The health of the district has been exceptionally good during the past quarter. There is a marked diminution in the proportion of deaths due to tubercle. No epidemic disease.

WATERFORD; Woodstown.—The sanitary condition and the health of the district are good. Three cases of pulmonary tuberculosis were imported from outside the district during the past quarter, but no new cases have occurred in the district for the past two years. This I attribute to the healthy dwellinghouses that have been provided for the working classes, the thorough system of domestic scavenging practised in the villages of the district, the careful disinfecting of premises, and to the educational campaign that has been carried on throughout the country.

YOUGHAL; Ardmore.—Bronchial troubles prevalent during the quarter.

YOUGHAL; Clashmore.—There has been much bronchitis and broncho-pneumonia during last two months of quarter amongst children. I would wish to call attention to the custom here of swathing children's chests in flannel; it hinders respiration, and prevents proper chest development, and so may act as a predisposing factor in tuberculous phthisis. The use of light, elastic and warm underclothing for infants is very desirable, but in country districts the popular opinion is that weight is necessary for warmth.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM; Antrim, W.—Condition of district satisfactory.

ANTRIM; Crumlin.—There has been an extensive epidemic of influenza during the month of March, though the cases have all been mild. Death-rate has been exceptionally low.

ANTRIM; Doagh.—One case of typhoid fever and four of scarlatina were notified during the quarter.

ANTRIM; Randalstown.—Whooping-cough epidemic during the quarter.

ANTRIM; Templepatrick.—The sanitary arrangements of the district (with few exceptions) are good. Measles has been prevalent in the eastern part of the district, and a considerable number of cases of influenza during the quarter. Two deaths from the last-named disease.

BALLYCASTLE; Ballycastle, W.—District healthy.

BALLYCASTLE; Cushendall.—Sanitary arrangements in the district very good. No case of infectious disease in the district, nor one case of any form of tuberculous disease. The cause of death of the four infants under one year was premature birth.

BALLYMENA; Ahoghill.—District healthy; free from zymotic disease at present. One death registered at 93 years.

BALLYMENA; Ballymena, W.—Town and district healthy.

BALLYMENA; Broughshane.—The health of the district is good.

BALLYMENA; Clogh.—I have had several cases of diphtheria during the quarter, but no deaths; otherwise the district has been fairly healthy.

BALLYMENA; Galgorm.—Two deaths from whooping-cough and secondary causes. No other zymotic disease.

BALLYMENA; Portglenone.—There is no prevalence of any special disease in the district.

BALLYMENA; Toome.—During quarter there has been an epidemic of measles of a mild character. No deaths have resulted therefrom. The district is in a good sanitary condition.

BALLYMONEY; Ballymoney, W.—Scarlatina of a very mild type was epidemic. The early cases were removed to hospital. As a result a medical man was not called in in later cases.

BALLYMONEY; Bushmills.—At present we have an epidemic of measles; rash lasts two days; enlarged cervical glands; no sequelae. Attacks everybody, old and young, but it is of no great consequence.

BELFAST; Belfast Rural, No. 1.—Influenza and measles prevail in the district at present.

BELFAST; *Belfast Rural*, No. 3.—No deaths from cerebro-spinal fever have occurred during last quarter.

BELFAST; *Belfast Rural*, No. 4.—The health of the district generally is very good. The sanitary arrangements, though not everything that could be desired, have been greatly improved of late, and are now pretty well up-to-date for a country district.

LARNE; *Ballycarry*.—Sanitary condition of district good; no epidemic in district. Few scattered cases of diphtheria, scarlet fever, and measles; no deaths therefrom.

LARNE; *Glenarm*.—There has been an epidemic of scarlet fever of a mild type during the quarter. Pneumonia has been also prevalent.

LARNE; *Larne*, W.—Scarlatina of a mild type prevalent during quarter, but is now diminishing. A few cases of diphtheria have also occurred.

LARNE; *Waterfoot*.—Sanitary arrangements in this district are excellent. No infectious disease of any kind. Only one case of tuberculous disease in the entire district.

LISBURN; *Dunmurry*.—The sanitary condition of this district is good; no epidemic of any kind.

LISBURN; *Glenavy*.—I had a good many cases of follicular pharyngitis in children during the first two months of the quarter. There was one case of diphtheria and two of scarlet fever notified; otherwise the health of district was good. There are two vaccination defaulters; both postponed on medical certificates of unfitness.

LISBURN; *Knocknadona*.—The sanitary condition of this district fairly good. One death from cancer. Five deaths from tuberculosis. One death of a woman registered at the age of 100 years. I have known her for over 60 years, and I believe her age to be correct.

Armagh County.

ARMAGH; *Armagh*, W.—One death caused by tetanus, only four days intervening between accident and death.

ARMAGH; *Loughgall*.—Measles prevalent during the quarter.

ARMAGH; *Markethill*.—Measles has been epidemic in the district for the past quarter, but is of a mild kind. I registered the death of a boy from heart failure, which I thought might have been due to diphtheria, as the symptoms pointed to it, but I was unable to verify my suspicions.

ARMAGH; *Rich Hill*.—Owing to bad weather and the prevalence of bronchial colds amongst the children, I have postponed vaccination in a number of cases. Two cases of scarlatina of a mild type occurred at the end of this quarter.

ARMAGH; *Tynan*.—Sanitary state of the district satisfactory, and no prevailing disease, with the exception of bronchial catarrh amongst children, of which there was a large number of cases.

CASTLEBLAYNEY; *Newtownhamilton*, No. 1.—Whooping-cough is just beginning to show itself in the district.

LURGAN; *Lurgan*, No. 1, W.—The epidemic of measles which prevailed in the urban district during the last three months of 1910 ceased at the end of the year, and no death therefrom has occurred since the 2nd January last. The district has been completely free from zymotic disease during the quarter. Vaccination was practically suspended from the commencement of the outbreak of measles, but will now be proceeded with vigorously.

LURGAN; *Lurgan*, No. 2.—This district is in a very healthy condition, and free from any infectious disease.

NEWRY; *Mullaghglass*.—There has been a good deal of chest disease, especially amongst the old, and influenza has been prevalent during past two months. Of contagious diseases, I have had one case each of enteric fever, scarlatina, diphtheria, and erysipelas, but no deaths.

NEWRY; *Poyntz Pass*.—District healthy.

Belfast County Borough.

BELFAST; *Belfast Urban*, No. 4, W.—No deaths from cerebro-spinal fever.

BELFAST; *Belfast Urban*, No. 5.—No outbreak of any infectious disease.

BELFAST; *Belfast Urban*, No. 7.—Influenza and measles prevail in the district at present.

BELFAST; *Belfast Urban*, No. 9.—No deaths from cerebro-spinal fever have been registered here during last quarter.

BELFAST; *Belfast Urban*, No. 11.—There has not been a death from cerebro-spinal fever or cerebro-spinal meningitis registered in the district during the quarter. The death-rate, though higher than the other quarters of the year, is not abnormal for the winter quarter.

BELFAST; *Belfast Urban*, No. 13.—No deaths from cerebro-spinal meningitis.

Cavan County.

BAILIEBOROUGH; *Bailieborough*, W.—District in a fairly healthy condition.

BAILIEBOROUGH; *Shercock*.—Influenza prevalent in district during the quarter.

BAILIEBOROUGH; *Termon*.—Sanitary condition good.

BAWNBOY; *Swanlinbar*.—There was an epidemic of scarlatina during February and March, and vaccinations had to be postponed.

CAVAN; *Killashandra*.—No death registered from tuberculosis. One death from cancer of liver, and one from puerperal sepsis. The death of a shoemaker's widow at 97 years was registered. District healthy; no epidemic during the quarter. The branch of the Women's Health Association and Girls' Guild of same Society are doing valuable work in the district. They have got people to keep their windows open where I failed repeatedly.

COOTEHILL; *Drum*, No. 2.—The district is in a good sanitary condition.

COOTEHILL; *Tullyvin*.—District healthy. Of the deaths registered during the quarter, 13 persons had reached the age of 60 years or over, and one woman (a farmer's widow) had crossed 100 years.

ENNISKILLEN; *Holywell*, No. 2.—The sanitary condition of the district is fairly good. Of the 11 deaths registered, 7 were those of persons over 70 years, and one was that of a man aged 103 years. Three were of infants under one year.

GRANARD; *Scrabby*, No. 1.—Health of this district fairly good, except for the prevalence of whooping-cough amongst the children. Vaccinations rather backward owing to the latter disease.

OLDCASTLE; *Ballyjamesduff*.—Owing to influenza, whooping-cough, and bronchial catarrh, there were no vaccinations this quarter. Health of district otherwise good. A general improvement in the better living of all classes, together with a better consideration for good sanitary surroundings.

OLDCASTLE; *Virginia*.—District healthy.

Donegal County.

BALLYSHANNON; *Ballintra*.—Of the seven deaths registered during the quarter, six were of persons over 65 years.

DONEGAL; *Donegal, W.*—Influenza prevalent.

DONEGAL; *Dunkineely*.—Scarlatina prevalent during quarter; also influenza

DONEGAL; *Laghy*.—Measles has been very prevalent, accompanied by bronchitis and pneumonia; no deaths have been registered or have taken place from this cause during the quarter. Vaccination has been practically at a standstill on account of the epidemic.

DONEGAL; *Mountcharles*.—District healthy. East winds prevalent during March. Some cases of influenza.

DONEGAL; *Pettigoe*.—Measles prevalent during the quarter; one death.

DUNFANAGHY; *Crossroads*.—Diphtheria has been prevalent during the quarter, and vaccination has been postponed on its account.

DUNFANAGHY; *Dunfanaghy, W.*—There were about 20 cases of diphtheria treated in hospital (sent from adjoining districts), of which one died. Two other deaths were reported to me from the same disease. There has been no epidemic in this district. Two deaths from enteric fever happened in the one house, caused by drinking bad water while working in a bog.

GLENTIES; *Ardara*.—District healthy.

GLENTIES; *Doocharry*.—District healthy.

GLENTIES; *Glenties, W.*—No vaccination this quarter owing to inclement weather and prevalence of lung affections.

INISHOWEN; *Buncrana*.—District healthy.

INISHOWEN; *Carndonagh, W.*—Influenza very prevalent throughout the district.

INISHOWEN; *Clonmany*.—Pneumonia prevalent during quarter, from which cause four deaths were registered.

INISHOWEN; *Malin*.—There was a severe epidemic of influenza, with chest complications of bronchitis, pleurisy, and pneumonia in district during quarter, which has prevented a large number of children from being vaccinated. Of the 24 deaths 16 were over 65 years, and the most of them were old age pensioners.

INISHOWEN; *Moville*.—District healthy.

LETTERKENNY; *Church Hill*.—Of the deaths registered 8 were over 80 years, 16 over 70 years, 18 over 65 years. District healthy. No epidemic.

LETTERKENNY; *Letterkenny, W.*—Whooping-cough is prevalent at present and during the past quarter; hence vaccinations were postponed.

LONDONDERRY; *Killea*.—Whooping-cough and influenza of a severe type have been prevalent during the quarter.

MILLFORD; *Rathmullan*.—District has been healthy during quarter, except two mild cases of scarlet fever.

MILLFORD; *Rosquill*.—Influenza very prevalent during last six weeks. One death from the cerebral type of the disease. In two cases a virulent form of acute lobar pneumonia occurred during convalescence, both being fatal. There appears to be a good prospect of improvement being effected in the sanitation of dwelling-houses during the coming years, as there are no less than 140 applications for grants under the Congested Districts Board's new scheme for improvement of dwellings.

STRABANE; *Raphoe*.—Whooping-cough and measles have prevented me from vaccinating the number of children I perhaps might have done, but could not do so owing to the epidemic diseases. Sanitary arrangements satisfactory.

STRANORLAR; *Cloghan*.—Sanitary arrangements satisfactory. District healthy. A number of the deaths were at an advanced age.

STRANORLAR; *Killygordon*.—The sanitary arrangements are satisfactory, the sewerage of the village being in a good state. No zymotic diseases to report. Measles was pretty prevalent, the aftermath of an epidemic last autumn, but cases have nearly wholly cleared away. There has been a larger ratio of deaths than usual from different forms of tuberculosis. About two-thirds of the deaths registered were of people over 70, the average age being about 77.

Down County.

BANBRIDGE; *Ballyward*.—The district is in a very fair sanitary condition. No outbreaks of infectious disease have occurred. The precautions taken against the spread of tuberculosis are scanty. Most of the poorer classes are ignorant of the danger of infection.

BANBRIDGE; *Loughbrickland*.—The sanitary arrangements in the district are fairly good. There were two cases of typhoid fever and two cases of erysipelas during the quarter. Measles has been prevalent during the months of February and March. There has been a good deal of influenza all through the quarter. There is very little tuberculosis in the district at present, seemingly getting less every year.

BELFAST; *Castlereagh, No. 1*.—No deaths from cerebro-spinal meningitis.

DOWNPATRICK; *Ballynahinch*.—There have been numerous cases of measles and influenza in parts of the district during the quarter; also a few cases of chicken-pox.

DOWNPATRICK; *Downpatrick, W.*—Eight deaths attributed to influenza. A great many children suffered from influenza and are still suffering.

DOWNPATRICK; *Killyleagh*.—There has been a mild epidemic of influenza during the second month of the quarter. I have registered the deaths of seven Old Age pensioners during the quarter. The sanitary condition of the district is fairly good, but the water supply needs improvement.

DOWNPATRICK; *Portaferry*.—Influenza prevalent. One case of enteric fever occurred, which proved fatal, and was contracted in America. District otherwise healthy.

KILKEEL; *Kilkeel, No. 2, W.*—Health of district good. The houses are cleaner, and plenty are being built more up-to-date, roomy, and well ventilated.

KILKEEL; Rosstrevor.—The sanitary condition of the district is very satisfactory. The past quarter has been very severe upon old people and young children, bronchitis and pneumonia being rather prevalent. No epidemic or infectious diseases, except one case of diphtheria and one case of typhoid fever. I would recommend that the Notification of Diseases Act be adopted in this union.

LISBURN; Annahilt.—The sanitary condition of the district is very satisfactory.

LISBURN; Ballylesson.—District healthy and free from any epidemic. One death registered at 100 years.

LISBURN; Drumbeg.—Births above the average. No case of infectious disease during the quarter; district healthy.

LISBURN; Saintfield.—There have been some cases of whooping-cough in the district during the past quarter, but no deaths.

LURGAN; Moira.—No cancer. An epidemic of measles has been running for the past six months, more or less, and has claimed one victim this quarter, but on the whole there have been few deaths from that cause; otherwise the district is free of epidemic disease. There has, however, been a good deal of sickness during the winter, pneumonia being frequent.

LURGAN; Waringstown.—An epidemic of enteric fever has taken place since Christmas in part of this district. In all there have been 40 cases; all were removed to hospital, but one, a young child. There was one case of scarlet fever reported to me.

NEWRY; Rathfryland.—The sanitary condition of the district is improving.

NEWTOWNARDS; Bangor.—Sanitary arrangements of district very good. Public health good for season. Vaccination well carried out.

NEWTOWNARDS; Comber.—No deaths from infectious diseases and very few cases, except diphtheria. Influenza very prevalent, but of a mild type.

NEWTOWNARDS; Greyabbey.—Births and deaths about average. Measles in epidemic form was present in two portions of the district. No death recorded as due to it. General health of district fairly good, except for winter coughs. More than half the deaths, 25, were of persons aged over 65 years. Two cases of diphtheria were present in district during quarter; both recovered. Also one of scarlatina; one death from enteric fever, and one from puerperal septicaemia.

NEWTOWNARDS; Kilmoody.—One case of scarlet fever; otherwise the district is free from infectious disease.

NEWTOWNARDS; Newtownards, W.—There has been some whooping-cough, and a few cases of scarlatina showed themselves. This disease has not, I am glad to say, spread. The health of the district has been good generally.

Fermanagh County.

BALLYSHANNON; Church Hill.—No vaccinations during the quarter, a number of children having whooping-cough; two deaths from same. There were a few cases of typhus, but no death by it.

ENNISKILLEN; Florencecourt.—Whooping-cough prevalent during latter part of quarter.

ENNISKILLEN; Holywell, No. 1.—The sanitary arrangements of the district are fairly good. All of the three deaths registered were of persons over 70 years.

IRVINESTOWN; Clonelly.—The sanitary arrangements of Fermanagh portion of Pettigoe are very bad.

IRVINESTOWN; Ederney.—Measles, whooping-cough, influenza, and bronchitis prevalent during quarter.

IRVINESTOWN; Irvinestown, W.—Of deaths registered, 14 were of persons over 70 years.

LISNASKEA; Derrylin.—The sanitary arrangements are much the same as before. Consumption, or tubercle in some of its forms, is always with us, and is likely to stay. There has been a severe epidemic of influenza during the latter part of the quarter.

LISNASKEA; Lisnaskea, W.—Sanitary state of district fairly good. Majority of deaths were of persons aged 65 years and upwards.

Londonderry County and County Borough.

COLERAINE; Aghadowey.—Epidemic of scarlet fever; no deaths. Two deaths from diphtheria; patients seen too late for effective treatment. Mortality from tuberculous disease (7) particularly high.

COLERAINE; Garvagh.—Measles has been epidemic in one part of the district during the month of March, but caused no deaths; otherwise the health of the district has been good.

COLERAINE; Kilrea.—District healthy.

COLERAINE; Portstewart.—Whooping-cough has been prevalent amongst children, and bronchial and pulmonary affections have been general amongst all, "old and young."

LIMAVADY; Ballykelly.—Of the 14 deaths registered, six were of persons over 70, and of these two were over 80 years.

LIMAVADY; Bellarena.—District healthy and free from infectious disease.

LIMAVADY; Dungiven.—The district is in a healthy state. Death-rate is very low for the winter months.

LIMAVADY; Limavady, W.—District in a very healthy state. The epidemic of diphtheria and scarlet fever we had during last quarter has been completely stamped out, not a single case having been reported during the quarter.

LONDONDERRY; Eglinton.—Whooping-cough very prevalent during past quarter.

MAGHERAFELT; Moneymore.—During second month of quarter a severe form of measles occurred, thought to have been introduced from outside the district, but no deaths took place. We had two of the schools closed for about a month, cleansed, and disinfected, with satisfactory results. Disease now abating; otherwise district has been healthy during quarter.

Monaghan County.

CARRICKMACROSS; Carrickmacross, W.—District in fair sanitary condition. One death occurring in rural portion of district, and registered as "burns accidentally received."

CARRICKMACROSS; Donaghmoyne.—District healthy.

CARRICKMACROSS; Raferagh.—There exists a strong prejudice against vaccination during the winter months; this, as well as the fact that a number were postponed owing to illness, accounts for the fact that none were vaccinated.

CASTLEBLAYNEY; *Ballybay*.—Measles has been epidemic during quarter. The majority of the dwellings has been connected with the main drainage system, which is working satisfactorily. Vaccination well attended to.

CASTLEBLAYNEY; *Castleblayney, W.*—Amongst the ages in register of deaths for the quarter, one was 97, one 90, and there were six varying between 80 and 90 years.

CASTLEBLAYNEY; *Newtownhamilton, No. 2.*—Whooping-cough is becoming prevalent.

CLONES; *Clones, W.*—Measles, whooping-cough, and mumps have been prevalent during the quarter, and in consequence vaccination of young children is behind-hand. Four deaths from whooping-cough and its complications have been registered.

COOTEHILL; *Dawsongrove*.—The sanitary condition of the district is fair.

COOTEHILL; *Drum, No. 1.*—The district is in a good sanitary condition.

MONAGHAN; *Castleshane*.—There were three cases of diphtheria, which were reported at the time. There has been a severe epidemic of influenza, with pneumonia trouble.

MONAGHAN; *Emyvale*.—The health of district fairly good. No epidemics this quarter. Vaccination not attended to so punctually owing to cold weather.

MONAGHAN; *Kilmore*.—Scarlatina (8 cases), diphtheria (2 cases), all among children attending the same school. School closed, and epidemic ceased. No deaths from these diseases.

MONAGHAN; *Monaghan, W.*—The sanitary arrangements in this district remain unsatisfactory. There has been no epidemic or prevalence of any of the diseases named in the abstracts requiring special notice.

MONAGHAN; *Scotstown*.—The health and sanitary arrangements of the district are satisfactory. There has been no epidemic of any kind.

Tyrone County.

CASTLEDERG; *Castlederg, W.*—Sanitary state of district satisfactory. No epidemics of any kind. Influenza of a mild type rather prevalent, owing to the cold east wind prevailing. Births and deaths rather below average.

CASTLEDERG; *Drumquin*.—The sanitary condition of the district is satisfactory, without any infectious disease, except measles and whooping-cough, which have prevailed during past quarter, and owing to which almost all the vaccinations of children had to be necessarily postponed.

CASTLEDERG; *Killeter*.—District healthy.

CLOGHER; *Aughnacloy*.—District generally healthy, and free from infectious disease.

CLOGHER; *Ballygawley*.—Influenza and broncho-pneumonia prevailed during quarter.

CLOGHER; *Fivemiletown*.—There were more cases of illness during the past quarter than is usually the case, and the death-rate was higher, as it generally is in the first quarter of each year.

COOKSTOWN; *Coagh*.—District very healthy. No epidemic of any kind during quarter.

COOKSTOWN; *Cookstown, W.*—There is an epidemic of measles in the district, consequently vaccination greatly diminished.

COOKSTOWN; *Pomeroy*.—Extensive epidemic of measles during this and previous quarter now over; no deaths.

COOKSTOWN; *Stewartstown*.—No dangerous infectious disease during the quarter; at present district is very healthy.

DUNGANNON; *Clonavaddy*.—Sanitary arrangements fairly good.

DUNGANNON; *Coalisland*.—One case each of scarlatina, diphtheria, and erysipelas. A widespread epidemic of measles, now abating, accounts for the small number of vaccinations performed during the quarter.

IRVINESTOWN; *Trillick*.—Sewerage required in village of Trillick, and a water supply.

OMAGH; *Drumquin*.—The sanitary arrangements of the district are fairly satisfactory. No epidemic or other diseases are at present prevalent, except mild form of measles.

OMAGH; *Fintona*.—The health of the district has in general been good during the past quarter, and, with the exception of whooping-cough, free from epidemic disease. The sanitary arrangements are satisfactory.

OMAGH; *Omagh, No. 1, W.*—Health of district satisfactory. Epidemic of measles and whooping-cough prevalent, which accounts for diminution of vaccinations. Urban sanitary condition fairly satisfactory. In the rural there is the usual apathy.

OMAGH; *Omagh, No. 2.*—There was an epidemic of measles in this district for the past two months. Only three deaths registered from same. The disease has now abated.

OMAGH; *Sixmilecross*.—The district is in very good sanitary condition at present. There is still room for improvement in labourers' houses; in a number both light and ventilation are deficient.

STRABANE; *Dunnamanagh*.—Congestion of lungs was very prevalent during this quarter.

STRABANE; *Strabane, W.*—Sanitary arrangements good.

IV. PROVINCE OF CONNAUGHT.

Galway County.

BALLINASLOE; *Kiltormer*.—Five out of seven persons whose deaths were registered were over 70 years of age.

BALLINASLOE; *Laurencetown*.—No cancer or deaths from cancer.

CLIFDEN; *Inishbofin*.—Sanitary arrangements fairly good.

CLIFDEN; *Roundstone, No. 1.*—During the quarter five cases of enteric and one case of scarlet fever were treated by me in the district; all are now quite recovered, and the district is generally healthy.

GALWAY; *Galway, No. 3 (Arran)*.—Health of district very good.

GALWAY; *Moycullen*.—The sanitary arrangements are in good condition.

GALWAY; *Oranmore*.—A death of an old woman registered at 106 years in my district.

GALWAY; *Spiddle*.—Health of district continues very satisfactory.

GALWAY; *Turloughmore*.—Sanitary arrangements fair.

GORT; *Gort, W.*—One case of typhus fever occurred in the month of March. It was due to infection outside district. The disease has not been spread. There were several cases of pneumonia; bronchitis and colds of various kinds also prevailed.

GORT; *Kinnarra*.—The district is healthy.

LOUGHREA; *Bullaun*.—There were four deaths over 70 years of age—one 75, 76, 77, and one 89 years.

LOUGHREA; *Loughrea, W.*—The district is in a healthy condition; a large proportion of the tuberculous cases is being sent to hospital.

MOUNT BELLEW; *Mount Bellew, W.*—Sanitary arrangements fairly satisfactory.

OUGHTERARD; *Cloonbur, No. 1.*—Influenza very prevalent. Enteric fever has entirely disappeared from district.

OUGHTERARD; *Lettermore*.—Sanitation progressive.

OUGHTERARD; *Oughterard, W.*—One death from cancer of face.

PORTUMNA; *Portumna, No. 1, W.*—Fairly good sanitary condition, and district free of infectious disease, as far as I am aware.

TUAM; *Tuam, No. 1, W.*—The sanitary condition of the town of Tuam is bad. Steps should be taken to have it improved.

TUAM; *Tuam, No. 2.*—The district was free from epidemic disease during quarter.

Leitrim County.

BAWNBOY; *Ballinamore*.—Sanitary condition of district fair.

MOHILL; *Carrigallen*.—The health and sanitary condition of the district have been fairly good during the quarter. Of the ten deaths registered six were of persons over 65 years, viz., 73, 74, 81 (2), 88, and 92 years respectively.

MOHILL; *Mohill, W.*—District healthy. No complaints regarding sanitary arrangements.

MOHILL; *Rinn*.—The district is healthy and free from epidemic.

MOHILL; *Rowan*.—Vaccinations unaccountably not up to average. Sanitation very poor.

Mayo County.

BALLINA; *Ballina, W.*—During the quarter seven deaths were registered as due to different forms of tuberculosis. The death-rate of aged persons is above the average—32 deaths over 65 years recorded—one at 100 years, which was well authenticated. There has been an outbreak of measles amongst children, and some cases of scarlet fever. District in fair sanitary condition. Vaccination well looked after.

BALLINA; *Crossmolina*.—Four cases of scarlet fever in early part of quarter. District otherwise free from infectious disease. Sanitary condition fair.

BALLINROBE; *Ballinrobe, W.*—Some cases of enteric fever and diphtheria reported at the beginning of the quarter. Very few cases of vaccination during the quarter.

BALLINROBE; *Cappaghduff*.—The weather being very bad prevented the children being vaccinated. Sanitary condition fair. Many new houses have been built by the Congested Districts Board, which will be soon finished to live in. No cases of infectious disease.

BALLINROBE; *Hollymount*.—Births and deaths about the average. Owing to the severity of the weather, with catarrhal and throat affections very prevalent amongst young children, there were only three successful vaccinations during the quarter. Influenza, with bronchial affections epidemic; especially severe in old people.

BELMULLET; *Bangor*.—Public health of district during quarter very good.

BELMULLET; *Binghamstown, W.*—District in a satisfactory state.

CASTLEBAR; *Balla*.—District healthy.

CASTLEBAR; *Castlebar, No. 1, W.*—Some cases of mild scarlet fever occurred; also some cases of an indefinable type of fever, neither typhus nor enteric, having an irregular course and temperature about 100° F., and lasting about 10 to 14 days.

CASTLEBAR; *Castlebar, No. 2.*—The severe weather prevalent during the greater part of the months of January, February, and March made parents and persons in charge of children unwilling to bring the latter to the dispensaries for vaccination; hence the small number of successful primary vaccinations during the quarter. The sanitary arrangements in the district leave very much to be desired.

CLAREMORRIS; *Ballyhaunis*.—Generally speaking, the health of the district has been good throughout the quarter. There were five cases of scarlet fever; two of those died in the Union Hospital; the other three are, I am told, convalescent there. Sanitation progressive. No cancer. Of the deaths registered, four were of persons over 85 and five over 90 years. The persistent neglect of arterial drainage is an abiding and serious menace to public health here.

CLAREMORRIS; *Claremorris, W.*—Measles has been prevalent during the quarter.

KILLALA; *Killala, W.*—Two cases of scarlet fever occurred in one family. It is not known how the infection was conveyed to the members of this family. There were five deaths from pulmonary tuberculosis during the quarter.

WESTPORT; *Achill*.—General health and sanitary state good. No epidemic present. Very few children presented for vaccination.

WESTPORT; *Ballycroy*.—A great number of cases of sore throat here (non diphtheritic) during quarter. Weather uncommonly fine. Bronchial ailments much less than usual.

WESTPORT; *Islandeady*.—The sanitary arrangements of the district are pretty good. At present there is a possibility of an epidemic of scarlatina. A few cases of typhoid fever have occurred, and vaccination has been at a low ebb.

WESTPORT; *Louisburgh*.—General sanitary condition of district good. Whooping-cough very prevalent during quarter. On this account vaccination has to be absolutely postponed. One case of diphtheria occurred during quarter.

WESTPORT; *Newport*.—Three deaths from tuberculosis. Sanitary condition of some of the houses in the town very bad. Two cases of scarlatina reported.

WESTPORT; *Westport, W.*—Of the 44 deaths registered, 29 were of persons 65 years or over, 27 70 years or over, 14 80 years or over, three 90 years or over, and one was 104 years.

Roscommon County.

ATHLONE; *Athlone, No. 2.*—Owing to the inclemency of the weather, the vaccinations are small.

ATHLONE; *Brideswell*.—The health of the district is very good, there being practically no sickness prevalent. Vaccinations are very backward owing to the severe weather of the past month.

ATHLONE; *Kiltoom*.—The typhoid fever case registered occurred in July last. Owing to the presence of whooping-cough, vaccination postponed until recently; however, children recovered or not suffering from the disease are getting vaccinated gradually. Otherwise the health and sanitary condition satisfactory. A large number of deaths, viz.—13 of persons over 65 years, were registered during the quarter.

BOYLE; *Boyle, No. 1, W.*—Bronchitis was prevalent among children and old people; but there was no epidemic during the past quarter.

BOYLE; *Keadew*.—Epidemic of pneumonia during this quarter.

CARRICK-ON-SHANNON; *Aughrim*.—The health of the district continues good.

CASTLEREAGH; *Ballaghaderreen*.—Owing to the season of the year, vaccination was not good.

CASTLEREAGH; *Frenchpark*.—There were two deaths from pulmonary tuberculosis. Of the 29 deaths, six were of persons over 80 years, and one death occurred at the age of 95.

CASTLEREAGH; *Loughglinn*.—There is a marked improvement in the houses of the people as regards sanitation and ventilation. The prevailing dampness is the cause of the great number of bronchial troubles, but is being much remedied by drainage scheme. There has been no death from cancer.

ROSCOMMON; *Athleague*.—A pure water supply for drinking purposes urgently required throughout the district.

ROSCOMMON; *Roscommon, W.*—Amongst the deaths is that of a man whose age was given as 104 years. I believe this to be quite correct. One death from whooping-cough.

STROKESTOWN; *Roosky*.—Two deaths, from tuberculous disease, one from scarlatina, and two from whooping-cough. The death of one man at the advanced age of 107 years was registered during the quarter. Sanitation progressive.

STROKESTOWN; *Strokestown, W.*—There was one death from diphtheria.

Sligo County.

BOYLE; *Gurteen*.—Several cases of influenza during past quarter. District healthy.

DROMORE, WEST; *Castleconor*.—The health of the village of Enniscrone is anything but good, owing to the want of a proper sewerage system, there being over seventy houses in the village; yet there is not a sewer of any kind. No vaccination, owing to cases of scarlatina in the district.

DROMORE, WEST; *Easky, W.*—Health of district good. A few cases of scarlatina occurred during quarter, but no death took place, as attack was of a mild form.

DROMORE, WEST; *Skreen*.—I cannot understand why the parents are not complying with the vaccination laws. The district is healthy, save the prevalence of influenza, notably gastric.

SLIGO; *Ballymote*.—There was one case of typhus and one of typhoid fever during the quarter. Influenza very prevalent. District otherwise healthy.

SLIGO; *Carney, No. 1*.—The sanitary arrangements in the district are fairly satisfactory. No vaccinations have been performed during present quarter, owing to severity of weather.

SLIGO; *Carney, No. 2*.—Health of district good.

SLIGO; *Riverstown*.—A very large number of cases of pneumonia, and one case of typhus fever. Otherwise district healthy.

TOBERCURRY; *Aclare*.—The sanitary condition of the district is still not good, but there is an improvement.

TOBERCURRY; *Coolaney*.—District healthy. Sanitation fairly good.

QUARTERLY RETURN OF THE MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE

PROVINCES, COUNTIES, POOR LAW UNIONS, OR SUPERINTENDENT REGISTRARS'
DISTRICTS, AND REGISTRARS' DISTRICTS IN IRELAND,

WITH

*Certain Detailed Information Relative to the Deaths in each Registrar's District ;
Persons Vaccinated, &c., &c., &c.*

Marriages:—JAN., FEB., MAR., 1911.

Births and Deaths:—APRIL., MAY., JUNE., 1911.

During the quarter ended 30th June last, there were registered in the 827 Registrars' Districts in Ireland 26,859 births—a number equal to an annual birth-rate of 24.6 in every 1,000 of the estimated population*—and 18,692 deaths, representing an annual rate of 17.1 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 14,650 persons emigrated.

In England and Wales last quarter, the birth-rate represented was 24.7 in every 1,000 of the estimated population, and the death-rate 13.1 per 1,000.

The birth-rate in Ireland for the quarter is 0.3 above the average rate for the corresponding quarter of the ten years 1901–1910, but 0.2 below the rate for the second quarter of 1910. The deaths are 1,826 below those registered in the corresponding quarter of 1910; the death-rate is 1.7 below the rate for that quarter, and 1.3 below the average for the second quarter of the ten years 1901–1910.

Compared with those for the corresponding quarter of 1910, the returns of pauperism furnished by the Local Government Board show a decrease of 3,480 in the average number of Workhouse inmates on Saturdays during the quarter, and a decrease of 15,134 in the average number of persons on out-door relief.

Compared with the averages for the second quarter of the ten years 1901–1910, the number of Workhouse inmates shows a decrease of 4,998, and the number of persons on out-door relief shows a decrease of 17,546, the total under both heads being 22.5 per cent. under the average for the second quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 0.6 per cent.

The annual marriage-rate (6.6 per 1,000 of the population) represented by the marriages registered during the first quarter of 1911 is 0.4 above the average rate for the corresponding quarter of the preceding ten years.

* See page 140.

TABLE I.—Showing for each PROVINCE and COUNTY in Ireland, the Annual Rate per 1,000 of the population,* represented by the number of MARRIAGES registered during the Quarter ended 31st March,, 1911, and by the BIRTHS and DEATHS registered in the Quarter ended 30th June, 1911.

* The rates for the total of Ireland and for the county boroughs of Dublin and Belfast are calculated on the estimated population in the middle of the year, Census 1911 (unrevised figures); those for Antrim and Down according to the Census of 1901, and those for the provinces and remaining counties on the population according to the Census of 1911 (unrevised figures). See note (*) page 95.

† Exclusive of Belfast Co. Borough.

MARRIAGES.

The Marriages (7,234) registered in Ireland during the first quarter of 1911 are equivalent to an annual rate of 6.6 per 1,000 of the estimated population, being 1.1 above the rate for the corresponding quarter of 1910, and also 0.4 above the average rate for the first quarter of the ten years 1901-1910. Of the total number of marriages, 5,934 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,300 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 7.3 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 4.6 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0.7 above, but that under the latter 0.4 below the average rate for the corresponding quarter of the previous ten years.

It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages is celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by QUARTERLY PERIODS the MARRIAGES registered in Ireland in each of the ten years 1901–1910, and the average number for that period; also the number registered in the first quarter of 1911.

BIRTHS.

The number of births registered during the quarter ended 30th June last was 26,859—13,732 boys and 13,127 girls—being equal to an annual ratio of 1 in every 40.7, or 24.6 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years, 1901–10, was 26,742, equivalent to an annual rate of 24.3 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 25.1 per 1,000 of the population according to the Census of 1911; Munster, 24.2; Ulster, 25.1; and Connaught, 22.4.

The highest county or county borough birth-rate* is 33.6 for Dublin county borough, and the lowest 18.1 for Clare county. Of the intermediate rates the highest five are—Belfast county borough, 30.0; Limerick county and county borough, 26.5; Kerry, 26.3; Kildare, 25.4; and Wexford, 25.1. The lowest five are—Dublin county, 18.9; Roscommon, 19.5; Meath, 19.7; Sligo, 19.9; and Longford, 20.3.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 30th June last was 18,692—9,352 males and 9,340 females—affording an annual ratio of 1 in every 58.5, or 17.1 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years, 1901–10, was 18.4 per 1,000.

The death-rate in Leinster was 18.2 per 1,000 of the population according to the Census of 1911; in Munster, 16.2; in Ulster, 17.5; and in Connaught, 15.3.

The county or county borough death-rates* range from 12.2 in Leitrim to 22.1 in Dublin county borough. Between these rates the lowest five are—Kerry, 13.4; Roscommon, 14.2; King's County, 14.4; Galway, 15.0; and Tipperary, N.R. 15.4; and the highest five are—Tyrone, 21.2; Westmeath, 19.6; Fermanagh, 19.4; Monaghan, 18.8; and Londonderry county and county borough, 18.3.

* See note (*) on page 78.

TABLE III.—Showing by QUARTERLY PERIODS the number of BIRTHS and DEATHS registered in Ireland in each of the ten years 1901–1910, and the average number for that period ; also the number registered during the first and second quarters of the year 1911 :—

AGES.—Of the 18,692 deaths registered last quarter, 2,053, or 11·0 per cent., were of infants under one year of age ; and 7,904, or 42·3 per cent., were of persons aged 65 years and upwards. The deaths of infants under one year old are equal to 76·5 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under one year old equalled 12·2 per cent. of the total deaths registered therein ; in Munster, 11·3 per cent. ; in Ulster, 10·7 per cent. ; and in Connaught, 8·4 per cent. The deaths of persons 65 years old and upwards registered during the quarter in Leinster are equal to 35·6 per cent. ; in Munster, to 43·8 per cent. ; in Ulster, to 42·3 per cent. ; and in Connaught, to 54·5 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

DISEASES.—The total number of deaths from the principal epidemic diseases* is 779, and is equivalent to an annual rate of 0·71 per 1,000 living.

The following tabular statement shows the mortality from some of the principal epidemic diseases, as registered during the June quarter of 1911, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years, 1906–1910.

Name of Disease.	Number of Deaths in June quarter, 1911.	Average number of Deaths in June quarter of the 5 years, 1906–1910.
Enteric Fever,	52	72
Typhus,	15	19
Small-pox,	—	—
Measles,	153	200
Scarlet Fever,	61	26
Whooping-cough,	197	302
Diphtheria,	100	70

* See note (†) on page 85.

ENTERIC FEVER.—The deaths from enteric fever were 52 in number and represent an annual rate of 0·05 per 1,000 of the population of Ireland estimated to the middle of the year. The average number of deaths from enteric fever in the corresponding quarter of the 5 years 1906—1910 was 72, and the number in each of the three quarterly periods preceding the quarter under review was 60, 85, and 86. Of the 52 deaths for the period under notice, 7 belonged to the union of South Dublin, 5 to North Dublin, 4 were registered in the Superintendent Registrar's district of Tuam, and 3 in each of the unions of Dungannon Enniskillen, and Lurgan.

TYPHUS.—The deaths from typhus which were 11, 21, and 14 in the three quarters preceding, numbered 15 in the period under notice, and are 4 below the average for the corresponding period of the years 1906—10. The deaths occurred in the following unions—In each of Cork and Skibbereen, 3 deaths; in Fermoy, 2 deaths; and in each of the unions of Clonakilty, Clonmel, Dublin South, Gort, Lisburn, Millford, and Oughterard, one death.

SMALL-POX.—The returns of the Registrars showed that no mortality from this disease was recorded in Ireland during the period under notice.

MEASLES.—The deaths from measles, 153 in number, are below the average (200) for the corresponding period of the 5 years, 1906—10, the respective numbers in each of the three quarters preceding that under notice being 189, 120, and 137, respectively. The 153 deaths are equivalent to a rate of 0·14 per 1,000 of the estimated population. Of the total, 73 belonged to Dublin County borough, 13 to Dublin county, 11 to Kildare county, and 12 to Donegal county. In Clane and Timahoe, North, 5 deaths from measles were registered; in Newbridge, 6 deaths; and in Ballyshannon, 6 deaths.

SCARLET FEVER.—The deaths from scarlet fever in the period under notice numbered 61, and were 35 above the average (26) for the preceding 5 years, 1906—10. The mortality in the September, December, and March quarters preceding was 38, 64, and 78 deaths respectively. Of the 61 deaths, 13 appertained to Dublin county borough, and in the following unions the deaths from scarlet fever registered were:—in each of Dromore West and Lisburn, 6 deaths; in Larne, 5 deaths; in Kilrush, 3 deaths; and in each of Ballinrobe, Clogher, Irvinestown, and Lurgan, 2 deaths.

WHOOPIING-COUGH.—The mortality from whooping-cough, 197 deaths, is below the average (302) for the corresponding period of the 5 years, 1906—10, and is equivalent to an annual rate of 0·18 per 1,000 of the estimated population. In the preceding three quarters the deaths numbered 199, 190, and 238 respectively. Of the total deaths, 29 belonged to Dublin county borough, 17 to Cork county and county borough, and 32 to Londonderry county and county borough.

DIPHTHERIA.—During the period under notice, 100 deaths from diphtheria, equivalent to an annual rate of 0·09 per 1,000, were registered. This number is in excess of the average (70) for the corresponding period of the 5 years, 1906—10. In the three preceding quarters the deaths from diphtheria numbered 73, 88, and 100 respectively. Of the deaths, registered, 28 appertained to Dublin county borough, 6 to the registrar's district of Dundalk, 4 to Portaferry district in the union of Downpatrick, and 4 were registered in Ballylesson district in the union of Lisburn.

DIARRHOEAL DISEASES.—Diarrhoea and *enteritis* of children under 2 years of age caused 168 deaths, there were 28 deaths from diarrhoea of persons aged above 2 years and there were 5 deaths from dysentery. In Dublin county borough the deaths of 45 children under 2 years of age were returned as having been caused by diarrhoea or *enteritis*, and in Belfast county borough the number of such deaths was 29.

TUBERCULOUS DISEASE.—The number of deaths returned by the Registrars as having been caused by tuberculous disease was 2,675 and is equivalent to a rate of 2·45 of the population estimated to the middle of the year.

The following notes have been selected from those kindly furnished by the Registrars as affording special information regarding tuberculous disease, and the sanitation of the country:—

Balrothery; Lusk.—“The health of the district has been remarkably good. Of the seven deaths registered, five were 70, 79, 81, 85, and 91 years respectively. There has not been a recent case of tuberculosis of the lungs for the past two years, and as far as I know

there is not a single case of such either chronic or otherwise. Such a state of things is phenomenal, and I attribute this most satisfactory statement to the better housing of the poor as provided by the District Council, in the way of Labourers' Cottages, improved drainage, &c., and the people being alive to a higher sense of cleanliness and ventilation, and to hygienic laws in general."

Birr; Birr.—"During the past half-year there has not been any case of infectious disease. Cases of tuberculosis are rare in this district at present."

Trim; Summerhill.—"There were five deaths from tuberculosis during the quarter. If compulsory segregation could be practised, in a very short time tuberculosis would be returned as '0' as regularly as typhus."

Ballymahon; Ballymore.—"Sanitary condition of the district good. One death occurred from pulmonary tuberculosis. I have another case of pulmonary tuberculosis under treatment which came from another district, and another, a young man, who contracted the disease from a brother who returned from the United States, North America."

Athy; Stradbally.—"The people generally are more alive to the necessity and importance of good hygienic observances. There are only two deaths from tuberculosis registered during the quarter."

Youghal; Clashmore.—"The one death from tuberculous disease was of a girl of 21 years, who returned from America ten days previously."

Bantry; Durrus and Kilcrohane.—"The case of death from tuberculosis registered was contracted in America."

Dunmanway; Coolmountain.—"I am pleased to state that the labourers, with the exception of perhaps half a dozen, keep their cottages clean and tidy, and the houses are a credit to them."

Listowel; Ballylongford.—"Cases of consumption on the decreasing side."

Ballymoney; Castlequarter.—"I am attending five cases of pulmonary tuberculosis, four of which have returned here from U. S. A."

Lisburn; Knockadona.—"Two of the tuberculosis cases originated outside the district."

Cavan; Killashandra.—"The Branch of the Women's National Health Association and Guild of Girls' Health Association are doing useful and good work in the district."

Cootehill; Tullyvin.—"District healthy. One of the two cases of tuberculous disease was contracted in London."

Irvinestown; Irvinestown.—"Three cases of phthisis pulmonalis registered. I am sorry to say this disease seems to be on the increase in this district, and I find it extremely difficult to have any ordinary precautions to prevent spread of disease carried out in the houses of the patients. Closed windows and doors and sputum scattered over floors, clothes, &c., being the usual thing."

Clifden; Roundstone, No. 2.—"One death from phthisis. Two brothers of deceased died from same disease. The number of deaths due to this disease in this district is decreasing. There has been a marked improvement in the sanitation of dwelling houses in this district during the last few years, especially since the Congested Districts Board commenced to make grants towards the improvement of dwellings."

Gort; Ardrahan.—"Have had two cases of tuberculosis this quarter in two children—sisters; one, tuberculosis of lungs; second, glandular, in which I traced the source of infection to a milch cow with sore udder, sore teat. Father and mother of children healthy, home very clean and sanitary. No case of phthisis near. Children too young to go to school, living in a country house in a breezy upland, yard free from dung or cesspools."

Mount Bellew ; Killaroran.—“ The case of tuberculosis returned from America where she contracted the disease.”

Claremorris ; Ballyhaunis.—“ Health of district good. Sanitation progressive. Dwelling houses vastly improved in regard of cleanliness, light, and air.”

Claremorris ; Claremorris.—“ There is a constant improvement going on in the district so far as the sanitary condition of the farmers' houses is concerned. The Congested Districts Board have done great service in this respect.”

Castlereagh ; Loughglinn.—“ The health of the district is improving. No doubt it is due to the system of arterial drainage being carried out, and to the large number of new dwellings, and the continued improvement in the old ones.”

CANCER.—Under this heading 779 deaths were returned as having been registered during the quarter. This number corresponds to an annual death-rate of 0·71 per 1,000 of the estimated population, the rate for the three preceding quarters being 0·73, 0·83 and 0·80 respectively.

VIOLENCE.—The deaths returned as having been caused by violence, accidental, homicidal, or suicidal, numbered 221.

The Registrars, in their Notes, report the presence of the following diseases:—Measles in 36 districts, scarlet fever in 33, whooping-cough in 37, diphtheria in 19, fever in 20—typhus in 5, and enteric in 15, influenza in 14, cerebro-spinal fever in 4, mumps in 2, and chicken-pox in one district. [See Appendix to this Report commencing on page 141.]

INQUESTS.—There were 398 inquests reported to the Registrars during the quarter ; this number being equal to 1 in every 47 of the total deaths registered.

In Leinster there was 1 inquest to every 46 deaths registered, in Munster 1 to 55, in Ulster 1 to 38, and in Connaught 1 to 97.

DEATHS IN PUBLIC INSTITUTIONS.—Of the 18,692 deaths registered, 3,783, or 20·2 per cent., occurred in public institutions. In Leinster the percentage was 28·5, in Munster 22·8, in Ulster 15·1, and in Connaught 12·2.

UNCERTIFIED DEATHS.—According to the returns, 4,693 of the 18,692 deaths which were registered during the quarter were uncertified, being more than 25 per cent. of the total. In Leinster the percentage was 17, in Munster 29, in Ulster 20, and in Connaught the uncertified deaths were 51 per cent. of the total deaths registered in the province.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 30th June, 1911, and in each of the eight quarters immediately preceding ; with the ratio of these deaths to the deaths from all causes and to the population :—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.								Total.	Percentage of Total Deaths.	Number in every 100,000 of the Population.
		Enteric Fever.	Typhus.	Small-pox.	Measles.	Scarlet Fever.	Whooping-cough.	Diphtheria.	Diarrhœal Diseases.

VACCINATION.

According to the Returns of Primary Vaccinations received for the second quarter of the year 1911, there were 25,832 persons successfully vaccinated.

EMIGRATION.

The Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, show that the number of emigrants who left Ireland during the quarter ended 30th June last was 14,650 (8,225 males and 6,425 females), being 436 less than in the corresponding quarter of the year 1910, and 764 below the average number for the second quarter of the ten years 1901-1910.

TABLE VI.—EMIGRATION from IRELAND during the months of April, May, and June in 1910 and 1911 :—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1910.	1911.	In-crease.	De-crease.	1910.	1911.	In-crease.	De-crease.	1910.	1911.	In-crease.	De-crease.

* Including 11,286 emigrants to the United States of America, viz. :—6,135 in the month of April, 3,780 in May, and 1,371 in June. Of 10,452 steerage passengers, 3,701 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was 6*d.*, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the second quarter of the year 1910 the average price was 6*d.*, and in the corresponding quarter of 1901 it was 5½*d.*

The average price of oatmeal (1st quality) in Dublin for the quarter was 14*s.* per cwt. For the corresponding quarter of the year 1910 the average price was 14*s.* 3*d.*, and for the second quarter of 1901 the average price was 13*s.* 6*d.* per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 4*s.* 3*d.* to 5*s.* In the second quarter of 1910 the average prices were 3*s.* 6*d.* to 4*s.* 1*d.*, and the prices for the corresponding quarter of 1901 were 3*s.* 6*d.* to 4*s.* 5*d.*

The average prices of beef at the Dublin Cattle Market during the quarter were from 58*s.* 6*d.* to 62*s.* 6*d.* per cwt. In the corresponding quarter of 1910 the average prices were from 59*s.* to 67*s.*, and in the second quarter of 1901 they were from 53*s.* to 58*s.* 6*d.*

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter ranged from 22*s.* to 21*s.* per ton nett.

The highest price of Consols at the Dublin Stock Exchange for the quarter was 82 and the lowest 79½.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland during the quarter ended 30th June, was 3 per cent.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the second quarter of 1911 was 38,026, or 3,480 below the average for the corresponding period in 1910.

The average weekly number of persons receiving out-door relief during the quarter was 39,600 being 15,134 below the average for the second quarter of 1910.

Of the persons receiving in-door relief during the second quarter of 1911, an average number of 1,640 in each week was located in asylums for the blind and the deaf and dumb, and in extern hospitals ; in the corresponding quarter of 1910 the average weekly number was 1,632.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the SECOND QUARTER of the year 1911, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week ; also the AVERAGE PRICES OF PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

PERIOD.	Average PRICES OF PROVISIONS.								PAUPERISM.			
									No. OF PERSONS RELIEVED.			
	BREAD (4lb. Loaf.)		OATMEAL (Corn Exchange), per Cwt. 1st quality.	POTATOES (at Potato Market) per Cwt.		BEEF (at the Dublin Cattle Market), per Cwt.		In-door.	Out-door.			Total Outdoor.

(a) Messrs. Bolands, Limited.

(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4-lb. loaf delivered ; the price in Messrs Johnston, Mooney, and O'Brien's shops, exclusive of delivery was ½d. per 4-lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the " Dublin Gazette " ; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the second

* Latitude 53° 21' 48.25" north ; longitude 6° 20' 59.15" west. Height above the sea 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

quarter of the years 1906 to 1911, respectively, furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 90).

The mean height of the barometer during the second quarter of 1911 was 29.804 inches, being 0.027 below the average for the corresponding quarter of the five years 1906-1910; the highest reading (30.382 inches) was on the 6th June at 9 A.M., wind N.E., and the lowest (28.689 inches) on the 9th April, at 9 A.M., wind E.N.E.

The mean temperature of the air during the quarter was 51.2° , being 1.7° above the average for the second quarter of the 5 years 1906-1910.

The maximum temperature of the air during the quarter was 72.1° and the minimum 25.9° .

Rain or snow fell on 42 days during the quarter. The rain-fall measured 3.988 inches, being 3.183 inches below the average for the second quarter of the five years 1906-1910. The greatest monthly rainfall was in June, when 1.541 inches were registered.

The wind blew on 19 days from W., on 18 days from S.W., on 16 days from N.E., on 10 days from E., on 4 days from N., on 4 days from N.W., on 2 days from S.E., on one day from S., and the air was calm on 17 days at 9 A.M.

April.—The mean height of the barometer during this month was 29.807 inches; the highest reading (30.328 inches) was on the 9th at 9 A.M., wind E.N.E.; and the lowest (28.689 inches) on the 19th, at 9 A.M., wind S. The mean temperature of the air was 46.1° , the maximum registered was 62.3° , and the minimum 25.9° . The 22nd was the warmest day, and the 12th the coldest night. The mean of the dry bulb was 45.5° , and of the wet bulb, 43.9° . The maximum heat in sun was 92.0° , and the minimum on the grass 22.0° . The minimum on the grass was below 32° on 8 nights. The total amount of sunshine recorded was 160.0 hours, the greatest daily amount being 12.4 hours on the 13th. The maximum ozone was 0.7, the minimum 0.0, and the mean 0.6. Rain or snow fell on 19 days. The rain-fall measured 1.268 inches; the greatest amount in 24 hours was 0.275 inch on the 25th.

May.—The mean height of the barometer during this month was 29.798 inches; the highest reading (30.132 inches) was on the 28th at 9 A.M., wind E.N.E., and the lowest (29.158 inches) on the 3rd, at 9 A.M., wind S.W. The mean temperature of the air was 52.2° , the maximum registered was 68.6° , and the minimum 31.0° . The 24th was the warmest day, and the 21st the coldest night. The mean of the dry bulb was 52.4° , and of the wet bulb 51.0° . The minimum on the grass was 27.7° on the 21st which was the only night on which it was below 32° . The total amount of sunshine recorded was 235.3 hours, the greatest daily amount being 14.2 hours on the 27th and 29th. The maximum ozone was 0.7, the minimum 0.1, and the mean 0.5. Rain fell on 11 days. The rain-fall measured 1.179 inches; the greatest amount in 24 hours was 0.425 inch on the 3rd.

June.—The mean height of the barometer during this month was 29.807 inches, the highest reading (30.382 inches) was on the 6th at 9 A.M., wind N.E., and the lowest (29.246 inches) on the 18th, at 9 A.M., wind W.S.W. The mean temperature of the air was 55.4° , the maximum registered was 72.1° , and the minimum 31.5° . The 2nd was the warmest day, and the 15th the coldest night. The mean of the dry bulb was 56.2° , and of the wet bulb 54.4° . The minimum on the grass was 27.6° . The minimum on the grass was below 32° on 2 nights. The total amount of sunshine recorded was 194.2 hours, the greatest daily amount being 14.3 hours on the 7th. The maximum ozone was 0.6, the minimum 0.1, and the mean 0.5. Rain fell on 12 days. The rain-fall measured 1.541 inches; the greatest amount in 24 hours was 0.280 inch on the 16th.

† Owing to repairs to Wind Gauge, no record of Wind was taken for the period 9th to 18th, and 28th and 30th of April.
‡ Solar Thermometer out of order.

TABLE OF METEOROLOGICAL DATA FOR IRELAND.

Prepared in the Meteorological Office under the direction of W. N. Shaw, Esq., LL.D., Sc.D., F.R.S.

In compiling the following Table (pp. 92 and 93), the stations have been grouped into two Districts, namely, 1. Ireland, North; 2. Ireland, South, the former being represented by six stations and the latter by seven.

The stations selected, with the names of the Observers, are as follows:—

LIST OF STATIONS AND OBSERVERS.

STATION.	OBSERVER.
IRELAND NORTH:—	
Malin Head,	Meteorological Office.
Blacksod Point	Do.
Markree Castle,	J. R. Armstrong, for Captain Cooper.
Donaghadee,	Meteorological Office.
Armagh, The Observatory, ..	J. L. E. Dreyer, PH.D.
Belfast, Queen's College, ..	John Wylie, B.A.
IRELAND, SOUTH:—	
Dublin (City),	Sir John W. Moore, M.D.
Waterford,	J. N. White, Esq.
Birr Castle,	O. Boeddicker, PH.D., for the Earl of Rosse.
Killarney,	E. W. Griffin, M.D.
Valencia,	Meteorological Office.
Roche's Point,	Do.
Limerick, Mungret College, ..	Rev. W. O'Leary, S.J.

NOTES ON THE STATISTICAL TABLES.

Hours of Observation.—The hours of observation are indicated by the type in which the names of the stations are printed. CAPITALS, normal climatological stations, 9 a.m. and 9 p.m.; *ITALIC CAPITALS*, telegraphic reporting normal climatological stations, 7 a.m., 1 p.m., 9 p.m.; Roman, telegraphic reporting stations, 7 a.m., 1 p.m., 6 p.m.; *Italics*, auxiliary climatological stations, 9 a.m. only. At Valencia and at Limerick an additional observation was taken at 3 p.m. The after noon observations are used in preparing the wind summaries and in computing the number of days of "overcast" or "clear sky." At telegraphic reporting stations (italic capitals or Roman type) the results given under "hygrometer" and "cloud" are based on the morning observations only.

Barometer.—The correction for latitude has not been applied. The values are for station level. They are the means of readings at 9 a.m. and 9 p.m.; or 7 a.m., 1 p.m., 9 p.m.; or 7 a.m., and 6 p.m., as the case may be.

Hygrometer.—At certain stations the vapour pressure and relative humidity are the results obtained from the daily values. These are entered in italic type. At other stations the calculations are made from the monthly means of the dry and wet bulb readings.

Rainfall.—The amounts are for the 24 hours commencing at the time of morning observation.

Weather Phenomena.—The number of days of Rain, Snow, Hail, Thunderstorm, Fog, and Gale, are counted irrespective of the hours at which the phenomena occur. Except in the case of rainfall (see above) the day is the civil day. A day is reckoned as a day of "clear sky," if the average of the estimates of the "amount of cloud" at the hours of observation is less than 2, and as an "overcast" day if the average is greater than 8.

Wind Summaries.—The results given under wind direction, and the number of observations of calms and of fresh or strong wind, are based on the observations at fixed hours. At Valencia and Armagh the wind observations are based on the records of a standard Robinson anemometer (factor 2.2). Velocities of between 13 and 38 miles in the hour have been entered as "fresh or strong winds," velocities of 39 miles in the hour, or above, as gales.

Averages.—The averages used for stations are—Temperature and Rainfall for the 35 years 1871–1905; Bright Sunshine for the 25 years 1881–1905.

District Values.—The district values of temperature, rainfall, and sunshine are computed from the data for the stations included in the Weekly Weather Report of the Meteorological Office. Only a selection of these stations is included in this Report. The average values with which the current district values are compared are for the 25 years, 1881–1905. The district values for "amount of cloud" and for the extremes of temperature and the largest rainfall in a day, are taken from the Monthly Weather Report of the Meteorological Office.

TABLE IX.—Meteorological Table.

STATIONS.	Height of Barometer Cistern above M.S.L.	Baro- meter.	Air Temperature.								Hygrometer.				Earth Temperature.		Bright Sunshine		
			Mean of		Mean of A and B.	Difference from Normal.	Absolute Maximum and Minimum.			Mean of Observations at 9 a.m. and 9 p.m. or at 7 a.m.				At 1 foot depth.	At 4 feet depth.	Total Observed.	Difference from Normal	Per cent. of Possible	
			Maximum.	Minimum.			Maximum.	Day of Month.	Minimum.	Day of Month.	Dry Bulb.	Depression of Wet Bulb.	Vapour Pressure.						Humidity.

(a) See note (*), page 50.
* The Registrars' Districts (827 in number) are Sub-divisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispensary Districts of the same names formed under the Medical Charities Act. The letter *W* denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

under the Medical Charities Act. The letter W denotes that the Registrar's Districts marked thus (†) on pages 105 and 106 are extracted from the Weekly Returns made by the Registrars, and relate to the 13 weeks ending from 2nd April, 1911, to 1st July, 1911. With the exception of 116 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions^a in these districts have been assigned to the respective districts comprised in the "Dublin Registration Area" from which the deceased were admitted.

* Exclusive of 15 deaths in the Rathdown Union Workhouse of persons admitted from Blackrock and Kingstown, to which Urban Districts they have been assigned.

WILLIAM J. THOMPSON,
Registrar-General.

GENERAL REGISTER OFFICE,
(CHARLEMONT HOUSE,
DUBLIN, 4th August, 1911.

POPULATION OF IRELAND (including Army, Navy, and Merchant Seamen on shore and in port) *estimated to the middle of each of the Seventy-five Years 1837 to 1911.*

Middle of the years.	Estimated POPULATION.			Middle of the years.	Estimated POPULATION.			Middle of the years.	Estimated POPULATION.

NOTE.—This table has been constructed for the years 1837 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872–1911.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872–81, 1882–91, 1892–1901, and 1902–1911, to allow for the discrepancy between the number thus arrived at for 1881, 1891, 1901, and 1911 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Rathvilly*.—District healthy. There were seven deaths of persons aged 65 years and upwards, viz.:—69, 73, 74, 76, 80, 82, 103. A sudden death registered. No previous medical attendance.

CARLOW; *Bagenalstown*.—The district is fairly healthy.

CARLOW; *Carlow, No. 1, W*.—One dog, supposed to be suffering from rabies, was destroyed.

CARLOW; *Fennagh and Myshall*.—The one case of tuberculosis (general) occurred in a child of nine months. The mother died of acute pneumonic phthisis when the child was two months' old.

CARLOW; *Leighlinbridge*.—Health of district good. No rain fell here from 14th May to 14th June. Summer colds prevalent. No deaths from tuberculosis.

CARLOW; *Tullow*.—This district has been in a very healthy state for the past quarter.

Dublin County.

BALROTHERY; *Kilsallaghan*.—An epidemic of whooping cough prevailed during the months of April and May, otherwise the health of district has been exceptionally healthy.

BALROTHERY; *Lusk*.—The health of the district has been remarkably good. Of the seven deaths registered, five were 70, 79, 81, 85, and 91 years respectively. There has not been a recent case of tuberculosis of the lungs for the past two years, and, as far as I know, there is not a single case of such, either chronic or otherwise. Such a state of things is phenomenal, and I attribute this most satisfactory statement to the better housing of the poor, as provided by the District Council in the way of labourers' cottages, improved drainage, etc., and the people being alive to a higher sense of cleanliness and ventilation, and to hygienic laws in general.

CELBRIDGE; *Rathcoole*.—District healthy.

DUBLIN, SOUTH; *Crumlin*.—There have been a few cases of measles in the district, which otherwise is in a healthy condition.

RATHDOWN; *Blackrock and Stillorgan No. 2*.—District healthy during quarter.

Dublin County Borough.

DUBLIN, NORTH; *North City, No. 1, West*.—District generally healthy.

DUBLIN, NORTH; *North City, No. 2*.—The number of successful vaccinations is about the average for quarter ending June. The health of the district is good, and practically free from any epidemic disease. Insanitary houses are being taken down or put in proper repair.

DUBLIN, SOUTH; *New Kilmainham*.—District fairly healthy.

Kildare County.

ATHY; *Castledermot*.—District healthy during quarter.

CELBRIDGE; *Celbridge W*.—This district very healthy.

CELBRIDGE; *Maynooth*.—Two cases of typhoid during the quarter.

EDENDERRY; *Carbury*.—Vaccination delayed owing to influenza and pneumonia being prevalent. Some cases of whooping-cough.

NAAS; *Ballymore Eustace*.—The general health of the district is good. One death from tubercular disease. Many deaths over 60 years.

NAAS; *Naas and Carragh, W*.—No prevailing disease during the past quarter.

NAAS; *Newbridge*.—District healthy.

NAAS; *Robertstown and Kilmeage*.—The sanitary condition of district is good.

Kilkenny County.

CARRICK-ON-SUIR; *Pilltown*.—Health of district in excellent condition. Sanitation good.

CASTLECOMER; *Ballyragget*.—The district is in a very healthy condition just at present.

CASTLECOMER; *Castlecomer, W.*—Deaths below the average this quarter.

KILKENNY; *Freshford*.—There was one fatal and several non-fatal cases of "infectious jaundice" in the Rathealy portion of the district. In and about Tullaroan it was epidemic.

KILKENNY; *Gowran*.—Sanitary arrangements in the district are good. Whooping cough was prevalent.

KILKENNY; *Tiscoffin*.—Health of district good.

KILKENNY; *Tullaroan*.—District healthy.

NEW ROSS; *Dysartmoon*.—District healthy.

THOMASTOWN; *Inistioge*.—Health of district is fairly satisfactory.

THOMASTOWN; *Knocktopher*.—Sanitary conditions of district very satisfactory. Vaccination very well attended to.

URLINGFORD; *Balleen*.—Vaccination rather backward this quarter.

URLINGFORD; *Urlingford, W.*—General health of the district good. No epidemics.

King's County.

BIRR; *Banagher*.—The district very healthy.

BIRR; *Birr, W.*—During the past half year there has not been any case of infectious disease. Cases of tuberculosis are rare in this district at present.

BIRR; *Frankford*.—Improvement badly needed in some of the dwellings.

BIRR; *Kinnitty*.—Health of district good. Sanitation fair, water supply being looked after in Longford and Cadamstown.

MOUNTMELICK; *Clonygowan, No. 2*.—Many cases of measles of a mild character. No fatal case. I believe the disease will be epidemic. All precautions possible taken.

ROSCREA; *Roscrea, No. 2*.—Several cases of whooping-cough during the quarter; otherwise district healthy. One death from tuberculosis, a child aged 7 years, and one from cancer, a man aged 74 years. Four of the five deaths registered were over 70 years.

ROSCREA; *Shinrone*.—A few cases of scarlatina occurred during quarter, with very bad throats. Four cases of pulmonary tuberculosis at present under treatment.

TULLAMORE; *Clara*.—The sanitary arrangements are fairly good.

TULLAMORE; *Philipstown*.—District healthy; no cause of complaints.

TULLAMORE; *Tullamore, W.*—District healthy.

Longford County.

BALLYMAHON; *Abbeyshrule*.—District healthy. Of the sixteen deaths registered, thirteen were aged from 69 to 84 years.

BALLYMAHON; *Ballymahon, W.*—The sanitary arrangements in the district are satisfactory.

GRANARD; *Ballinalee*.—The district is in fair sanitary condition and free from contagious disease.

GRANARD; *Granard, W.*—The district is in fair sanitary condition, and free from contagion.

GRANARD; *Scrabby, No. 2*.—Health of district fairly good.

LONGFORD; *Killashee*.—Vaccination had to be postponed owing to an outbreak of pertussis in Clondra.

Louth County.

ARDEE; *Castlebellingham*.—Eight cases of scarlatina.

ARDEE; *Collon, No. 1*.—District healthy.

ARDEE; *Dunleer*.—District healthy.

DROGHEDA; *Drogheda, No. 2*.—Sanitary condition of district fairly satisfactory.

DROGHEDA; *Termonfeckin*.—District healthy.

DUNDALK; *Barronstown*.—Diphtheria which prevailed for past six months has disappeared, and the district is now in a healthy state.

DUNDALK; *Dromiskin*.—Epidemic of infective jaundice confined to one townland, attacking about twelve children and two adults.

DUNDALK; *Dundalk, W.*—An epidemic of diphtheria prevailed during the quarter. The town and district, generally speaking, are in a good sanitary condition, and improvements are being carried out by the sanitary authorities.

Meath County.

ARDEE; *Collon, No. 2*.—District remarkably free from all diseases during quarter.

ARDEE; *Drumcondra*.—District free from zymotic disease.

DROGHEDA; *St. Mary's*.—The sanitary state of district is good.

DROGHEDA; *Stamullen*.—Vaccination postponed owing to the prevalence of measles and whooping-cough. One death from cancer.

DUNSHAUGHLIN; *Killeen*.—Sanitary condition of district satisfactory. Tuberculosis very prevalent. Case of enteric fever contracted in England.

DUNSHAUGHLIN; *Katoath, W.*—The district is in good sanitary condition.

KELLS; *Nobber*.—Health of district very satisfactory. Fine longevity, average age of seven deaths of the ten recorded being 73½ years. Vaccination well observed.

OLDCASTLE; *Oldcastle, W.*—The district continues in a satisfactory condition.

TRIM; *Summerhill*.—There were five deaths from tuberculosis during the quarter. If compulsory segregation could be practised, in a very short time tuberculosis would be returned as "0" as regularly as typhus.

Queen's County.

ABBEYLEIX; *Rathdowney*.—The sanitary arrangements in the district are good.

ATHY; Stradbally.—The sanitary condition of the district is now very fair. The people generally are more alive to the necessity and importance of good hygienic observances. There are only two deaths from tuberculosis registered during the quarter, and no death from epidemic or zymotic disease.

MOUNTMELICK; Clonaslee.—The sanitary arrangements in my district are good, none of the diseases mentioned in the abstracts being present except one.

MOUNTMELICK; Clonygowan, No. 1.—There have been many cases of measles. I believe there will be an epidemic of this disease—very mild character. No fatal case. All possible precautions taken.

MOUNTMELICK; Mountrath.—District healthy.

MOUNTMELICK; Mountmellick, W.—The sanitary arrangements of the district are in good condition.

ROSCREA; Borris-in-Ossory.—There has been a good deal of sickness in this district during the past quarter, not infectious, excepting one case of diphtheria, from which the patient died. Owing to precautions taken by the doctor the disease did not spread.

Westmeath County.

BALLYMAHON; Ballymore.—Sanitary condition of the district good. One death occurred from pulmonary tuberculosis. There is another case of pulmonary tuberculosis under treatment which came from another district, and another, a young man who contracted the disease from a brother who returned from the United States, North America.

MULLINGAR; Ballynacarrigy.—Excluding deaths of persons aged 65 and upwards, the proportion of deaths from carcinoma and tuberculosis is very high, and between them they account for five of the deaths certified in this quarter.

MULLINGAR; Castletown Geoghegan.—Sanitary condition satisfactory. Of the cases uncertified, where no medical man attended, four died of senile decay, and one child from delicacy from birth.

MULLINGAR; Milltown.—Child-birth mortality was exceptionally high during last quarter. In one case, mother and child were lost; in two cases, the child only, and in another case the mother only. There were two deaths from cancer, and one death from tubercular ulcer and meningitis. The quarter having been hot and dry, vaccinations not up to the mark. An alarming number of young men and women emigrated to America in the first half of the quarter. Certain union cottages, owing to neglect, were reported to the sanitary authority, and with satisfactory results. Health of district good.

MULLINGAR; Mullingar, W.—There were some cases of scarlatina, measles, and diphtheria. Sanitary arrangements fairly good.

TULLAMORE; Kilbeggan.—Sanitary arrangements good; all the necessary improvements duly carried out.

Wexford County.

ENNISCORTHY; Killann.—Measles prevalent.

GOREY; Camolin.—Owing to large number of infants and children in this district unvaccinated, an outbreak of small-pox is not improbable in the near future.

NEW ROSS; Fethard, No. 1.—Sanitary condition of the district fairly satisfactory. A mild epidemic of scarlet fever occurred during the quarter. Of the deaths registered, one was a man 109 years of age, who, up to the last, retained all his faculties, and even walked a distance of a quarter of a mile the day before he died. He was never attended by a doctor during his lifetime.

NEW ROSS; Fethard, No. 2.—District healthy. Vaccination defaulters numerous.

WEXFORD; Bannow.—There is a tendency to object to vaccination owing to an anti-vaccination campaign started in the north of the county.

WEXFORD; Broadway.—Vaccination very backward, partly owing to whooping-cough. Five deaths registered due to this disease.

Wicklow County.

BALTINGLASS; Baltinglass, No. 1, W.—A few cases of diphtheria and measles during the quarter.

BALTINGLASS; Dunlavin.—Healthy quarter.

BALTINGLASS; Kiltegan.—I beg to state this district is now quite clear of diphtheria and scarlatina epidemic, and health generally normal. Only four deaths of persons under middle age, phthisis accounting for two of them, seven being of persons from 70 to 90 years old.

NAAS; Blessington.—The general health of district is good. No case of infectious disease; no case of cancer.

RATHDOWN; Bray, No. 1.—Births and deaths about the average.

RATHDOWN; Delgany.—The health of the district very good.

RATHDRUM; Annamoe.—District healthy during the quarter.

RATHDRUM; Aughrim.—One family was attacked with diphtheria. One died in this district; the rest of the family removed to hospital. House found in a most unsanitary state. Since thoroughly disinfected, etc., etc.

SHILLELAGH; Tinahely.—There has been no infectious disease during the quarter.

II. PROVINCE OF MUNSTER.

Ciara County.

BALLYVAGHAN; Ballyvaghan, W.—District healthy.

CORROFIN; Corrofin, W.—District remarkably free from zymotic disease.

ENNIS; Crusheen.—Health of district good.

ENNIS; Ennis, No. 2.—Whooping-cough very prevalent in the district.

ENNIS; Newmarket.—The health of the district during the quarter was most satisfactory.

ENNISTIMON; Ennistimon, W.—The sanitary state of the district is satisfactory. The health of the district is very good. Vaccination is slow.

ENNISTIMON; Roadford.—District healthy. Sanitary arrangements satisfactory. Houses much better kept.

KILLADYSERT; *Ballynacally, W.*—A woman died in hospital, aged 71 years, who had lupus for more than 40 years. She developed carcinoma near the parotid two years since.

KILLADYSERT; *Labasheeda.*—The health of the district continues good.

KILRUSH; *Carrigaholt.*—Health of district very good.

KILRUSH; *Kilkee.*—The sanitary condition of district is fairly good.

KILRUSH; *Kilmihil.*—Sanitary condition of district good. A few cases of scarlet fever occurred during the quarter.

KILRUSH; *Kilrush, W.*—The health of the district is good, except for a slight outbreak of scarlet fever.

LIMERICK; *Bridgetown.*—District healthy.

LIMERICK; *Coolacasey.*—The district was very healthy during the quarter.

SCARRIFF; *Feakle.*—Health of district good.

SCARRIFF; *Mountshannon, W.*—District healthy.

SCARRIFF; *Quin.*—The health of the district continues satisfactory.

Cork County and County Borough.

BANDON; *Inishannon.*—District healthy.

BANDON; *Kilbrittain.*—District very healthy.

BANTRY; *Bantry, W.*—The sanitation of district is fairly good. Epithelioma of lip is fairly common.

BANTRY; *Durrus and Kilcrohane.*—Sanitary arrangements fair. Vaccination backward owing to catarrh amongst children. The case of death from tuberculosis registered was contracted in America. No case of cancer.

BANTRY; *Glenarriff.*—The district is exceptionally free from infectious and contagious diseases. One case of measles came under my notice—a captain of a schooner—probably contracted in the last port he left—some part of Wales.

BANTRY; *Kealkill.*—District in good sanitary condition, and free from infectious diseases. Number of vaccinations satisfactory.

CASTLETOWN; *Kilcatherine.*—Vaccination was backward, but now progress is being made.

CORK; *Carrignavar.*—One dog suspected of rabies was immediately destroyed, interred in lime, and house disinfected. There was no one bitten, nor any other dog noticed showing symptoms.

CORK; *Dripsey.*—The sanitary condition is good, as shown by there being no case of infectious disease.

CORK; *Whitechurch.*—District healthy. A few cases of measles.

DUNMANWAY; *Coolmountain.*—The general health of this district continues to be most satisfactory. It is quite free from infectious disease. I am pleased to state that the labourers, with the exception of perhaps half a dozen, keep their cottages clean and tidy, and the houses are a credit to them. Vaccination is well up to the average.

DUNMANWAY; *Dunmanway, W.*—The sanitary condition of the district is, on the whole, satisfactory at present. A good many children have been vaccinated during the quarter. Two deaths were registered as being due to pulmonary tuberculosis, and three to carcinoma.

FERMOY; *Fermoy, W.*—There are some persistent defaulters under the Vaccination Acts, and those persons have made no effort to comply with the law.

FERMOY; *Rathcormack.*—There were no deaths registered from cancer during the quarter. Pulmonary catarrh was prevalent during the quarter. Health of district otherwise good.

KANTURK; *Boherboy.*—District healthy and free from epidemic. Four deaths were registered over 80 years.

KANTURK; *Kanturk, W.*—District healthy. One death registered, aged 107.

KANTURK; *Milford.*—District healthy.

KILMALLOCK; *Charleville.*—The district is healthy.

KINSALE; *Ballyfeard.*—Health of district satisfactory. One death at 88 and one at 73 registered. Three cases of impetigo, accompanied with debility, treated; no deaths.

MACROOM; *Macroom, W.*—Whooping-cough has been very prevalent, but no fatal cases as far as I know.

MALLOW; *Ballyclogh.*—District healthy.

MALLOW; *Buttevant.*—Compliance with the Vaccination Act is not satisfactory.

MALLOW; *Rahan.*—One case of diphtheria, and two of enteric fever during past quarter. District otherwise healthy.

MITCHELSTOWN; *Kildorrery.*—Whooping-cough, in some cases complicated with pulmonary affections, is prevalent in the western portion of the district.

SKIBBEREEN; *Dromdaleague.*—District healthy.

SKULL; *Goleen.*—Goleen village is without a supply of drinking water.

SKULL; *Skull, W.*—Many of the defaulters have been brought for vaccination during this quarter.

Kerry County.

CAHERSIVEEN; *Caher, W.*—District healthy. Two deaths occurred during the quarter from tuberculosis. One hereditary, both the parents being affected; the other was acquired through a neglected cold.

CAHERSIVEEN; *Darrynane.*—The sanitary condition of the district is fairly satisfactory.

CAHERSIVEEN; *Emlagh.*—The sanitary arrangements of the district are fairly good.

CAHERSIVEEN; *Glanbehy.*—There are no deaths from cancer in the district. Sanitary state of district good.

CAHERSIVEEN; *Valencia.*—District very healthy. No epidemic of any kind during quarter.

DINGLE; *Anascaul.*—District healthy. Vaccination backward.

DINGLE; *Castlegregory.*—The sanitary condition of this district is good. The small number of vaccinations is due to an epidemic of mumps.

DINGLE; *Dingle, W.*—There was an epidemic of measles in the district for some months which was of a mild type. One National school was closed, and the disease has worn itself out. It has completely disappeared from the district.

DINGLE; *Ventry.*—No epidemic of infectious disease. Health of the district very satisfactory.

KENMARE; *Kenmare, W.*—District healthy.

KILLARNEY; *Coom.*—This district has been healthy during past quarter.

KILLARNEY; *Killorglin.*—The district has been very healthy during the past quarter. Sanitary arrangements and ventilation are receiving more attention.

KILLARNEY; *Milltown.*—No vaccinations.

KILLARNEY; *Molahiffe.*—Bronchitis prevalent, particularly amongst children.

LISTOWEL; *Ballyhorgan.*—Sanitary state of district good.

LISTOWEL; *Ballylongford.*—District healthy for quarter. Cases of consumption on the decreasing side. Vaccination very satisfactory.

LISTOWEL; *Listowel, W.*—District healthy.

TRALEE; *Brosna, No. 1.*—District healthy.

TRALEE; *Castlemaine.*—Health of district very good. No vaccinations returned by the Medical Officer up to the present.

TRALEE; *Kilgobban.*—Vaccination very backward.

TRALEE; *Tralee, No. 2.*—No epidemic disease in district.

Limerick County and County Borough.

CROOM; *Castletown.*—On the whole, an unhealthy quarter. Three cases of diphtheria in one family. One case of enteric fever.

KILMALLOCK; *Bruff.*—The sanitary condition of the district is fairly good. Scarletina was prevalent in one quarter of district, but no deaths resulted therefrom up to the present.

KILMALLOCK; *Bruree.*—There were seven cases of scarlatina, and four of enteric fever during the quarter.

KILMALLOCK; *Hospital.*—District healthy.

KILMALLOCK; *Kilfinnane.*—District healthy, with the exception of a few mild cases of scarlet fever.

KILMALLOCK; *Kilmallock, W.*—District healthy. Eight attached houses have no sanitary arrangements.

LIMERICK; *Annacotty.*—Sanitary arrangements good. District very healthy.

LIMERICK; *Caherconlish.*—Health of district good. One case of enteric sent to hospital.

LIMERICK; *Limerick, No. 3.*—There were registered during the quarter from bronchitis, twelve deaths; tuberculosis (pulmonary), four; tubercular wasting, two; tubercular meningitis, one; pneumonia, one; bronchial-pneumonia, one; cancer, two; gastritis, two; convulsions, five; cerebral embolism, one, and croup, one. There were nine uncertified deaths, of which one was a case of collapse—sudden, and cause unknown—and one was a sudden and unexpected death, registered as probably due to natural causes. No inquest was

held in either of these cases. The sanitary condition and health of the district have been fairly good during the quarter.

LIMERICK; *Moroe.*—District generally in fairly good sanitary condition. Deaths registered only 11—one at 77, one at 79, one at 80, and one at 92 years. Vaccination "up-to-date."

LISTOWEL; *Glin.*—There were two cases of diphtheria during the quarter just closed; otherwise the public health was all that could be desired.

Mitchelstown; Galbally.—District is exceptionally healthy. Vaccination backward owing to a tedious outbreak of scarlatina.

NEWCASTLE; *Ardagh.*—The sanitary state of the district is pretty fair. Whooping-cough in district during the first two months of quarter. Some cases of influenza.

NEWCASTLE; *Feenagh.*—The sanitary arrangements in the district are fairly good.

RATHKEALE; *Askeaton.*—During the past quarter there were three deaths from pulmonary tuberculosis, and one from cancer in the pyloric region of stomach.

RATHKEALE; *Pallaskenry.*—District healthy. Water supply could be improved.

RATHKEALE; *Rathkeale No. 1, W.*—District healthy.

RATHKEALE; *Rathkeale, No. 2.*—The district was in a healthy condition during quarter ended June 30th, 1911.

TIPPERARY; *Greem.*—District healthy.

Tipperary County, North Riding.

BORRISOKANE; *Borrisokane, W.*—With the exception of a large number of cases of simple jaundice of an epidemic nature, particularly among the young people, this district is healthy.

BORRISOKANE; *CloghJordan.*—The district has been very healthy during the last quarter.

BORRISOKANE; *Terryglass.*—Epidemic of pneumonia during this quarter. Sanitary arrangements fairly good.

NENAGH; *Nenagh, W.*—Whooping-cough, which was prevalent during the quarter, has almost disappeared.

NENAGH; *Newport.*—District healthy. Vaccination up-to-date.

NENAGH; *Portroe.*—Whooping-cough prevalent. Sanitary condition fair.

NENAGH; *Silvermines.*—Vaccination postponed owing to pertussis.

NENAGH; *Toomyvara.*—Whooping-cough has made its appearance in this district. Three cases of enteric fever have occurred during the quarter.

ROSCREA; *Bourney.*—Have had some scarlet fever in one end of the district—not any deaths, and the epidemic seems to be ended.

THURLES; *Borrisoleigh.*—No improvement in the very insanitary state of two streets in Borrisoleigh.

THURLES; *Moyne.*—General health and sanitary state good. All defaulters presented for vaccination.

THURLES; *Templemore*.—General sanitary condition of district good. All defaulters presented for vaccination.

THURLES; *Thurles, W.*—Pneumonia of a mild type prevalent.

Tipperary County, South Riding.

CALLAN; *Ballingarry*.—The health of the district for the quarter ended was very good.

CALLAN; *Mullinahone*.—Sanitary condition of district fairly good; no form of infectious or contagious disease prevalent. Four of the five deaths registered were aged from 73 to 85 years. No case of any form of tuberculous disease or cancer under my care.

CARRICK-ON-SUIR; *Garrangibbon*.—The health of the district is good. One case of typhoid and another of ill-defined fever; one died, the other recovered. The deaths registered are 84 (2), 83, 76 (2), 70 (2), and 69 years.

CASHEL; *Killenaule*.—The health of the district for past quarter has been very good, and there is nothing particular to note.

CASHEL; *Kilpatrick*.—Pneumonia was rather prevalent last week of May and first week of June; one death from same in a woman of 64, who was weakly beforehand.

CLOGHEEN; *Caher*.—The sanitary state of district is very good. No cases of an epidemic nature occurred during the past quarter.

CLOGHEEN; *Clogheen, W.*—District healthy, and free from infectious diseases.

CLONMEL; *Clonmel, No. 2 (Marlfield)*.—District healthy.

CLONMEL; *Kilsheelan, No. 1*.—No zymotic disease.

TIPPERARY; *Cappagh*.—The district is healthy.

TIPPERARY; *Emly*.—District healthy.

URLINGFORD; *Kilcooly*.—The district has been very healthy during past quarter. There was one case of tuberculosis. Sanitary arrangements are good, and fairly observed.

Waterford County and County Borough.

CARRICK-ON-SUIR; *Rathgormuck*.—The sanitary condition of the district is satisfactory. I have observed in a few cases influenza followed by lung trouble.

CLONMEL; *Kilsheelan, No. 2*.—No zymotic disease.

DUNGARVAN; *Dungarvan, W.*—There were some cases of scarlatina and diphtheria generally of a mild type in the urban district during the past quarter.

DUNGARVAN; *Whitechurch*.—One death from pulmonary tuberculosis.

LISMORE; *Ballyduff*.—Sanitation, vaccination, and general health of the district satisfactory.

WATERFORD; *Kilmeadan*.—The general health of the district is good. No infectious diseases. No new cases of tuberculosis. Sanitary condition is good.

WATERFORD; *Waterford Urban, No. 1, W.*—The general mortality has been low, with the result that the percentage mortality from tuberculosis is very high—nearly 30 per cent. Improved housing is being provided for the working classes, and the sanitary condition of many old houses is being gradually improved. Domestic and public scavenging, however, leave much to be desired in the matter of efficiency.

WATERFORD; *Woodstown*.—The sanitary condition of the district is good. No new cases of pulmonary tuberculosis occurred during the quarter.

YOUGHAL; *Ardmore*.—Measles prevailing at present.

YOUGHAL; *Clashmore*.—The one death from tuberculous disease was of a girl of 21 years, who returned from America ten days previously.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM; *Antrim, W.*—The health of this district is excellent. The only blot is seven deaths from tuberculous disease.

ANTRIM; *Doagh*.—The district has been practically free from the principal epidemic diseases during the quarter. There were seven deaths from pneumonia.

ANTRIM; *Randalstown*.—Three deaths from cancer and two from tuberculous disease. A mild form of measles epidemic during the quarter.

ANTRIM; *Templepatrick*.—The sanitary arrangements of the district (with few exceptions) are good. Influenza and whooping-cough have been rather prevalent. There were also a few cases of scarlet fever. One death from diphtheria registered.

BALLYCASTLE; *Ballycastle, W.*—There was an epidemic of influenza of a mild type in the first part of the quarter. District now healthy.

BALLYCASTLE; *Croagh*.—The district has been very healthy during the quarter. There has been no epidemic of any kind.

BALLYCASTLE; *Cushendall*.—Sanitary arrangements in district excellent. Only one case of tubercular disease (pulmonary) in the district. Not a case of any of the principal epidemic diseases. Number of deaths exceedingly small.

BALLYMENA; *Ahoghill*.—Large number of cases of pneumonia. There is a marked improvement in the houses of the people as regards sanitation and ventilation. Births and deaths rather below the average. District at present in a healthy condition.

BALLYMENA; *Ballymena, W.*—Public health satisfactory.

BALLYMENA; *Clogh*.—District fairly healthy. One case of scarlatina. Sanitary arrangements fair.

BALLYMENA; *Galgorm*.—Sanitary conditions of district good. No zymotic disease during the quarter.

BALLYMENA; *Glenwhirry*.—District healthy.

BALLYMENA; *Portglenone*.—District is free from epidemic disease.

BALLYMENA; Toome.—The district is in a good sanitary condition.

BALLYMONEY; Castlequarter.—I am attending five cases of pulmonary tuberculosis, four of which have returned here from the U.S.A.

BALLYMONEY; Dirraw.—Sanitary arrangements of district satisfactory.

BALLYMONEY; Portrush.—Whooping-cough has been very prevalent during quarter, obstructing vaccinations.

BELFAST, Belfast Rural, No. 3.—No deaths have occurred from cerebro-spinal fever during the quarter.

BELFAST; Belfast Rural, No. 4.—The health of the district is exceptionally good. The sanitary arrangements are rather above the average for a country district.

LARNE; Ballycarry.—Influenza has been prevalent in district; three deaths registered. Measles also very prevalent, with bronchial complications. Large percentage of deaths registered of people over 75 years of age, several over 90 years.

LARNE; Waterfoot.—Sanitary arrangements and health of the district are excellent. Not one kind of tubercular disease nor any infectious disease. Not a death registered in the district in the last two quarters.

LISBURN; Dunmurry.—The sanitary condition of this district good; no epidemic of any kind.

LISBURN; Glenavy.—Health of the district has been good during the quarter.

LISBURN; Knocknadona.—General health good, and no epidemic. Two of the tuberculous cases originated outside the district. There are a considerable number of vaccination defaulters.

Armagh County.

ARMAGH; Loughgall.—Very few deaths registered during the quarter. Health of the district excellent.

ARMAGH; Markethill.—The district has been very healthy during the past quarter. Diphtheria broke out in a family, and three were affected. Two were removed to hospital, and the disease did not spread.

ARMAGH; Rich Hill.—Mumps very prevalent during the earlier part of the quarter. Some cases of measles during latter part of quarter. District otherwise healthy.

ARMAGH; Tynan.—The health of the district has been particularly good during the quarter.

CASTLEBLAYNEY; Newtownhamilton No. 1.—Pertussis has been universal all over the district amongst those who had not been attacked by it previously.

LURGAN; Lurgan, No. 1, W.—District very free from zymotic disease.

LURGAN; Lurgan, No. 2.—The district is in a good healthy condition, and free from any infectious disease requiring notification.

NEWRY; Mullaghglass.—District healthy.

NEWRY; Poyntz Pass.—District healthy.

Belfast County Borough.

BELFAST; Belfast Urban, No. 4, W.—No deaths from cerebro-spinal fever.

BELFAST; Belfast Urban, No. 5.—No outbreak of cerebro-spinal fever during quarter.

BELFAST; Belfast Urban, No. 9.—One death occurred from cerebro-spinal fever.

BELFAST; Belfast Urban, No. 11.—The health of the district is very good, and the death-rate considerably below the average.

BELFAST; Belfast Urban, No. 13.—No deaths from cerebro-spinal meningitis. The health of the district is good; the sanitary state is also satisfactory. No epidemic disease occurred during the quarter.

Cavan County.

BAILIEBOROUGH; Bailieborough, W.—Measles and whooping-cough very prevalent.

BAILIEBOROUGH; Shercock.—One case of scarlatina occurred during first month of quarter, which, by patient being promptly removed to hospital and house disinfected, did not extend.

BAILIEBOROUGH; Termon.—Sanitary arrangements good.

CAVAN; Killashandra.—One death from cerebro-spinal meningitis was registered during the quarter. Seven deaths of persons over 65 were registered during the quarter. No epidemics during the quarter. District healthy. The Branch of the Women's National Health Association and Guild of Girls' Health Association are doing useful and good work in the district.

COOTEHILL; Tullyvin.—District healthy. One of the two cases of tuberculous disease was contracted in London.

ENNISKILLEN; Holywell, No. 2.—The sanitary arrangements are satisfactory. Except for one case of scarlatina, there has been no infectious disease during the quarter.

GRANARD; Scrabby, No. 1.—Health of district fairly good. No diseases of infectious nature have occurred during the quarter.

OLDCASTLE; Ballyjamesduff.—District healthy. Whooping-cough, of a mild type, prevalent.

OLDCASTLE; Virginia.—District healthy.

Donegal County.

BALLYSHANNON; Ballintra.—The sanitary arrangements of district fairly good, but water supply is bad.

DONEGAL; Donegal, W.—Measles prevalent during the quarter.

DONEGAL; Dunkineely.—Measles of mild type appeared in district during June. No other epidemic diseases except a few cases of influenza in April and May, and district generally very healthy at present.

DONEGAL; Laghy.—Vaccination is still backward owing to measles. District otherwise healthy.

DONEGAL; *Mountcharles*.—There was an epidemic of measles in the district during the quarter, which caused a falling off in the number of vaccinations.

DONEGAL; *Pettigoe*.—District healthy; no epidemic diseases.

DUNFANAGHY; *Crossroads*.—District free from any epidemic during quarter.

DUNFANAGHY; *Dunfanaghy, W.*—In one family there have been three deaths of young girls of 27, 23 and 20 years, respectively, within the last twelve months—all from pulmonary tuberculosis.

DUNFANAGHY; *Tory Island*.—No vaccination during last quarter.

GLENTIES; *Carrick*.—The water supply of Carrick is both contaminated and insufficient. The parents of children won't bring in their children for vaccination when noticed to do so—hence there is a waste of lymph—and also show great reluctance to bring the children for inspection on that day week.

GLENTIES; *Doochary*.—District healthy.

GLENTIES; *Dunglow, No. 2*.—Children are not brought to the stations for vaccination until long—sometimes months—after the date noted on the forms given them *re* vaccination at the time of registration of the birth.

INISHOWEN; *Buncrana*.—District healthy.

INISHOWEN; *Clonmany*.—Number of births registered much smaller than usual.

INISHOWEN; *Malin*.—District healthy.

INISHOWEN; *Moville*.—District healthy.

LETTERKENNY; *Church Hill*.—District healthy; no epidemic.

LETTERKENNY; *Letterkenny, W.*—Influenzal pneumonia was prevalent during the past quarter.

LETTERKENNY; *Manorcunningham*.—The district is healthy, and the sanitary arrangements are fairly good.

LONDONDERRY; *Burt*.—A dentist in the country districts would be very useful for attending to the teeth of the poor. It needn't cost much, as an active young man could do several districts, attending at the different dispensaries once a week in each district.

MILLFORD; *Fanad*.—There was a slight outbreak of typhus fever at the beginning of the quarter. There were six cases, all confined to one house. All were removed to fever hospital, except first case, which was too bad for removal when I was called in. This case died, also one of those sent to hospital. There has been no further spread of the disease. There was one isolated case of enteric fever, and one case of scarlatina of a very mild type.

MILLFORD; *Kilmacrenan*, and *Milford, W.*—The typhus case was admitted to hospital from an adjoining district.

MILLFORD; *Rathmullan*.—No deaths from tuberculosis registered during quarter. Vaccination postponed.

MILLFORD; *Rosguill*.—Condition of district healthy during quarter. One case of measles occurred a few days ago. Vaccination in a more forward state than formerly.

STRABANE; *Raphoe*.—Sanitary arrangements satisfactory. Two deaths registered from measles and one from whooping-cough during past quarter.

STRANORLAR; *Cloghan*.—Sanitary arrangements satisfactory.

STRANORLAR; *Killygordon*.—Of the ten deaths registered in quarter, five are over 80—average 85; of the other four the average age is 72 years. All are cases of senile decay practically. The district is well above the average in sanitary matters; water is good. There has been no infectious disease, and no deaths registered of infants, though bronchitis and broncho-pneumonia have not been infrequent during the quarter.

Down County.

BANBRIDGE; *Ballyward*.—The sanitary condition of the district is, on the whole, good. A number of new labourers' cottages take the place of the old thatched dwellings. Tuberculosis is still very prevalent and accounts for a fair percentage of deaths. I have been instructing the parents of tubercular children, and have pointed out the benefits of fresh air and cleanliness generally.

BANBRIDGE; *Crossgar*.—No cases of any notifiable infectious disease in the district during the last year.

BANBRIDGE; *Loughbrickland*.—The sanitary arrangements are fairly good. There were two cases of diphtheria, both sent to infirmary; one proved fatal. Two cases of typhoid fever; both got well at home. Two cases of scarlatina sent to infirmary; both got well.

BELFAST; *Castlereagh, No. 1*.—No deaths from cerebro-spinal meningitis. The district is in a healthy state; the sanitary condition is also satisfactory.

DOWNPATRICK; *Ballynahinch*.—There has not been any epidemic disease prevalent in the district during the quarter.

DOWNPATRICK; *Killyleagh*.—The public health is good. The death-rate has been low. Of the 28 deaths registered, 14 or half the number have reached the age of 65. One was about 90 years; 4 above 80; 5 above 70; and 4, 65 years and upwards. Nine old age pensioners have died during the quarter.

DOWNPATRICK; *Portaferry*.—Ten cases of diphtheria occurred during quarter; influenza, many cases complicated with sore throat, was very prevalent in May and first half of June.

KILKEEL; *Kilkeel, No. 2, W.*—Health of district very good.

KILKEEL; *Rosstrevor*.—The health of this district has been remarkably good. No epidemics, and only one case of typhoid fever, which recovered. Deaths were principally amongst old people from bronchitis and senile decay. Out of thirteen deaths, nine were of the ages between 60 years and 83 years. Sanitary arrangements and conditions are quite satisfactory. Vaccination complete, there being no defaulters.

LISBURN; *Annahilt*.—Sanitary condition of the district is good. There is no infectious disease.

LISBURN; *Ballylesson*.—The district continues in a healthy state.

LISBURN; *Drumbeg*.—Births and deaths about the average. No zymotic disease during the quarter.

LISBURN; *Saintfield*.—Health of district good; with the exception of an increased number of cases of pulmonary tuberculosis, no less than six deaths in the quarter.

LURGAN; *Moir*.—A remarkably low birth and death rate. No cases of cancer.

LURGAN; *Waringstown*.—During the quarter there were reported to me 13 cases of enteric fever, two cases of scarlet fever, one case of typhus fever, and one case of diphtheria; all these were removed to hospital but one—the case of diphtheria. The epidemic of enteric fever, which began in Donacloy in the month of December last, is still continuing. In all, there have been 53 cases in my district. A good many people are not using their privies and ash-pits provided for them; this assists in keeping up the epidemic.

NEWRY; *Donaghmore*.—The sanitary condition, so far as I have at present seen, is good. There have been two cases of scarlet fever in the district within the last month.

NEWRY; *Rathfriland*.—Sanitation of district is much improved.

NEWTOWNARDS; *Bangor*.—Sanitary arrangements very good. Health of district good. Vaccination well carried out.

NEWTOWNARDS; *Comber*.—We are particularly free from epidemic disease during all the past quarter. Health of district very good, and sanitary arrangements generally good.

NEWTOWNARDS; *Greyabbey*.—Births and deaths about average. More than half the deaths were aged over 60 years. Two aged 90 years. Seven of deaths aged over 60 years stated to be due to influenza. Influenza has been present in all parts of the district during the quarter now ended. General health of district now good.

NEWTOWNARDS; *Newtownards, W.*—The health generally of the district is and has been good. At present there is an epidemic of measles in the town. So far, there has only been one death from it. The disease is not of a very severe type.

Fermanagh County.

ENNISKILLEN; *Enniskillen, W.*—Sanitation fairly good.

ENNISKILLEN; *Florencecourt*.—Whooping-cough still prevalent—two deaths from same. Sanitary condition of district fairly satisfactory.

ENNISKILLEN; *Holywell, No. 1.*—The sanitary condition of the district is good. There have been no infectious diseases during the past quarter.

IRVINESTOWN; *Clonelly*.—There has been no water in the Fermanagh portion of Pettigoe for the past six weeks. The sanitary arrangements are also bad.

IRVINESTOWN; *Ederney*.—Whooping-cough and influenza still prevalent in the district. One death registered, aged 100 years.

IRVINESTOWN; *Irvinestown, W.*—One case of measles registered (uncertified). Three cases of phthisis pulmonalis registered. I am sorry to say this disease seems to be on the increase in this district, and I find it extremely difficult to have

any ordinary precautions to prevent spread of disease carried out in the houses of the patients, closed windows and doors, and sputum scattered over floors, clothes, etc., being the usual thing.

LISNASKEA; *Derrylin*.—Influenza and pneumonia have been in the district. New houses being built, are better ventilated than older ones, and the windows are being made larger.

Londonderry County and County Borough.

COLERAINE; *Aghadowey*.—One death from pulmonary phthisis—the ninth out of a family of eleven. District healthy.

COLERAINE; *Garvagh*.—Three cases of measles occurred in one family, but did not spread; otherwise district healthy.

COLERAINE; *Kilrea*.—District healthy.

COLERAINE; *Portstewart*.—The health of the people is satisfactory, and there is nothing out of the usual to note.

LIMAVADY; *Ballykelly*.—Four deaths registered as above 80 years; three above 70 years.

LIMAVADY; *Bellarena*.—District free from infectious disease.

LIMAVADY; *Dungiven*.—The district is in a healthy state. Two cases of diphtheria; otherwise no infectious disease.

LONDONDERRY; *Claudy*.—Three deaths from carcinoma—one of uterus, one of bowel and liver, and one of breast—and five deaths from tuberculous disease, three being pulmonary and two meningitis, seem to me to be remarkable in regard to total mortality.

LONDONDERRY; *Londonderry Urban, No. 1.*—Influenza caused one death in the urban county district, and one in other localities.

MAGHERAFELT; *Draperstown*.—One death recorded at 104 years.

MAGHERAFELT; *Moneymore*.—A severe form of measles was prevalent during most of quarter, but, fortunately, with no fatality. One case of enteric fever occurred near end of June, apparently traceable to impure drinking water. Patient removed to hospital.

Monaghan County.

CARRICKMACROSS; *Carrickmacross, W.*—District in good sanitary condition, and general health good.

CARRICKMACROSS; *Donaghmoyn*.—District healthy. Death of a woman aged at least 108 years was registered.

CARRICKMACROSS; *Raferagh*.—There has been a severe epidemic of measles in the district, and on that account vaccination has been postponed since the middle of May.

CASTLEBLAYNEY; *Ballybay*.—Four deaths from cancer were registered during quarter. Measles was the cause of death given in three entries, and that disease prevailed throughout this district.

CASTLEBLAYNEY; *Castleblayney, W.*—An epidemic of whooping-cough has occurred during the quarter, and some cases of measles. Among the deaths registered, five were of persons stated to have been aged between 92 and 97 years, and five between 80 and 87 years.

CASTLEBLAYNEY; *Newtownhamilton*, No. 2.—Pertussis very prevalent.

COOTEHILL; *Dawsongrove*.—The sanitary condition of the district is fair. Measles was prevalent during the quarter.

MONAGHAN; *Castleshane*.—District sanitary. A few cases of measles.

MONAGHAN; *Emyvale*.—The sanitary condition of district very good. No epidemic of any kind during quarter. Vaccination during quarter satisfactory.

MONAGHAN; *Kilmore*.—Measles has appeared during the past fortnight.

MONAGHAN; *Monaghan*, W.—The sanitary arrangements in this district, so far as the town of Monaghan is concerned, are in an unsatisfactory condition.

MONAGHAN; *Scotstown*.—District healthy. No epidemic of any kind.

Tyrone County.

CASTLEDERG; *Castlederg*, W.—Sanitary state of district satisfactory. No epidemics of any kind. Thirty-five deaths and thirty-six births; much above the average.

CASTLEDERG; *Drumquin*.—The sanitary arrangements of the district are satisfactory, without any infectious disease, with the exception of one isolated case of scarlatina, which occurred in May, there being no further cases.

CASTLEDERG; *Killeter*.—State of district good; only whooping-cough prevalent during quarter.

CLOGHER; *Aughnacloy*.—Measles and influenza prevalent.

CLOGHER; *Clogher*, W.—Water supply of village very bad. A larger number of deaths from pneumonia during the spring months of this year than has been for some time.

CLOGHER; *Fivemiletown*.—There were some cases of scarlatina during first half of quarter. The health of the district is very good at present.

COOKSTOWN; *Coagh*.—Measles has been prevalent during quarter; otherwise district very healthy.

COOKSTOWN; *Cookstown*, W.—The district is very healthy.

COOKSTOWN; *Pomeroy*.—District healthy.

COOKSTOWN; *Stewartstown*.—Except for measles and some cases of influenza, district is at present healthy.

DUNGANNON; *Caledon and Ballymagran*.—No zymotic disease. Health of district good.

DUNGANNON; *Clonvaddy*.—District in fairly good sanitary condition.

DUNGANNON; *Coal Island*.—One case of enteric fever and three cases of scarlatina reported during the quarter. The measles epidemic has now subsided.

OMAGH; *Drumquin*.—The sanitary arrangements in the district are at present satisfactory. None of the diseases mentioned in the abstracts, or other diseases, are at present prevalent.

OMAGH; *Fintona*.—The health of the district has been good during the past quarter, and, with the exception of whooping-cough, free from epidemic diseases. The sanitary arrangements are satisfactory.

OMAGH; *Omagh*, No. 1, W.—Health of the district satisfactory. Sanitary condition—urban district excepted—general apathy.

OMAGH; *Omagh*, No. 2.—District healthy, and in good sanitary condition.

OMAGH; *Sixmilecross*.—The district is in very good sanitary condition. At present no epidemic. Of the eight deaths uncertified, one was 100 years; six over 70 years of age.

IV. PROVINCE OF CONNAUGHT.

Galway County.

BALLINASLOE; *Kiltormer*.—Health of district good.

CLIFDEN; *Roundstone*, No. 1.—District healthy. No zymotic disease during the quarter.

CLIFDEN; *Roundstone*, No. 2.—One death from phthisis. Two brothers of deceased died from same disease. The number of deaths due to this disease in this district is decreasing. There has been a marked improvement in the sanitation of dwelling-houses in this district during the last few years, especially since the Congested Districts Board commenced to make grants towards the improvement of dwellings.

GALWAY; *Galway*, No. 3 (Arran).—Health of district very good.

GALWAY; *Moycullen*.—The sanitary arrangements are very fair. There is no epidemic in the district.

GALWAY; *Oranmore*.—District very healthy.

GALWAY; *Spiddle*.—District continues healthy.

GALWAY; *Turloughmore*.—Sanitation good.

GORT; *Ardrahan*.—Have had two cases of tuberculosis this quarter in two children—sisters—one, tuberculosis of lungs; 2nd, glandular, in which I traced the source of infection to a milch cow with sore udder, sore teat. Father and mother of children healthy; home very clean and sanitary. No case of phthisis near; children too young to go to school; living in a country house in a breezy upland; yard free from dung or cess-pools.

GORT; *Gort*, W.—Two cases of typhus fever occurred during the quarter. The health of district was otherwise good.

GORT; *Kinvarra*.—The health of the district is good.

LOUGHREA; *Bullaun*.—Of the twelve deaths registered, six were those of persons over 65 years, and one was that of a man aged 102 years.

MOUNT BELLEW; *Killeroran*.—The case of tuberculosis returned from America, where she contracted the disease.

MOUNT BELLEW; *Mount Bellew*, W.—No serious epidemic during quarter. District in fairly sanitary condition.

OUCHTERARD; *Cloonbur*, No. 1.—Health of district good.

PORTUMNA; *Eyreecourt*.—The health of the district is good, and it is entirely free from any contagious disease. The number of vaccinations is above average of any previous quarter.

PORTUMNA; *Portumna*, No. 1, W.—District in a fairly good sanitary condition, and free from diseases mentioned in abstracts, as far as I am aware.

TUAM; *Tuam*, No. 1, W.—There were two deaths from cancer during the quarter. Health of district good during the quarter. Sanitation improving, except in the town of Tuam.

TUAM; *Tuam*, No. 2.—District was healthy during quarter; no epidemic disease.

Leitrim County.

BAWNBOY; *Ballinamore*.—Whooping-cough was prevalent throughout the district during the quarter. Sanitary arrangements good.

CARRICK-ON-SHANNON; *Drumshanbo*.—District healthy and in good sanitary condition.

MOHILL; *Carrigallen*.—The health and sanitary condition of the district have been fairly good during the quarter. There was one death, resulting indirectly from whooping-cough lapsing into chronic spasmodic bronchitis. Nine of the sixteen deaths were of persons over 65 years old.

MOHILL; *Mohill*, W.—Sanitary condition of the district fairly good, healthy, and free from epidemic during the quarter.

MOHILL; *Rinn*.—The sanitary arrangements in the district are fairly satisfactory. It is free from epidemic.

MOHILL; *Rowan*.—A mild epidemic of whooping-cough is at present prevalent in the district, but no deaths have been registered as caused by it.

Mayo County.

BALLINA; *Ballina*, W.—The outstanding feature of the quarter is the large number of deaths registered of persons aged 65 years and upwards—namely, 51 out of a total of 86; 3 over 90 years, and 11 over 80 years. The district has been remarkably free from disease. Six deaths from different forms of tuberculosis, and three from cancer were registered. Sanitary state of the district fairly good.

BALLINA; *Crossmolina*.—District in fair sanitary condition—one case of scarlet fever in early part of quarter. Whooping-cough prevalent, and vaccination consequently at a standstill.

BALLINROBE; *Ballinrobe*, W.—Health of district good. Fifteen of the twenty-nine deaths registered were over sixty-five years. Most of the vaccinations are done in proper time.

BALLINROBE; *Cappaghduff*.—General health of district good. No infectious disease up to the present. Sanitation fair. Some houses require white-washing.

BALLINROBE; *Hollymount*.—Births and deaths quite up to the average. Measles very prevalent in parts of the district. No death registered due to it. One death from scarlatina; other members of this family sent to hospital. No fresh case since. There were a great many cases of throat and catarrhal affections, especially in young and very old people. Great improvement in many places in the dwellings of the people, due to the action of the Congested Districts Board.

BELMULLET; *Binghamstown*, W.—State of district satisfactory.

BELMULLET; *Knocknalower*.—There was one case of enteric fever during the quarter, and a good portion of the district is affected with whooping-cough at present. No vaccination has taken place during quarter.

CASTLEBAR; *Balla*.—District healthy.

CASTLEBAR; *Castlebar*, No. 1, W.—Sanitary conditions both in rural and urban districts have markedly improved. The Vaccination Act is not satisfactorily complied with. Outbreak of diphtheria occurred in one family; mother and six children attacked.

CASTLEBAR; *Castlebar*, No. 2.—The sanitary condition of the district seems to be good.

CLAREMORRIS; *Ballyhaunis*.—Health of district good. No zymotics or cancer. Sanitation progressive. Dwelling houses vastly improved in regard of cleanliness, light, and air. In ten of the deaths registered, the ages varied between 80 and 96 years.

CLAREMORRIS; *Claremorris*, W.—Half the deaths registered are those of persons over 65 years; of these, 14 are over 70 years, and of these again, six are over 80 years. There is a constant improvement going on in the district so far as the sanitary condition of the farmers' houses is concerned. The Congested Districts Board have done great service in this respect.

KILLALA; *Killala*, W.—Two cases of scarlet fever occurred in the district during the quarter. There was no other infectious disease prevalent except some cases of influenza and tuberculosis.

SWINEFORD; *Kiltamagh*.—Measles and whooping-cough very prevalent. Vaccination delayed owing to above.

WESTPORT; *Achill*.—Sanitary state good; no epidemic present, and general health of district very good.

WESTPORT; *Ballycroy*.—Vaccination very satisfactory. A number of cases of acute anterior polio-myelitis (two cases at ages of 13 and 20 years).

WESTPORT; *Islandeady*.—The district is in a sanitary condition. A few cases of scarlatina were reported during the past quarter, but they were of a mild form. Vaccination returns are better than last quarter.

WESTPORT; *Louisburgh*.—Sanitary condition of district very good. No epidemic or case of infectious disease occurred in district during quarter. Vaccination attendance very good owing to weather being fine.

WESTPORT; *Newport*.—Sanitary condition of some of the houses in the town very bad. Owing to an epidemic of scarlatina a number of children had to be postponed for vaccination. Otherwise the general health and sanitary condition of the district is satisfactory.

WESTPORT; *Westport*, W.—One death from puerperal fever. There has been an outbreak of acute polio-myelitis (infantile paralysis) which has already affected 14 children. None of the cases exhibit evidence of cerebral trouble, though in two instances speech has been affected. The other cases show one or more limbs paralysis.

Roscommon County.

ATHLONE; *Brideswell*.—Sanitary condition of district very fair. Whooping-cough prevalent for last six weeks; vaccination backward, it being impossible to get them to bring in the children. There are up to 70 defaulters in my district.

ATHLONE; *Kiltoom*.—The sanitary condition of district satisfactory, with the exception of the difficulty of providing a proper water supply. Some of the children suffered from whooping-cough. The warm weather accounts for small number of vaccinations. The health of district pretty good, most of the deaths over 60 years.

BOYLE; *Boyle, No. 1, W.*—There were some cases of scarlet fever and chicken pox during the last month of the quarter.

CARRICK-ON-SHANNON; *Aughrim*.—One case of scarlatina; otherwise the district has been very healthy.

CASTLEREAGH; *Ballaghaderreen*.—The health of the district has been very good; a few cases of influenza showed themselves in the early portion of the quarter, but no deaths followed.

CASTLEREAGH; *Frenchpark*.—The sanitary condition of Frenchpark is still very bad. The health of the district has been very good during past quarter.

CASTLEREAGH; *Loughglinn*.—The health of the district is improving. No doubt it is due to the system of arterial drainage being carried out, and to the large number of new dwellings, and the continued improvement in the old ones. Vaccination defective. There have been three deaths at 90 years of age and over. One death from carcinomata.

ROSCOMMON; *Athleague*.—The district of Athleague is badly in need of a water supply for drinking purposes. Most of the diseases prevalent in

the locality are caused by this defect. Two deaths from cerebro-spinal fever occurred in this dispensary district during this quarter.

ROSCOMMON; *Roscommon, W.*—Amongst deaths registered during quarter were one case of scarlatina, two of whooping-cough, one of cerebro-spinal meningitis, and four of pneumonia.

STROKESTOWN; *Strokestown, W.*—There were some cases of diphtheria and whooping-cough in the district during the quarter.

Sligo County.

BOYLE; *Gurteen*.—Sanitary condition of district improving. District healthy.

DROMORE WEST; *Easky, W.*—Health of district good, with the exception of one month during quarter, when it was visited with a malignant type of scarlatina, which carried off six children. No trace of the disease at present in district.

DROMORE WEST; *Skreen*.—The people are now complying with the vaccination laws.

SLIGO; *Ballymote*.—Pneumonia has been very prevalent in the district for past few months. One case of typhus fever occurred; district otherwise healthy.

SLIGO; *Carney, No. 1*.—The health of the district continues good. There have been no cases of infectious disease during the quarter.

SLIGO; *Carney, No. 2*.—Health of the district very good.

SLIGO; *Riverstown*.—District healthy.

TOBERCURRY; *Aclare*.—The sanitary arrangements of this district are fair, and there are at present no cases of infectious disease.

TOBERCURRY; *Coolaney*.—Sanitation satisfactory.

1911.]
3rd Quarter.

[No. 191.]

QUARTERLY RETURN OF THE MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE

PROVINCES, COUNTIES, POOR LAW UNIONS, OR SUPERINTENDENT REGISTRARS'
DISTRICTS, AND REGISTRARS' DISTRICTS IN IRELAND,

WITH

*Certain Detailed Information Relative to the Deaths in each Registrar's District ;
Persons Vaccinated, &c., &c., &c.*

By Authority of the Registrar-General.

*Price One Shilling.***Marriages:**—APRIL, MAY, JUNE, 1911.**Births and Deaths:**—JULY, AUGUST, SEPTEMBER, 1911.

During the quarter ended 30th September last, there were registered in the 827 Registrars' Districts in Ireland 25,401 births—a number equal to an annual birth-rate of 23.2 in every 1,000 of the estimated population*—and 16,011 deaths, representing an annual rate of 14.6 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 7,023 persons emigrated.

In England and Wales last quarter, the birth-rate represented was 24.4 in every 1,000 of the estimated population, and the death-rate 15.5 per 1,000.

The birth-rate in Ireland for the quarter is 0.2 above the average rate for the corresponding quarter of the ten years, 1901–1910, and 0.1 above the rate for the third quarter of 1910. The deaths are 546 above those registered in the corresponding quarter of 1910; the death-rate is 0.4 above the rate for that quarter, and 0.1 above the average for the third quarter of the ten years, 1901–1910.

Compared with those for the corresponding quarter of 1910, the returns of pauperism furnished by the Local Government Board show a decrease of 2,894 in the average number of Workhouse inmates on Saturdays during the quarter, and a decrease of 14,961 in the average number of persons on out-door relief.

Compared with the averages for the third quarter of the ten years, 1901–1910, the number of Workhouse inmates shows a decrease of 4,850, and the number of persons on out-door relief shows a decrease of 16,778, the total under both heads being 22.3 per cent. under the average for the third quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 0.6 per cent.

The annual marriage-rate (5.1 per 1,000 of the population) represented by the marriages registered during the second quarter of 1911 is 0.3 above the average rate for the corresponding quarter of the preceding ten years.

* See page 216.

* The rates for the total of Ireland and for the county boroughs of Dublin and Belfast are calculated on the estimated population in the middle of the year, Census 1911 (unrevised figures); those for Antrim and Down according to the Census of 1901, and those for the provinces and remaining counties on the population according to the Census of 1911 (unrevised figures). See note (*) page 171.

† Exclusive of Belfast Co. Borough.

MARRIAGES.

The Marriages (5,554) registered in Ireland during the second quarter of 1911 are equivalent to an annual rate of 5.1 per 1,000 of the estimated population, being 0.1 above the rate for the corresponding quarter of 1910, and 0.3 above the average rate for the second quarter of the ten years 1901-1910. Of the total number of marriages, 3,729 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,825 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 4.6 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6.5 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0.2 above, and that under the latter 0.5 above the average rate for the corresponding quarter of the previous ten years.

It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages is celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by QUARTERLY PERIODS the MARRIAGES registered in Ireland in each of the ten years 1901–1910, and the average number for that period; also the number registered in the first and second quarters of 1911.

BIRTHS.

The number of births registered during the quarter ended 30th September last was 25,401—13,088 boys and 12,313 girls—being equal to an annual ratio of 1 in every 43.1, or 23.2 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years, 1901–10, was 25,338, equivalent to an annual rate of 23.0 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 23.6 per 1,000 of the population according to the Census of 1911; Munster, 22.5; Ulster, 24.0; and Connaught, 21.5.

The highest county or county borough birth-rate* is 31.4 for Dublin county borough, and the lowest 17.9 for Dublin county. Of the intermediate rates the highest five are—Belfast county borough, 28.8; Armagh, 25.0; Limerick county and county borough, 24.4; Londonderry county and county borough, 24.2; and Kerry, 23.8. The lowest five are—Roscommon, 18.3; Leitrim, 18.7; Longford, 19.4; Clare, 19.4; and Cavan, 19.9.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 30th September last was 16,011—8,084 males and 7,927 females—affording an annual ratio of 1 in every 68.3, or 14.6 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years, 1901–10, was 14.5 per 1,000.

The death-rate in Leinster was 16.8 per 1,000 of the population according to the Census of 1911; in Munster, 13.3; in Ulster, 15.1; and in Connaught, 11.5.

The county or county borough death-rates* range from 10.1 in Leitrim to 24.5 in Dublin county borough. Between these rates the lowest five are—Longford, 10.7; Galway, 11.1; Kerry, 11.4; Roscommon, 11.8; and Tipperary, N.R. 11.8; and the highest five are—Belfast county borough, 17.0; Armagh, 16.2; Monaghan, 16.1; Dublin county, 15.9; and Waterford county and county borough, 15.4.

See note () on page 154.

TABLE III.—Showing by QUARTERLY PERIODS the number of BIRTHS and DEATHS registered in Ireland in each of the ten years 1901–1910, and the average number for that period; also the number registered during the first, second, and third quarters of the year 1911 :—

YEAR.	BIRTHS.					DEATHS.

AGES.—Of the 16,011 deaths registered last quarter, 2,768, or 17.3 per cent., were of infants under one year of age; and 5,833, or 36.4 per cent., were of persons aged 65 years and upwards. The deaths of infants under one year old are equal to 109.0 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under one year old equalled 20.7 per cent. of the total deaths registered therein; in Munster, 15.8 per cent.; in Ulster, 17.7 per cent.; and in Connaught, 9.3 per cent. The deaths of persons 65 years old and upwards registered during the quarter in Leinster are equal to 29.9 per cent.; in Munster, to 40.6 per cent.; in Ulster, to 35.9 per cent.; and in Connaught, to 48.3 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

DISEASES.—The total number of deaths from the principal epidemic diseases* is 1,904, and is equivalent to an annual rate of 1.74 per 1,000 living.

The following tabular statement shows the mortality from some of the principal epidemic diseases, as registered during the September quarter of 1911, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years, 1906–1910.

Name of Disease.	Number of Deaths in Sept. quarter, 1911.	Average number of Deaths in Sept. quarter of the 5 years, 1906–1910.
Enteric Fever,	86	74
Typhus,	5	14
Small-pox,	—	—
Measles,	55	117
Scarlet Fever,	47	27
Whooping-cough,	176	186
Diphtheria,	76	68

* See note (†) on page 161.

ENTERIC FEVER.—During the quarter 86 deaths from enteric fever were registered, representing an annual rate of 0·08 per 1,000 of the population, estimated to the middle of the year 1911. The average number of deaths in the corresponding period of the 5 years 1906–10 was 74, and the number in each of the three preceding quarterly periods was 85, 86, and 52. Of the 86 deaths for the period under notice, 26 belonged to the county borough of Dublin, 7 were registered in Cork county and county borough, 3 in each of the Superintendent Registrars' districts of Ballyshannon, Belfast, and Swineford, and 7 in Lisburn Union, of which 6 were deaths in Purdysburn Hospital, in the Registrar's district of Ballylesson, of residents of Belfast.

TYPHUS.—Five deaths from typhus were registered during the quarter ended 30th September, the average number for the corresponding period of the preceding 5 years being 14, and the numbers recorded in the December, March, and June quarters preceding being 21, 14, and 15 respectively. The 5 deaths registered during the quarter under notice occurred in the following unions—Castlebar, Cork, Kilmallock, Millford, and Sligo.

SMALL-POX.—No mortality from this disease was recorded for the period under notice, nor was the occurrence of the disease reported from any of the Registrars' districts.

MEASLES.—The mortality from measles during the quarter under notice shows a decrease when compared with that for the September quarter of the 5 years 1906–10, being 55 deaths, equal to an annual rate of 0·05 per 1,000, while the average was 117 deaths, and also shows a decrease as compared with the number of deaths registered in the December, March, and June quarters preceding, which numbered 120, 137, and 153 respectively. Of the 55 deaths during the quarter ended 30th September, 28 belonged to Dublin county borough, and 5 were registered in the district of Newtownards.

SCARLET FEVER.—The number of deaths (47) registered as having been caused by scarlet fever shows an increase as compared with an average of 27 deaths in the corresponding quarter of the 5 years 1906–10. The mortality in the December, March, and June quarters preceding was 64, 78, and 61 deaths respectively. The 47 deaths registered during the quarter under notice are equivalent to a rate of 0·04 per 1,000 of the estimated population. Of the total 16 belonged to Dublin county borough, and 8 were registered in the Superintendent Registrar's district of Lisburn, 7 deaths occurring in Purdysburn Hospital, Ballylesson, of residents of Belfast.

WHOOPING-COUGH.—The mortality from whooping-cough, which in each of the three quarters immediately preceding that under notice was 190, 238, and 197 deaths, declined in the quarter ended 30th September to 176 deaths, representing a rate of 0·16 per 1,000 of the estimated population, the average number of deaths in the corresponding period of the 5 years 1906–10 being 186. Of the total, 32 belonged to Dublin county borough, 16 to Belfast county borough, 12 to Fermanagh county, 11 to Londonderry county and county borough, 15 to Monaghan county, and 10 to Mayo county.

DIPHTHERIA.—The number of deaths from diphtheria registered during the quarter amounted to 76, equivalent to a rate of 0·07 per 1,000 of the estimated population. The deaths registered in the December, March, and June quarters preceding were 88, 100, and 100 respectively; the average number in the corresponding quarter of the 5 years 1906–10 being 68. Of the 76 deaths registered during the period under notice, 19 appertained to Dublin county borough, 5 were registered in Ballylesson district, all of which were deaths of residents of Belfast occurring in Purdysburn Hospital, and in the following Superintendent Registrars' districts 3 deaths each were registered—Belfast, Carlow, Coleraine, and Dundalk.

DIARRHŒAL DISEASES.—The deaths of 1,293 children under two years of age were caused by diarrhœa and *enteritis*. The deaths of 157 persons aged two years and upwards were registered as having been caused by diarrhœa, and 9 deaths were caused by dysentery.

TUBERCULOUS DISEASE.—There were 2,102 deaths registered from all forms of tuberculous disease, representing a rate of 1·92 per 1,000 of the population, estimated to the middle of the year.

The following notes regarding the status of tuberculous disease and of the public health generally have been selected from those courteously furnished by the Registrars, and appearing at the end of this Report:—

Baltinglass ; Rathvilly.—“ Three deaths from pulmonary tuberculosis registered during the quarter ; one a man aged 32 years, who had recently returned from America.”

Carlow ; Bagenalstown.—“ The sanitary condition of the district is improving owing to the improvements made in many of the labourers’ dwellings.”

Birr ; Frankford.—“ Great need for improvement in the dwelling houses of the poor.”

Mullingar ; Milltown.—“ Union cottages in the district not kept in order, or tidy and clean, both inside and out, are inspected and reported on by the sanitary and sub-sanitary officers. This procedure makes it imperative on the occupiers to keep their premises in proper sanitary condition ; nor are they allowed to suffer their plots to grow into weeds or grass. They must all be carefully cultivated.”

Callan ; Mullinahone.—“ Sanitary condition of district fairly good. No infectious or contagious disease prevalent. People in general take a more intelligent interest in sanitation.”

Antrim ; Crumlin.—“ The death rate for this last quarter is lower than any I have ever registered.”

Ballymena ; Clogh.—“ I have been medical officer for over forty years, and never before had so low a return for both births and deaths—only 6 deaths.”

Banbridge ; Ballyward.—“ Tuberculosis claimed, as usual, a large percentage of the deaths among the young.”

Irvinestown ; Irvinestown.—“ Four deaths registered from tuberculous diseases. Of these, one death registered had a family history of tuberculosis, five brothers and sisters having died from the disease. A second death, a girl about 23 years, had a sister died from pulmonary tuberculosis two and a half years ago. A third case is one of tubercular meningitis. I attribute all these cases to direct infection, houses being small and ill-ventilated, and to want of any precaution to prevent spread of disease.”

Limavady ; Dungiven.—“ Tuberculous disease is still prevalent no matter what warning as to infection the poor get from the medical officer of health. It seems to have little or no effect. Compulsory notification of graver infectious cases, with disinfection of surroundings, would be most desirable.”

Monaghan ; Monaghan.—“ Of 45 deaths during the quarter ending 30th September, 11 died of tuberculous diseases.”

Cookstown ; Stewartstown.—“ District exceedingly healthy ; has not been so healthy for a great number of years, if ever it has been so healthy. Only nine deaths registered.”

Dungannon ; Coal Island.—“ The district was, on the whole, healthy, and showed a marked improvement.”

Glennamaddy ; Dunmore.—“ The death from tuberculosis was that of an American sent home in a dying condition.”

Manorhamilton ; Lurganboy.—“ In my opinion the sanitary arrangements are making great progress towards perfection.”

Castlebar ; Castlebar No. 2.—“ Tuberculosis is very prevalent, due, no doubt, to the old houses which the people dwell in, most of them being in insanitary places.”

Swineford ; Foxford.—“ Domestic sanitation, though gradually improving, remains very defective. In many cases kitchens serve as byres, and windows are small and immovable. Poverty is in the great majority of these cases the real barrier to hygienic progress.”

Castlereagh ; Loughglinn.—“ The health of the district continues favourable, however, the number of deaths from tuberculous disease is on the increase. The greater number of its victims have been in the United States. The arterial drainage that is going on in this district and the increasing cleanliness of the majority of the people will end in having a favourable result.”

CANCER.—The deaths returned under this heading were 833 in number, equivalent to an annual rate of 0·76 per 1,000 of the estimated population, the rate for the December, March, and June quarters preceding being 0·83, 0·80, and 0·71 per 1,000 respectively.

VIOLENCE.—The deaths returned as having been caused by violence, accidental, homicidal, or suicidal numbered 245.

The Registrars, in their Notes, report the presence of the following diseases :— Measles in 11 districts, scarlet fever in 35, whooping-cough in 31, diphtheria in 23, enteric fever in 18, influenza in 2, mumps in one, chicken-pox in 2, and acute anterior polio-myelitis in 3 districts. [See Appendix to this Report commencing on page 217.]

INQUESTS.—There were 398 inquests reported to the Registrars during the quarter ; this number being equal to 1 in every 40 of the total deaths registered.

In Leinster there was 1 inquest to every 35 deaths registered, in Munster 1 to 46, in Ulster 1 to 35, and in Connaught 1 to 97.

DEATHS IN PUBLIC INSTITUTIONS.—Of the 16,011 deaths registered, 3,247, or 20·3 per cent., occurred in public institutions. In Leinster the percentage was 26·5, in Munster 25·0, in Ulster 14·4, and in Connaught 13·7.

UNCERTIFIED DEATHS.—According to the returns, 3,336 of the 16,011 deaths which were registered during the quarter were uncertified, being more than 20 per cent. of the total. In Leinster the percentage was 15, in Munster 23, in Ulster 17, and in Connaught the uncertified deaths were 48 per cent. of the total deaths registered in the province.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 30th September, 1911, and in each of the eight quarters immediately preceding ; with the ratio of these deaths to the deaths from all causes and to the population :—

PERIOD.		Total Deaths registered.	Deaths from Principal Epidemic Diseases.									Total	Percentage of Total Deaths.	Number in every 100,000 of the Population

† Enteric fever, typhus, small-pox, measles, scarlet fever, whooping-cough, diphtheria, and diarrhoeal diseases.

‡ In the cases of the Dublin Registration Area, Belfast, and the urban districts containing a population of over 10,000 in 1901, the population given is according to the Census of 1911 (unrevised figures), and in the other urban districts according to the Census of 1901; the rates for the districts in the Dublin Registration Area and for Belfast have been calculated on the population estimated to the middle of 1911.

(a) New urban district constituted as from 1st October, 1910.

(b) Including the deaths of 6 persons from enteric fever, 7 from scarlet fever, 5 from diphtheria, and one from tuberculous disease, admitted from the City of Belfast to the hospital for infectious diseases at Purdy'sburn, in the Registrar's District of Ballylesson, and Union of Lisburn.

VACCINATION.

According to the Returns of Primary Vaccinations received for the third quarter of the year 1911, there were 22,409 persons successfully vaccinated.

EMIGRATION.

The Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, show that the number of emigrants who left Ireland during the quarter ended 30th September last was 7,023 (3,557 males and 3,466 females), being 1,611 less than in the corresponding quarter of the year 1910, and 2,182 below the average number for the third quarter of the ten years 1901-1910.

TABLE VI.—EMIGRATION from IRELAND during the months of July, August, and September in 1910 and 1911 :—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1910.	1911.	In-crease.	De-crease.	1910.	1911.	In-crease.	De-crease.	1910.	1911.	In-crease.	De-crease.
July ..	1,097	964	—	133	764	740	—	24	1,861	1,704	—	157
August ..	1,142	1,045	—	97	1,101	831	—	270	2,243	1,876	—	367
September	1,956	1,548	—	408	2,574	1,895	—	679	4,530	3,443	—	1,087
TOTAL,	4,195	3,557	—	638	4,439	3,466	—	973	8,624	7,023*	—	1,611

* Including 4,908 emigrants to the United States of America, viz. :—928 in the month of July, 1,233 in August, and 2,747 in September. Of 4,451 steerage passengers, 1,370 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was 6*d.*, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the third quarter of the year 1910 the average price was 6*d.*, and in the corresponding quarter of 1901 it was 5*d.*

The average price of oatmeal (1st quality) in Dublin for the quarter was 13*s.* 6*d.* per cwt. For the corresponding quarter of the year 1910 the average price was 13*s.* 6*d.*, and for the third quarter of 1901 the average price was 12*s.* 9*d.* per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 3*s.* 0*d.* to 3*s.* 5*d.* In the third quarter of 1910 the average prices were 3*s.* 2*d.* to 3*s.* 10*d.*, and the prices for the corresponding quarter of 1901 were 2*s.* 10*d.* to 3*s.* 6*d.*

The average prices of beef at the Dublin Cattle Market during the quarter were from 51*s.* 6*d.* to 57*s.* 6*d.* per cwt. In the corresponding quarter of 1910 the average prices were from 54*s.* to 61*s.* 6*d.*, and in the third quarter of 1901 they were from 52*s.* to 57*s.* 6*d.*

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter was 21*s.* per ton nett, excepting in the coal strike during July, when prices were suspended.

The highest price of Consols at the Dublin Stock Exchange for the quarter was 79½ and the lowest 76½.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland during the quarter ended 30th September, was 4½ per cent., to which it was raised from 4 per cent. on the 21st September.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the third quarter of 1911 was 36,284, or 2,894 below the average for the corresponding period in 1910.

The average weekly number of persons receiving out-door relief during the quarter was 39,107 being 14,961 below the average for the third quarter of 1910.

Of the persons receiving in-door relief during the third quarter of 1911, an average number of 1,641 in each week was located in asylums for the blind and the deaf and dumb, and in extern hospitals ; in the corresponding quarter of 1910 the average weekly number was 1,618.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the THIRD QUARTER of the year 1911, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week ; also the AVERAGE PRICES OF PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

PERIOD.	Average PRICES OF PROVISIONS.								PAUPERISM.		
									No. of PERSONS RELIEVED.		
	BREAD (4lb. Loaf.)		OATMEAL (Corn Exchange), per Cwt. 1st quality.	POTATOES (at Potato Market) per Cwt.		BEEF (at the Dublin Cattle Market), per Cwt.		In-door.	Out-door.		
	° (a)	(b)							Ordinary relief.	By means of works devised for the relief of distress.	Total Out-door.

(a) Messrs. Bolands, Limited.

(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4-lb. loaf delivered ; the price in Messrs Johnston, Mooney, and O'Brien's shops, exclusive of delivery was ¾d. per 4-lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the "Dublin Gazette" ; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the third

* Latitude 53° 21' 48-25" north ; longitude 6° 20' 59-15" west. Height above the mean sea level 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

quarter of the years 1906 to 1911, respectively, furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 166).

The mean height of the barometer during the third quarter of 1911 was 29.739 inches, being 0.153 below the average for the corresponding quarter of the five years 1906-1910; the highest reading (30.399 inches) was on the 11th July at 9 A.M., air calm, and the lowest (29.201 inches) on the 20th September, at 9 P.M., air calm.

The mean temperature of the air during the quarter was 58.6° , being 1.9° above the average for the third quarter of the 5 years 1906-1910.

The maximum temperature of the air during the quarter was 81.8° and the minimum 35.3° .

Rain fell on 39 days during the quarter. The rain-fall measured 4.737 inches, being 1.120 inches below the average for the third quarter of the five years 1906-1910. The greatest monthly rainfall was in July, when 2.216 inches were registered.

The wind blew on 28 days from W., on 13 days from S.W., on 11 days from S., on 6 days from E., on 4 days from N., on 2 days from N.E., on 2 days from S.E., on one day from N.W., and the air was calm on 25 days at 9 A.M.

July.—The mean height of the barometer during this month was 29.556 inches; the highest reading (30.399 inches) was on the 11th at 9 A.M., air calm; and the lowest (29.487 inches) on the 30th, at 9 A.M., wind S.S.E. The mean temperature of the air was 61.8° , the maximum registered was 81.8° , and the minimum 41.6° . The 13th was the warmest day, and the 11th the coldest night. The mean of the dry bulb was 61.2° , and of the wet bulb, 59.5° . The minimum on the grass was 36.6° . The total amount of sunshine recorded was 201.5 hours, the greatest daily amount being 15.2 hours on the 14th. The maximum ozone was 0.6, the minimum 0.2, and the mean 0.5. Rain fell on 12 days. The rain-fall measured 2.216 inches; the greatest amount in 24 hours was 1.120 inch on the 29th.

August.—The mean height of the barometer during this month was 29.777 inches; the highest reading (30.073 inches) was on the 10th at 9 P.M., air calm, and the lowest (29.352 inches) on the 24th at 9 A.M., wind S.S.W. The mean temperature of the air was 60.1° , the maximum registered was 78.3° , and the minimum 41.4° . The 17th was the warmest day, and the 11th the coldest night. The mean of the dry bulb was 60.1° , and of the wet bulb 57.2° . The maximum heat in sun was 130.2° , and the minimum on the grass 37.0° . The total amount of sunshine recorded was 181.4 hours, the greatest daily amount being 12.3 hours on the 8th. The maximum ozone was 0.7, the minimum 0.0, and the mean 0.5. Rain fell on 16 days. The rain-fall measured 1.253 inches; the greatest amount in 24 hours was 0.260 inch on the 28th.

September.—The mean height of the barometer during this month was 29.883 inches, the highest reading (30.249 inches) was on the 15th at 9 P.M., air calm, and the lowest (29.201 inches) on the 20th, at 9 P.M., air calm. The mean temperature of the air was 54.0° ; the maximum registered was 73.9° , and the minimum 35.3° . The 5th was the warmest day, and the 21st the coldest night. The mean of the dry bulb was 54.0° , and of the wet bulb 51.2° . The maximum heat in sun was 128.8° , and the minimum on the grass 28.1 . The minimum on the grass was below 32° on 4 nights. The total amount of sunshine recorded was 152.9 hours, the greatest daily amount being 12.0 hours on the 1st. The maximum ozone was 0.7, the minimum 0.0, and the mean 0.4. Rain fell on 11 days. The rain-fall measured 1.268 inches; the greatest amount in 24 hours was 0.435 inch on the 25th.

TABLE OF METEOROLOGICAL DATA FOR IRELAND.

*Prepared in the Meteorological Office under the direction of W. N. Shaw, Esq.,
LL.D., Sc.D., F.R.S.*

In compiling the following Table (pp. 168 and 169), the stations have been grouped into two Districts, namely, 1. Ireland, North; 2. Ireland, South, the former being represented by six stations and the latter by seven.

The stations selected, with the names of the Observers, are as follows:—

LIST OF STATIONS AND OBSERVERS.

STATION.	OBSERVER.
IRELAND NORTH:—	
Malin Head,	Meteorological Office.
Blacksod Point	Do.
Markree Castle,	J. R. Armstrong, for Captain Cooper.
Donaghadee,	Meteorological Office.
Armagh, The Observatory, ..	J. L. E. Dreyer, PH.D.
Belfast, Queen's College, ..	John Wylie, B.A.
IRELAND, SOUTH:—	
Dublin (City),	Sir John W. Moore, M.D.
Waterford,	J. N. White, Esq.
Birr Castle,	O. Boeddicker, PH.D., for the Earl of Rosse.
Killarney,	E. W. Griffin, M.D.
Valencia,	Meteorological Office.
Roche's Point,	Do.
Limerick, Mungret College, ..	Rev. W. O'Leary, S.J.

NOTES ON THE STATISTICAL TABLES.

Hours of Observation.—The hours of observation are indicated by the type in which the names of the stations are printed. CAPITALS, normal climatological stations, 9 a.m. and 9 p.m.; *ITALIC CAPITALS*, telegraphic reporting normal climatological stations, 7 a.m., 1 p.m., 9 p.m.; Roman, telegraphic reporting stations, 7 a.m., 1 p.m., 6 p.m.; *Italics*, auxiliary climatological stations, 9 a.m. only. At Valencia and at Limerick an additional observation was taken at 3 p.m. The afternoon observations are used in preparing the wind summaries and in computing the number of days of "overcast" or "clear sky." At telegraphic reporting stations (italic capitals or Roman type) the results given under "hygrometer" and "cloud" are based on the morning observations only.

Barometer.—The correction for latitude has not been applied. The values are for station level. They are the means of readings at 9 a.m. and 9 p.m.; or 7 a.m., 1 p.m., 9 p.m.; or 7 a.m., and 6 p.m., as the case may be.

Hygrometer.—At certain stations the vapour pressure and relative humidity are the results obtained from the daily values. These are entered in italic type. At other stations the calculations are made from the monthly means of the dry and wet bulb readings.

Rainfall.—The amounts are for the 24 hours commencing at the time of morning observation.

Weather Phenomena.—The number of days of Rain, Snow, Hail, Thunderstorm, Fog, and Gale, are counted irrespective of the hours at which the phenomena occur. Except in the case of rainfall (see above) the day is the civil day. A day is reckoned as a day of "clear sky," if the average of the estimates of the "amount of cloud" at the hours of observation is less than 2, and as an "overcast" day if the average is greater than 8.

Wind Summaries.—The results given under wind direction, and the number of observations of calms and of fresh or strong wind, are based on the observations at fixed hours. At Valencia and Armagh the wind observations are based on the records of a standard Robinson anemometer (factor 2.2). Velocities of between 13 and 38 miles in the hour have been entered as "fresh or strong winds," velocities of 39 miles in the hour, or above, as gales.

Averages.—The averages used for stations are—Temperature and Rainfall for the 35 years 1871–1905; Bright Sunshine for the 25 years 1881–1905.

District Values.—The district values of temperature, rainfall, and sunshine are computed from the data for the stations included in the Weekly Weather Report of the Meteorological Office. Only a selection of these stations is included in this Report. The average values with which the current district values are compared are for the 25 years, 1881–1905. The district values for "amount of cloud" and for the extremes of temperature and the largest rainfall in a day, are taken from the Monthly Weather Report of the Meteorological Office.

TABLE IX.—*Meteorological Table.*

* Throughout this Return the Unions and Districts have been grouped according to the Administrative Counties as formed under the Local Government (Ireland) Act, 1898.

* Including accidental deaths, homicides, and suicides.

The Return for Inishbodin District, in Clifden Union, not having been received in time for press, the number of Births and Deaths registered in the corresponding Quarter of 1910 have been adopted.

[illegible]

* See note (*) on page 171.

(a) See note (*), page 171.

* The Registrars' Districts (827 in number) are Sub-divisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispensary Districts of the same names formed under the Medical Charities Act. The letter *W* denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

† The details concerning Births and Deaths in the above table for Districts marked thus (†) on pages 181 and 182 are extracted from the Weekly Returns made by the Registrars, and relate to the 13 weeks extending from 2nd July, 1911, to 30th September, 1911. With the exception of 113 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions in these districts have been assigned to the respective districts comprised in the "Dublin Registration Area" from which the deceased were admitted.

* Exclusive of 9 deaths in the Ratdown Union Workhouse of persons admitted from Blackrock and Kingstown, to which Urban Districts they have been assigned.

ABSTRACT III.—REGISTRARS' DISTRICTS, ARRANGED BY COUNTIES AND SUPERINTENDENT REGISTRARS' DISTRICTS—*continued*.I. PROVINCE OF LEINSTER—*continued*.

Registrars' Districts.		Area in Statute Acres.	Population in 1901.	Births:		Deaths:		The Deaths registered during the Quarter are stated by the Registrars to include																Inquest Cases.	Deaths in Public Institutions.	Number of Un-certified Deaths.	Number of successful primary Vaccinations in the Quarter ending 30th Sept., 1911.											
				Registered in the Quarter ending 30th Sept., 1911.	Averages in the Quarters ending 30th Sept. in the 10 years, 1901-1910.	Registered in the Quarter ending 30th Sept., 1911.	Persons aged 65 years and upwards.	Deaths from																														
								Infants under 1 year of age.	Persons aged 65 years and upwards.	Enteric Fever.	Typhus.	Small-pox.	Measles.	Scarlet Fever.	Whooping-cough.	Diphtheria.	Dysentery.	Tuberculous Disease.	Cancer.	Of Children under 2 years of age.	Diarrhoea.	Enteritis of Children under 2 years.	Violence.

NOTE.—This table has been constructed for the years 1837 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872–1911.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872–81, 1882–91, 1892–1901, and 1902–1911, to allow for the discrepancy between the number thus arrived at for 1881, 1891, 1901, and 1911 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Rathvilly*.—Three deaths from pulmonary tuberculosis registered during the quarter; one a man aged 32 years who had recently returned from America. District healthy.

CARLOW; *Bagenalstown*.—The sanitary condition of the district is improving, owing to the improvements made in many of the labourers' dwellings. Vaccination rather backward this quarter. The district is healthy.

CARLOW; *Borris*.—The district has been extremely healthy during the past quarter.

CARLOW; *Fennagh and Myshall*.—The small number of vaccinations can only be accounted for owing to its being a busy season.

CARLOW; *Leighlinbridge*.—Health of district good.

NEW ROSS; *St. Mullins*.—The district has been particularly healthy during the quarter.

Dublin County.

BALROTHERY; *Kilsallaghan*.—There were no vaccinations during the quarter; parents object to taking their children during the warm weather for vaccination.

BALROTHERY; *Lusk*.—There was one death from tuberculosis of the lungs of old standing, and one from tuberculosis of the bowels. Two cases of scarlatina came under my notice. They were of rather a mild type. The children in this instance contracted the disease in Dublin.

DUBLIN, SOUTH; *Clondalkin*.—There was an exceptional outbreak of epidemic enteritis which was pretty general throughout the district; this, combined with the excessively warm weather, accounts for the dearth of vaccinations.

DUBLIN, SOUTH; *Crumlin*.—The district is now fairly healthy owing to the improved water supply and drainage.

DUBLIN, SOUTH; *Rathmines*.—Vaccination not in proportion to population.

RATHDOWN; *Blackrock and Stillorgan No. 2*.—District healthy.

RATHDOWN; *Kingstown, No. 1*.—The sanitary arrangements in Kingstown No. 1 are in very good condition in the majority of places, but there are a few lanes which are in a very unhealthy and insanitary condition, but nothing much can be done for the present, as the leases are running out in a few years. Diarrhoea has been very prevalent during the summer.

Dublin County Borough.

DUBLIN, NORTH; *North City, No. 1, West*.—A great deal of enteritis through the district, but now getting much less.

DUBLIN, NORTH; *North City, No. 3, W*.—A circumstance most urgently affecting the public health of my district at the present time is the scarcity of bread, and the inability of the poor to procure it.

DUBLIN, SOUTH; *New Kilmainham*.—Main drainage now almost complete in this district. I hope to have all dry closets removed in a short time.

Kildare County.

ATHY; *Castledermot*.—Of the seven deaths registered during the quarter, all were females. District healthy.

ATHY; *Monasterevin*.—Four cases of scarlatina during the last quarter.

BALTINGLASS; *Baltinglass, No. 2*.—Most primary vaccinations postponed on account of epidemic of measles and very hot weather.

CELBRIDGE; *Celbridge, W*.—District very healthy.

EDENDERRY; *Carbury*.—Whooping-cough very prevalent, causing two deaths from broncho-pneumonia. One case of diphtheria; the child was removed to fever hospital, where she died. Overcrowding is the only cause I can assign it to.

NAAS; *Ballymore Eustace*.—The health of the district is good, and the death-rate very low.

NAAS; *Naas and Carragh, W.*—No prevailing disease in this district during the past quarter. The Naas sewerage system is now in working order, also the Sallins sewerage.

NAAS; *Robertstown and Kilmeage*.—The sanitary condition of district good.

Kilkenny County.

CALLAN; *Kilmaganny*.—District healthy.

CARRICK-ON-SUIR; *Pilltown*.—Sanitary condition of district excellent.

CASTLECOMER; *Castlecomer, W.*—The district is in a healthy state, and free from any epidemic.

KILKENNY; *Gowran*.—Sanitary arrangements good.

KILKENNY; *Tiscoffin*.—Health of district very good.

KILKENNY; *Tullaroan*.—Health of district good. Only two deaths during last quarter, both of which were registered.

NEW ROSS; *Dysartmoon*.—District in a very healthy state.

THOMASTOWN; *Inistioge*.—Health of this district is very good. No death has been registered during quarter—in fact, I have not heard of a death in the district during the period.

THOMASTOWN; *Knocktopher*.—District in a very healthy condition.

URLINGFORD; *Urlingford, W.*—Health of the district in a good state. No epidemics. There have been registered during the quarter five cases of phthisis and two of cancer.

King's County.

BIRR; *Ferbane*.—Epidemic of whooping-cough during quarter. District otherwise healthy.

BIRR; *Frankford*.—Great need for improvement in the dwelling-houses of the poor.

BIRR; *Kinnitty*.—Water supply and sanitation of Cadamstown bad. Kinnitty village badly needs drainage and water supply.

MOUNTMELICK; *Clonygowan, No. 2*.—District healthy.

ROSCREA; *Roscrea, No. 2*.—Whooping-cough during the quarter.

ROSCREA; *Shinrone*.—Sanitary condition of district good. Vaccination postponed in many cases, as pertussis is prevalent in some parts of district.

TULLAMORE; *Clara*.—The sanitary arrangements of district are fairly good, and the diseases named in the abstracts have been absent during quarter.

TULLAMORE; *Killoughy*.—Diarrhœal diseases have been very prevalent amongst children during the past quarter. The sanitary condition of the district is improving.

TULLAMORE; *Phillipstown*.—District healthy.

TULLAMORE; *Tullamore, W.*—Death-rate low during quarter. Diarrhœa prevalent amongst children.

Longford County.

BALLYMAHON; *Abbeysrule*.—District healthy.

BALLYMAHON; *Ballymahon, W.*—The sanitary condition of the district is satisfactory.

GRANARD; *Ballinallee*.—The district is in fair sanitary condition, and free from contagious disease.

GRANARD; *Granard, W.*—The district is in good sanitary condition, and free from contagious disease.

GRANARD; *Scrabby, No. 2*.—Health of the district good. No infectious cases during the quarter.

LONGFORD; *Killashee*.—Sanitary condition of the district has improved very much of late.

Louth County.

ARDEE; *Castlebellingham*.—District healthy.

ARDEE; *Collon, No. 1*.—District healthy.

ARDEE; *Dunleer*.—District healthy.

DROGHEDA; *Drogheda, No. 2*.—Infantile diarrhœa was prevalent during the summer months.

DROGHEDA; *Termonfeckin*.—District healthy. No epidemic. The climatic conditions for the quarter have been exceptionally good; the maximum of sunshine with the minimum of rain has been our experience during the summer now reluctantly departing. The prolonged drought has affected injuriously the food supply of cattle and milch cows, and dairy-men have suffered from the shortage in grass and green crop for feeding their milch cows.

DUNDALK; *Barronstown*.—There was an epidemic of diphtheria in Dundalk and district during the summer months. Several cases occurred in the Barronstown district.

DUNDALK; *Dromiskin*.—District in healthy state.

DUNDALK; *Dundalk, W.*—A few sporadic cases of diphtheria occurred, following the recent epidemic. At one time during quarter there was danger of a water famine, but the rain just came in time.

Meath County.

ARDEE; *Collon, No. 2*.—District very healthy.

ARDEE; *Drumcondra*.—District healthy.

DROGHEDA; *St. Mary's*.—Sanitary state of district good.

DROGHEDA; *Stamullen*.—One case of scarlatina during quarter. Several cases of summer diarrhœa with one death.

DUNSHAUGHLIN; *Killeen*.—The district is in a very healthy condition. Vaccinations postponed in a number of cases owing to excessive heat. Only one case of scarlet fever.

DUNSHAUGHLIN; *Ratoath, W.*—Sanitary condition of the district is good.

KELLS; *Nobber.*—The normal health of this district is most satisfactorily maintained. Deaths registered for quarter equal exactly those of same quarter in 1909, but are greater than those of corresponding quarters of 1907 (5), 1908 (4), 1910 (5). Five of deaths range from 68 to 84 years, and average 74 years.

OLDCASTLE; *Oldcastle, W.*—The district continues in a satisfactory condition, although the water supply is very defective in the town of Oldcastle.

TRIM; *Summerhill.*—There was one death this quarter from pulmonary tuberculosis—a young man, 35 years of age, who leaves a widow with a young family.

Queen's County.

ABBEYLEIX; *Ballinakill.*—Two persons died from Graves' disease during the quarter. Simple goitre is common in the district.

ABBEYLEIX; *Rathdowney.*—The sanitary arrangements of district are good.

ATHY; *Ballylynan.*—District healthy.

MOUNTMELICK; *Clonaslee.*—The sanitary arrangements in my district are good.

MOUNTMELICK; *Cloniggowan, No. 1.*—Two cases of scarlatina on September 3rd; not any case since. District healthy.

MOUNTMELICK; *Mountmellick, W.*—Sanitary arrangements in a satisfactory condition.

ROSCREA; *Borris-in-Ossory.*—The health of this district is fair.

Westmeath County.

BALLYMAHON; *Ballymore.*—Of the eleven deaths registered during the quarter, three were due to tuberculosis, and one to cancer.

MULLINGAR; *Castletown Geoghegan.*—Sanitary condition satisfactory.

MULLINGAR; *Killucan.*—Health of district good.

MULLINGAR; *Milltown.*—Union cottages in the district not kept in order, or tidy and clean, both inside and out, are inspected and reported on by the sanitary and sub-sanitary officers. This procedure makes it imperative on the occupiers to keep their premises in proper sanitary condition; nor are they allowed to suffer their plots to grow into weeds or grass; these plots must all be carefully cultivated. Affections of the respiratory organs were prevalent during the quarter, notwithstanding the exceptionally dry and hot weather. For this reason also there are numerous vaccination defaulters. Tuberculous disease accounted for two deaths. There were no deaths from cancer.

MULLINGAR; *Mullingar, W.*—Some cases of scarlatina, measles, and diphtheria. Sanitary arrangements fairly good.

TULLAMORE; *Kilbeggan.*—Sanitation of district good. A few cases of scarlatina carried here from another district. No spread of disease.

Wexford County.

ENNISCORTHY; *Killann.*—290 vaccination defaulters.

GOREY; *Gorey, W.*—There have been no vaccinations during the quarter. At present there are several cases of scarlet fever in the fever hospital from this district.

NEW ROSS; *Fethard, No. 1.*—District healthy, and sanitary condition satisfactory.

Wicklow County.

BALTINGLASS; *Baltinglass, No. 1, W.*—Most primary vaccinations postponed on account of epidemic of measles and very hot weather.

BALTINGLASS; *Dunlavin.*—Whooping-cough present in the Donard portion of my district.

BALTINGLASS; *Kiltegan.*—I beg to report an outbreak of scarlatina in the district, and also a case or two of diphtheria, the former disease, or some complications arising therefrom, claiming one victim. Some four or five other families are affected, but are recovering.

NAAS; *Blessington.*—The district has been very healthy during the past quarter. Very low death-rate. Very bad supply of water during the summer months in the village.

RATHDOWN; *Bray, No. 1.*—Births and deaths about the average.

RATHDOWN; *Delgany.*—Health of district good.

RATHDRUM; *Annamoe.*—District healthy during quarter.

RATHDRUM; *Aughrim.*—Wretched water supply for the last three weeks. Reservoir practically dry.

RATHDRUM; *Newcastle.*—General health of district good. There was a considerable number of cases of summer diarrhoea and of urticaria during hot weather. Vaccinations postponed in several cases for this reason.

II. PROVINCE OF MUNSTER.

Clare County.

BALLYVAGHAN; *Ballyvaghan, W.*—Health of district good.

CORROFIN; *Corrofin, W.*—District very healthy during the quarter.

ENNIS; *Crusheen.*—Three cases of diphtheria occurred during the quarter, and recovered in hospital under serum treatment.

ENNIS; *Newmarket.*—The health of the district during the past quarter has been very satisfactory. The sanitary arrangements have been carefully attended to, and the water supply, though a severe strain was put on it during the excessive drought of the past summer, was generally abundant. The excessive heat caused a hesitation amongst the people to have their children vaccinated.

ENNISTIMON; *Ennistimon, W.*—Sanitary arrangements satisfactory. Vaccination in proportion to population.

ENNISTIMON; *Roadford.*—District healthy. No epidemic. Sanitary arrangements satisfactory. Water supply good during the dry season.

KILLADYSERT; *Labasheeda*.—Health of district good.

KILRUSH; *Carrigaholt*.—Health of district very good. Rate of mortality very low.

KILRUSH; *Kilrush, W.*—Health of the district good.

LIMERICK; *Bridgetown*.—District healthy.

LIMERICK; *Coolacasey*.—The sanitary condition of the district is satisfactory. The district is particularly free from disease.

SCARRIFF; *Annacarriga*.—Public health in Kilmalloe would benefit by a regular water supply.

SCARRIFF; *Feakle*.—There have been four cases of diphtheria during this quarter attributed to the pollution of the water supply to the village of Feakle.

SCARRIFF; *Mountshannon, W.*—District continues in a healthy state.

SCARRIFF; *Quin*.—The district is in a healthy condition. A few cases of typhoid fever occurred at Quin; the attack in each case was mild. No deaths resulted. The well which supplied water is believed to be the cause of the outbreak. It is receiving attention.

Cork County and County Borough.

BANDON; *Innishannon*.—District healthy, but am sorry to say there have been two deaths from pulmonary phthisis.

BANTRY; *Durrus and Kilcrohane*.—District healthy. Vaccination backward owing to heavy colds among the children, also eczema and scabies. There was a great scarcity of water for past four months. No cases of tuberculosis.

BANTRY; *Glengarriff*.—District healthy. Of the six deaths registered, four of the persons had been in receipt of the old-age pension.

BANTRY; *Kealkill*.—Health of district good. Sanitary condition fairly good. Number of primary vaccinations satisfactory.

CASTLETOWN; *Kilcatherine*.—District healthy. One case of death from lightning, and one case of cancer of the mouth.

CORK; *Carrigaline, No. 1*.—Some mild cases of diarrhoea among children.

CORK; *Dripsey*.—The sanitary arrangements are fairly good. With the exception of summer diarrhoea, which is fairly prevalent, and some cases of whooping-cough, there is a complete absence of any of the zymotic diseases.

CORK; *Riverstown*.—No vaccinations during the very hot weather.

DUNMANWAY; *Coolmountain*.—The health of my district is most satisfactory. Vaccination has been a little backward during the preceding three months. The birth-rate has been above the average and death-rate small.

DUNMANWAY; *Dunmanway, W.*—The sanitary condition of the district continues fairly satisfactory. There were two deaths registered as being due to tuberculous disease, and two to carcinoma. With regard to vaccination, notices will be sent out immediately.

KANTURK; *Milford*.—The district is healthy.

KILMALLOCK; *Charleville*.—The district is very healthy at present. During my leave of absence there was an epidemic of summer diarrhoea.

KINSALE; *Ballyfeard*.—Health of district good. There was a number of cases of bronchial affections treated during quarter.

MALLOW; *Ballyclogh*.—Had two cases of diphtheria during quarter. District otherwise healthy.

MALLOW; *Buttevant*.—The sanitary arrangements are satisfactory.

MALLOW; *Rahan*.—District healthy and free from infectious disease.

MIDDLETON; *Aghada*.—A death from peculiarly acute broncho-pneumonia was registered during past quarter. The boy, aged 9, appeared to be quite well and active on June 21st. He complained on the morning of the 22nd of vomiting. I saw him in the afternoon, and found both lungs seriously involved, and he died within twenty-four hours. I have read of such cases, but have not met one previously.

MIDDLETON; *Cloyne*.—There were two deaths from drowning, in which no inquests were held.

MIDDLETON; *Middleton, No. 2*.—The health of my district has been very good during the quarter.

SKIBBEREEN; *Dromdaleague*.—District healthy.

SKULL; *Goleen*.—An epidemic of "ulcerated sore throat" in Goleen village. Otherwise district healthy.

SKULL; *Skull, W.*—The district is free from all forms of infectious disease. The number of deaths during the quarter (nine) is the lowest on record in the district. Of these nine deaths, one was at 65 years, three were between 70 and 80 years, and five were between 80 and 90 years old.

Kerry County.

CAHERSIVEEN; *Caher, W.*—District healthy.

CAHERSIVEEN; *Emlagh*.—The sanitary state of the district is fairly good.

CAHERSIVEEN; *Glanbehy*.—There are no deaths from cancer and no deaths from tuberculous disease in my district for the quarter now ended. Sanitary condition of district generally good, with the exception of one townland, where an epidemic of typhoid fever occurred owing to defective water supply.

CAHERSIVEEN; *Valencia*.—District very healthy. A considerable decrease in births and deaths.

DINGLE; *Anascaul*.—District healthy. Weather favourable for vaccination.

DINGLE; *Castlegregory*.—The sanitary condition of the district is good on the whole, but there was an epidemic of enteric fever in the western part of the district which disease is now, I hope, under control. The parents did not bring their children for vaccination, stating that the weather was too hot.

DINGLE; *Dingle, W.*—The district has been very healthy for the last three months. Vaccination very backward.

KENMARE; *Kenmare, W.*—Some cases of diphtheria in the district during quarter.

KENMARE; *Tuosist*.—District healthy. Sanitary conditions good.

KILLARNEY; *Coom.*—District healthy during past quarter.

KILLARNEY; *Killorglin.*—Vaccination very backward owing to an epidemic of enteric fever. Sanitary condition of district is only fair.

KILLARNEY; *Milltown.*—Vaccinations very good.

KILLARNEY; *Molahiffe.*—The sanitary condition of the district is good. Not much vaccination during hot weather. Health of the district is good.

LISTOWEL; *Ballyhorgan.*—Sanitary state of district good.

LISTOWEL; *Ballylongford.*—District very healthy for quarter; small death-rate. Vaccination postponed. Water supply short through autumn. Village sewers badly needed.

LISTOWEL; *Listowel, W.*—District healthy. One case of enteric fever in urban district.

TRALEE; *Brosna, No. 1.*—District healthy.

TRALEE; *Castlemaine.*—Health of district very good. No vaccinations for quarter.

TRALEE; *Kilgobban.*—District healthy. Vaccination should be carried out. Parents do not bring children for vaccination.

TRALEE; *Tralee, No. 2.*—No case of infectious disease has occurred in district during quarter, nor has any been reported to me. Vaccinations few.

Limerick County and County Borough.

CROOM; *Castletown.*—District has been very healthy.

KILMALLOCK; *Bruree.*—Four cases of mild scarlatina; otherwise district healthy.

KILMALLOCK; *Hospital.*—District fairly healthy, but there were a few cases of scarlatina and diphtheria.

KILMALLOCK; *Kilfinnane.*—District healthy, save an occasional case of very mild scarlatina.

KILMALLOCK; *Kilmallock, W.*—Sanitary arrangements fair. A few isolated cases of scarlatina in outlying districts.

LIMERICK; *Anacotty.*—Sanitary arrangements good. District healthy.

LIMERICK; *Caherconlish.*—Sanitary condition fair. Of the deaths, three were at 75 years, two over 80, and one 100 years.

LIMERICK; *Moroe.*—District healthy. Sanitary condition fairly good.

LISTOWEL; *Glin.*—There was only one case of diphtheria in district during quarter; otherwise the public health was all that could be desired.

MITCHELSTOWN; *Galbally.*—District very healthy. Two cases of sudden death due to lightning during the thunderstorm in the month of July—a farmer and his man, together with the horse, whilst loading hay.

NEWCASTLE; *Abbeyfeale.*—No water supply in Abbeyfeale for past three months. This deficiency arises every summer. No proper sanitary arrangements in Abbeyfeale.

NEWCASTLE; *Ardagh.*—The sanitary state of the district is pretty fair. No epidemic in district.

NEWCASTLE; *Feenagh.*—The sanitary arrangements are fairly good.

NEWCASTLE; *Newcastle, W.*—Outbreak of scarlatina in the district. Three cases of very mild type.

RATHKEALE; *Askeaton.*—The district was very healthy during last quarter.

RATHKEALE; *Pallaskenry.*—Water supply insufficient in Pallaskenry village. A healthy quarter.

RATHKEALE; *Rathkeale, No. 1, W.*—With the exception of some structural defects in sewers, and the want of water for flushing them, there is little to complain of in the sanitary condition of the district from contributory causes. There was one case of enteric fever at the end of the quarter, and only one death from epidemic diarrhoea in an infant, due to the putridities engendered by long-continued hot weather, and a few cases of diarrhoea in adults due to the same cause.

Tipperary County, North Riding.

BORRISOKANE; *Borrisokane, W.*—Epidemic of whooping-cough during quarter.

BORRISOKANE; *Terryglass.*—Whooping-cough was prevalent in this district during the quarter. Sanitary arrangements fair.

NENAGH; *Nenagh, W.*—District healthy.

NENAGH; *Newport.*—District is in a fair sanitary condition, and at present free from all infectious diseases.

NENAGH; *Portroe.*—Whooping-cough prevalent during last quarter. Otherwise district in a healthy condition.

NENAGH; *Toomyvara.*—Two cases of enteric fever, and six cases of diphtheria occurred during the quarter. Whooping-cough was prevalent during early part of quarter.

THURLES; *Holycross.*—Sanitary state of district good.

THURLES; *Moyne.*—No prevailing disease.

THURLES; *Templemore.*—District healthy; no prevailing disease.

THURLES; *Thurles, W.*—Seven cases of enteric fever occurred in rural district during latter part of quarter, probably due to the use of an open well liable to pollution.

Tipperary County, South Riding.

CALLAN; *Ballingarry.*—The health of the district for quarter has been good.

CALLAN; *Mullinahone.*—Sanitary condition of district fairly good. No infectious or contagious disease prevalent. People in general take a more intelligent interest in sanitation. One case of pulmonary tuberculosis, and one case of cancer in district.

CARRICK-ON-SUIR; *Garrangibbon.*—During the warm weather vaccination was postponed, but will now be attended to.

CASHEL; *Killenaule.*—Two children died from convulsions from birth. Three infants died from gastro-enteritis.

CASHEL; *Kilpatrick.*—District healthy.

CLOGHEEN; Caher.—No cases of an epidemic nature occurred during the past quarter. District healthy.

CLOGHEEN; Clogheen, W.—District healthy.

CLONMEL; Kilsheelan, No. 1.—Four cases of measles occurred.

TIPPERARY; Cappagh.—Two cases of diphtheria occurred during the quarter, one of which died. Otherwise the district is healthy.

URLINGFORD; Kilcooly.—Sanitary arrangements good and fairly observed. The district has been very healthy during past quarter.

Waterford County and County Borough.

CARRICK-ON-SUIR; Rathgormuck.—We have had two cases of scarlatina, confined to one house; both patients are now quite well. One case of diphtheria has just been brought under my notice, that of a married woman. The case is being properly isolated, and suitable disinfection carried out.

CLONMEL; Ballymacarbry.—Sanitary condition good; every place clean owing to prolonged dry weather. Health of district good; very little sickness during quarter.

CLONMEL; Kilsheelan, No. 2.—No zymotic disease present.

DUNGARVAN; Dungarvan, W.—There were some cases of scarlatina of a mild type in the urban district during the past quarter.

LISMORE; Ballyduff.—Vaccination, sanitation, and general health of district very satisfactory.

WATERFORD; Kilmeadan.—Health of district good. No infectious diseases. No increase of cases of tuberculosis. Water supply and sanitation require attention in a few places; otherwise they are very good.

WATERFORD; Woodstown.—The district is in a good sanitary condition.

YOUGHAL; Ardmore.—There was a mild epidemic of measles; district otherwise very healthy.

YOUGHAL; Clashmore.—The death of a man, aged 110 years, was registered, and I have reason to believe that this was correct from what was stated to me by an old inhabitant of the neighbourhood. He died of epithelioma of abdominal wall, the presence of which he concealed till shortly before his death, as he feared he should be sent to hospital.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM; Antrim, W.—We have had twelve cases of scarlet fever, all of a very mild type. Also a number of cases of epidemic diarrhoea. The long drought is, I believe, responsible.

ANTRIM; Crumlin.—The death-rate for this last quarter is lower than any I have ever registered. There was an epidemic of mild cases of diarrhoea among children, but no deaths.

ANTRIM; Doagh.—The district was practically free from zymotic disease during the quarter. There were, however, numerous cases of diarrhoea due probably to the scarcity of water and the plague of flies.

ANTRIM; Randalstown.—Epidemic diarrhoea prevalent during last quarter. No deaths therefrom.

ANTRIM; Templepatrick.—The sanitary arrangements of the district (with few exceptions) are good. Water has been very scarce throughout the district during the whole quarter, but no disease (apparently) has arisen from this cause as yet.

BALLYCASTLE; Ballycastle, W.—There were two cases of scarlatina in the district; they were removed to the Fever Hospital at once, and there were no further cases.

BALLYCASTLE; Cushendall.—Sanitary arrangements of this district are excellent.

BALLYMENA; Ahoghill.—Health of district satisfactory. Owing to the drought, water has been scarce in some parts of the district; but no epidemic disease resulted therefrom.

BALLYMENA; Ballymena, W.—A good many cases of diarrhoea with some deaths during the hot weather. Health of town and district at present fairly satisfactory.

BALLYMENA; Broughshane.—Health of district good.

BALLYMENA; Clogh.—I have been medical officer for over forty years, and never before had so low a return for both births and deaths—only six deaths. District very healthy. Sanitary arrangements very fair.

BALLYMENA; Galgorm.—District healthy. Death-rate lowest in my experience.

BALLYMENA; Glenwhirry.—District healthy. No epidemic diseases, except a few cases of summer diarrhoea.

BALLYMENA; Portglenone.—Health of district is good.

BALLYMENA; Toome.—The district is in a good sanitary condition.

BALLYMONEY; Dervock.—Whooping-cough is epidemic in district at present. Only five deaths from all causes registered during quarter.

BALLYMONEY; Dirraw.—Health of district for past quarter very good. A splendid quarter for tuberculous and chest complaints.

BELFAST; Belfast, Rural, No. 3.—No deaths have occurred during the quarter from cerebro-spinal fever.

BELFAST; Belfast, Rural, No. 4.—There were some cases of diphtheria and whooping-cough during the quarter; otherwise the district is exceptionally healthy.

LARNE; Ballycarry.—Sanitary condition of district fairly good, although in the greater part there is absolute want of water. Measles with bronchial complications were prevalent; two deaths registered therefrom. There were some scattered cases of scarlet fever and diphtheria, but no epidemic outbreak.

LARNE; Waterfoot.—Sanitary arrangements of the district are very good.

LISBURN; Dunmurry.—The sanitary condition of this district very good. No epidemic of any kind.

LISBURN; Glenavy.—The health of the district has been good during quarter. No epidemic.

LISBURN; Knocknadona.—General health of the district good. Some cases of whooping-cough have occurred, and a considerable number of cases of diarrhoea.

Armagh County.

ARMAGH; *Markethill*.—The district has been free from epidemic disease during the quarter.

ARMAGH; *Rich Hill*.—There was a number of cases of gastro-enteritis both in children and adults during the quarter with two deaths, both of children under two years. District otherwise healthy.

ARMAGH; *Tynan*.—The district has been in a very healthy state during the past quarter.

LURGAN; *Lurgan, No. 1, W*.—One death was registered at the age of 101 years from influenza, the old lady having been in good health and in the enjoyment of all her faculties until attacked by the disease. Of the ten deaths in the urban district of infants under one year, three resulted from zymotic diarrhoea, and one from gastro-enteritis.

LURGAN; *Lurgan, No. 2*.—The district is very healthy, and free from any infectious disease.

NEWRY; *Meigh*.—District healthy. Vaccination up to standard.

NEWRY; *Mullaghglass*.—District healthy.

Belfast County Borough.

BELFAST; *Belfast, Urban, No. 4, W*.—No deaths from cerebro-spinal fever.

BELFAST; *Belfast, Urban, No. 5*.—No outbreak of any infectious diseases.

BELFAST; *Belfast, Urban, No. 9*.—No deaths have occurred during the quarter from cerebro-spinal fever.

BELFAST; *Belfast, Urban, No. 11*.—Diarrhoea has been prevalent in the district during the quarter, but at present there are only a few cases.

BELFAST; *Belfast, Urban, No. 13*.—No deaths from cerebro-spinal meningitis.

Cavan County.

BAILIEBOROUGH; *Bailieborough, W*.—Measles was prevalent during the quarter.

COOTEHILL; *Tullyvin*.—The sanitary arrangements of the district are very good. There was one death from erysipelas. There were not quite so many vaccinations during the quarter owing to parents not liking to have their children vaccinated during the excessive heat.

ENNISKILLEN; *Holywell, No. 2*.—The sanitary condition of the district is fairly good. No cancer.

GRANARD; *Scrabby, No. 1*.—Health of the district fairly good.

OLDCASTLE; *Ballyjamesduff*.—District healthy.

OLDCASTLE; *Virginia*.—District healthy.

Donegal County.

BALLYSHANNON; *Ballintra*.—The sanitary conditions of district fairly good, but water supply bad.

DONEGAL; *Donegal, W*.—Whooping-cough prevalent.

DONEGAL; *Dunkineely*.—Measles of mild type appeared in June; no other epidemic during quarter. The death-rate is the lowest I have ever recorded. There was scarcity of water in some townlands in the district during the hot weather, but no absolute failure of supply. Two deaths occurred from (pulmonary) tuberculosis, one was of a girl, the other that of a young married man of healthy antecedents.

DONEGAL; *Laghy*.—District has been very healthy during the quarter, but whooping-cough has been prevalent, without any deaths, however.

DONEGAL; *Mountcharles*.—The district is in a very healthy condition.

DONEGAL; *Pettigoe*.—The district is healthy.

GLENTIES; *Ardara*.—District healthy.

GLENTIES; *Carrick*.—The district is healthy. Two cases of enteric fever occurred in the district this half year.

GLENTIES; *Doocharry*.—District healthy.

GLENTIES; *Dunglow, No. 2*.—There are eighty vaccination defaulters this quarter.

INISHOWEN; *Buncrana*.—District healthy.

INISHOWEN; *Clonmany*.—District healthy.

INISHOWEN; *Malin*.—District healthy.

INISHOWEN; *Moville*.—District healthy.

LETTERKENNY; *Church Hill*.—District healthy; no epidemic.

LETTERKENNY; *Manorcunningham*.—District in a very healthy state.

LONDONDERRY; *Burt*.—Whooping-cough was prevalent and interfered with vaccination.

MILLFORD; *Fanad*.—District healthy. The death from typhus fever which was registered occurred in the June quarter. No cases of zymotic disease reported during past quarter.

MILLFORD; *Rosquill*.—Of the deaths registered during the quarter, five are of infants under one year, and eight of persons over sixty-five years of age. This mortality seems to me to be somewhat high. One death registered and certified as from pulmonary tuberculosis, occurring in case of a man aged 68 years. One case of scarlet fever occurred during quarter. Otherwise district unusually healthy.

STRABANE; *Raphoe*.—Sanitary arrangements satisfactory. District healthy at present.

STRANORLAR; *Cloghan*.—Sanitary arrangements satisfactory.

STRANORLAR; *Killygordon*.—Notwithstanding the heat of this summer, district has been very healthy and immune from all infantile epidemics of diarrhoea, etc. Three cases of typhoid fever were notified from one house, most probably due to want of care in using water for drinking. Due precautions have been taken, and there has been no spread. The majority of deaths reported were of persons aged 70 years and upwards.

Down County.

BANBRIDGE; *Ballyward*.—Of the twenty-six deaths, sixteen were of persons over 65 years of age; one of these was 100 years old. Two children died of convulsions, both under one year old. The parents summoned no medical aid. Tuberculosis claimed, as usual, a large percentage of the deaths among the young. A mild out-

break of diphtheria occurred. There were no deaths from the disease. A portion of the district, "The Nurseries," has no water supply, the nearest well being about half-a-mile away. This requires rectifying. Two cases of enteric fever occurred. The sanitary condition of the district is very fair.

BANBRIDGE; *Loughbrickland*.—The sanitary arrangements of the district are fairly good. There was one case of typhoid fever, in which the patient succumbed to cerebral meningitis, and one case of scarlatina, which got well. There has been an epidemic of vomiting and diarrhoea during August and September.

BELFAST; *Castlereagh, No. 1*.—No deaths from cerebro-spinal meningitis.

DOWNPATRICK; *Ballynahinch*.—There have been some cases of gastro-enteric catarrh in children, with three deaths, but otherwise district has been fairly healthy.

DOWNPATRICK; *Killyleagh*.—There is at present an epidemic of measles in this district. The disease is of a mild type, and no deaths have been registered as due to it. The district has suffered great inconvenience from scarcity of water, especially in the village of Crossgar.

DOWNPATRICK; *Portaferry*.—Some cases of whooping-cough occurred in the Ratallagh and Cloghey divisions of the district, and spread from Newtownards district. Diarrhoea and influenza, with sore throat, were prevalent in August and September, and there were eight cases of infantile paralysis (anterior polio-myelitis) in August and September. Two of the latter died, in one of which the disease was of the ascending variety.

DOWNPATRICK; *Strangford*.—Owing to the exceptionally dry season, only some of the best springs have held out. Very few of the wells are secure from surface water.

KILKEEL; *Rosstrevor*.—No cases of infectious disease have come under my notice; however, we have no compulsory notification in this union, and cases may have occurred without my knowledge. The compulsory Notification Act should be adopted. There was one case of suspected small-pox sent to hospital, but it turned out to be chicken-pox. Sanitary condition satisfactory.

LISBURN; *Annahilt*.—The sanitary condition of the district is good.

LISBURN; *Ballylesson*.—One death from cerebro-spinal fever in Purdysburn hospital during quarter.

LISBURN; *Drumbeg*.—Births and deaths below the average. One case of diphtheria notified during quarter. Epidemic diarrhoea very prevalent.

LISBURN; *Hillsborough*.—District particularly healthy. I think there never were so few deaths registered in a quarter. Of the eleven registered, one was of a child prematurely born, and nine were of persons over 65; two of the latter over 90.

LISBURN; *Saintfield*.—General health of district good. Slight epidemic of measles and whooping-cough; no death registered from either cause.

LURGAN; *Moir*.—A very low death-rate again this quarter.

LURGAN; *Warinstown*.—The district is healthy, and the death-rate is small. The epidemic of enteric fever in Donacloy has been got over, the last case reported from Donacloy being on June 19th. There have been two cases this quarter; one might have had an indirect connection with

the Donacloy cases, but the other lived on the other side of my district, and the first was a good distance from this village. Both were removed to hospital and the houses disinfected.

NEWRY; *Donaghmore*.—There have been five cases of scarlatina in the district during the past fortnight, four of which belonged to one household; otherwise the health of the district is good.

NEWRY; *Newry, No. 2*.—One of the inquest cases was suicide by hanging.

NEWRY; *Rathfriland*.—Sanitation of district is much improved.

NEWTOWNARDS; *Bangor*.—Sanitary arrangements of district good. Water supply very good. Only one fatality (rural) from epidemic diarrhoea.

NEWTOWNARDS; *Comber*.—Health of district very good. No epidemics. Sanitary condition steadily improving. Water supply has proved ample.

NEWTOWNARDS; *Greyabbey*.—Births and deaths about average. During the quarter six deaths were registered as due to summer diarrhoea—all children under one year. No other epidemic. Health of district good.

NEWTOWNARDS; *Newtownards, W*.—The epidemic of measles continued during the quarter. The disease is not of a very severe type in most of the cases. The weather has favoured the recovery of the children. There was a severe epidemic of enteritis chiefly during August. Although it was chiefly children who suffered, many older persons had the disease too. The welcome rain and the cooler weather seem to have caused it to disappear.

Fermanagh County.

ENNISKILLEN; *Enniskillen, W*.—Sanitation fairly good.

ENNISKILLEN; *Florencecourt*.—Sanitary condition of district fairly satisfactory. No infectious diseases during quarter, except whooping-cough.

ENNISKILLEN; *Holywell, No. 1*.—The sanitary condition of the district is fairly good. No cancer.

IRVINESTOWN; *Clonelly*.—Whooping-cough has been prevalent. The sanitary arrangements are bad. There is no water supply in the Fermanagh portion of Pettigoe.

IRVINESTOWN; *Ederney*.—No epidemic. District healthy.

IRVINESTOWN; *Irvinestown, W*.—Whooping-cough, with pulmonary complications, prevalent. One death registered—pertussis and bronchitis. Four deaths registered from tuberculous disease. Of these, one death registered had a family history of tuberculosis, five brothers and sisters having died from the disease. A second death, a girl aged 23 years of age, had a sister who died from pulmonary tuberculosis 2½ years ago. A third case is one of tuberculous meningitis. I attribute all these cases to direct infection, houses being small and ill-ventilated, and to want of any precaution to prevent spread of disease.

LISNASKEA; *Derrylin*.—Little illness during the quarter. Great scarcity of water in the district during the quarter.

LISNASKEA; *Lisnaskea, W*.—Sanitary state of district fair. Death-rate low during quarter; the greater number of deaths being of persons aged 60 years and upwards.

Londonderry County and County Borough.

COLERAINE; *Aghadowey*.—District very healthy.

COLERAINE; *Coleraine, W.*—Epidemic diarrhœa very prevalent.

COLERAINE; *Garvagh*.—Four cases of diphtheria occurred, one of which died. Otherwise district healthy.

COLERAINE; *Kilrea*.—District healthy. Four cases of scarlatina of a severe type occurred amongst the children of one family in this district, three being now convalescent, but one patient, aged 13 years, died before the eruption had time to appear, her illness lasting about 36 hours, and, when I was sent for, she was semi-comatose.

COLERAINE; *Portstewart*.—The health of the district was very good. The water supply was, I am glad to say, ample for the needs of residents and visitors in the town, though we had from three to four thousand people to supply during summer months.

LIMAVADY; *Bellarena*.—District free from contagious illness.

LIMAVADY; *Dungiven*.—Tuberculous disease is still prevalent, no matter what warning as to infection the poor get from the medical officer of health. It seems to have little or no effect. Compulsory notification of graver infectious cases with disinfection of surroundings would be most desirable.

LIMAVADY; *Limavady, W.*—District healthy. No cases of infectious disease during quarter.

MAGHERAFELT; *Maghera*.—Owing to large proportion of deaths of very aged persons, there was an unusual number uncertified.

MAGHERAFELT; *Moneymore*.—District has been very healthy during quarter. No case of any zymotic disease. Sanitary arrangements fairly good.

Monaghan County.

CARRICKMACROSS; *Carrickmacross, W.*—In the urban district and portion of rural districts we had a severe epidemic of whooping-cough with broncho-pneumonia frequently as a complication; it has now passed away. The death of an old-age pensioner is registered at 107 years, and that of an R.I.C. pensioner at 92 years. General health good.

CASTLEBLAYNEY; *Ballybay*.—Whooping-cough was prevalent, and four deaths from it were registered. Vaccination was up to the average.

CASTLEBLAYNEY; *Castleblayney, W.*—An extensive epidemic of whooping-cough with severe pulmonary complications occurred during the quarter. The water supply was very scarce in the urban and rural districts.

CLONES; *Clones, W.*—There is no epidemic of any sort prevalent in district at present, and, considering the short supply of pure water, there is very little illness of any sort.

COOTEHILL; *Dawsonsgrove*.—The sanitary condition of the district is fair.

MONAGHAN; *Castleshane*.—There were three cases of diphtheria for the quarter; also three cases of epidemic infantile paralysis. The district otherwise is healthy. I consider the drinking water has not been so good owing to long drought.

MONAGHAN; *Emyvale*.—Health of district very good during quarter. Vaccination not done as satisfactorily as might be, owing to heat.

MONAGHAN; *Kilmore*.—A few cases of scarlatina. District otherwise healthy.

MONAGHAN; *Monaghan, W.*—The sanitary arrangements of the district are in an unsatisfactory condition. Of 45 deaths during the quarter ended 30th September, 11 died of tuberculous diseases.

MONAGHAN; *Scots town*.—The health and sanitary condition of the district are satisfactory.

Tyrone County.

CASTLEDERG; *Castlederg, W.*—Sanitary state of district satisfactory. No epidemic of any kind.

CASTLEDERG; *Drumquin*.—The sanitary arrangements are satisfactory, with no infectious disease of any sort.

CASTLEDERG; *Killeter*.—State of district healthy.

CLOGHER; *Aughnacloy*.—Several cases of scarlet fever in town and district during past four weeks.

CLOGHER; *Ballygawley*.—A few cases of scarlatina in one end of district during first part of quarter; none recently.

CLOGHER; *Fivemiletown*.—The health of the district was pretty good during quarter, and the birth-rate was more than double the death-rate.

COOKSTOWN; *Coagh*.—Health of district good.

COOKSTOWN; *Cookstown, W.*—There has been an epidemic of diphtheria in the district, causing two deaths.

COOKSTOWN; *Pomeroy*.—District generally healthy.

COOKSTOWN; *Stewartstown*.—District exceedingly healthy; has not been so healthy for a great number of years, if ever it has been so healthy. Only nine deaths registered.

DUNGANNON; *Benburb*.—Sanitary condition of district good.

DUNGANNON; *Caledon and Ballymagran*.—Epidemic diarrhœa amongst infants prevalent; no deaths therefrom. Gastro-enteritis amongst adults also prevalent.

DUNGANNON; *Clonavaddy*.—Sanitary arrangements good.

DUNGANNON; *Coal Island*.—Three cases of diphtheria, and one of erysipelas were notified during the quarter. The district was, on the whole, healthy, and showed a marked improvement. No death from tuberculosis.

IRVINESTOWN; *Trillick*.—Water supply very bad. All the public wells gave out, save one. The latter often very low and polluted by so many vessels being dipped in it. This well would require to be made larger, and a pump put on it.

OMAGH; *Drumquin*.—The sanitary arrangements in the district are satisfactory. None of the diseases named in the abstracts are prevalent. Health of district good.

OMAGH; *Fintona*.—The health of the district has been very good during the past quarter. The sanitary arrangements are satisfactory.

OMAGH; *Omagh, No. 1, W.*—Health of the district satisfactory. Four cases of scarlatina were

notified, not belonging to the district. Sanitary condition of rural district unsatisfactory; lack of interest in ordinary sanitary matters (cess pools and manure heaps contiguous to dwellings, lack of cleanliness in byres, piggeries, hen-houses, etc.). Vaccination up to standard.

OMAGH; *Omagh*, No. 2.—District healthy for the past three months, with the exception of two houses in which scarlatina broke out. I had the patients removed to hospital and the houses disinfected.

OMAGH; *Sixmilecross*.—The district is at present in very good sanitary condition. One case of scarlatina during the quarter, which was removed to fever hospital.

STRABANE; *Dunnamanagh*.—There were a few cases of scarlatina in the district during the quarter.

IV. PROVINCE OF CONNAUGHT.

Galway County.

BALLINASLOE; *Kiltormer*.—No children were brought for vaccination on account of the unusually hot weather.

BALLINASLOE; *Laurencetown*.—Five cases of enteric fever during the last quarter. All removed to hospital; otherwise health of district good.

CLIFDEN; *Roundstone*, No. 1.—An epidemic of whooping-cough appeared during the quarter, and exists still. Vaccinations had to be postponed on account thereof.

GALWAY; *Galway*, No. 3 (*Arran*).—District very healthy.

GALWAY; *Oranmore*.—The district continues healthy.

GALWAY; *Spiddle*.—Health of district continues very good.

GALWAY; *Turloughmore*.—Sanitation fair. Pneumonia prevalent.

GLENNAMADDY; *Dunmore*.—The death from tuberculosis was that of an American sent home in a dying condition.

GORT; *Ardrahan*.—Owing to presence of whooping-cough, vaccination was in most cases postponed.

GORT; *Gort*, W.—The health of district has been good.

GORT; *Kinvarra*.—The health of the district is good.

LOUGHREA; *Athenry*.—Isolated cases of enteric fever have occurred in the district during the quarter, attributable to the drinking of impure water. The water supply and sewerage of the town of Athenry are in a bad condition, and I am informed that the delay in remedying them is due to the difficulty of procuring a site for sewage disposal works.

LOUGHREA; *Bullaun*.—Of the thirteen deaths registered, nine were those of persons over 65 years of age, and one was that of a woman aged 85 years.

LOUGHREA; *Loughrea*, W.—The district has been particularly free from sickness during quarter, and this happy state was due to the phenomenally fine weather.

MOUNT BELLEW; *Mount Bellew*, W.—Health of district very good. No fever; sanitation fair.

OUGHTERARD; *Cloonbur*, No. 1.—Health of district good. Sanitation progressive.

OUGHTERARD; *Lettermore*.—Health of district fairly good; no epidemics.

OUGHTERARD; *Oughterard*, W.—One death from cancer.

PORTUMNA; *Portumna*, No. 1, W.—District is in a good sanitary condition, and free from infectious disease, as far as I am aware.

TUAM; *Dunmore*.—The cancer case was of prostate gland.

TUAM; *Tuam*, No. 1, W.—Health of district was good during the past quarter.

TUAM; *Tuam*, No. 2.—District very healthy during quarter.

Leitrim County.

BAWNBOY; *Ballinamore*.—Whooping-cough prevalent during the quarter.

CARRICK-ON-SHANNON; *Jamestown*, W.—Seventy-two per cent. of deaths registered were of persons over 65 years of age.

MANORHAMILTON; *Lurganboy*.—In my opinion the sanitary arrangements are making great progress towards perfection.

MOHILL; *Carrigallen*.—The health and sanitary state of the district have been good during the quarter. Five of the seven deaths registered were of persons over 60 years old.

MOHILL; *Mohill*, W.—Sanitary condition of the district good. There are no complaints at present.

MOHILL; *Rinn*.—The district is healthy and free from epidemic.

MOHILL; *Rowan*.—There have been no epidemics of infectious diseases during the past three months. In various parts of the district the "spring wells" ran dry, with the result that the water used by the people for household purposes was anything but good; nevertheless, no harm appears to have resulted from its use.

Mayo County.

BALLINA; *Ballina*, W.—Whooping-cough has been prevalent amongst children during last two months of the quarter. Eight deaths were registered as due to different forms of tuberculous disease. The death of an infant, due to improper feeding, is recorded. Vaccinations up to the average.

BALLINA; *Crossmolina*.—Whooping-cough prevalent during quarter. Two cases of scarlet fever. District otherwise free from infectious disease. Sanitary condition fair.

BALLINROBE; *Ballinrobe*, W.—Sanitary condition of district is good. Vaccinations fairly satisfactory.

BALLINROBE; *Cappaghduff*.—Sanitary condition of the district fair.

BALLINROBE; *Cong*.—Health of district good.

BALLINROBE; *Hollymount*.—The general health of the people of the district was good during the quarter. No fresh case of scarlatina.

BELMULLET; *Bangor*.—During quarter just ended, I am glad to say, there has been very little disease of any kind in this district.

BELMULLET; *Binghamstown, W.*—District in a satisfactory state.

BELMULLET; *Knocknallower.*—The locality has been free from epidemics of any kind for the past quarter. The district still has a large number of vaccination defaulters.

CASTLEBAR; *Balla.*—District healthy.

CASTLEBAR; *Castlebar, No. 2.*—The sanitary arrangements are bad—in many houses cattle are kept in the kitchen. Tuberculosis is very prevalent, due, no doubt, to the old houses which the people dwell in, most of them being in insanitary places.

CLAREMORRIS; *Ballyhaunis.*—Health of district good; no zymotics, or cancer. Sanitation progressive. Arterial drainage is urgently needed. I believe the exceptional prevalence of rheumatic and tuberculous diseases, hereabouts, is directly attributable thereto.

CLAREMORRIS; *Claremorris, W.*—The health of the district is good; there is no epidemic disease.

KILLALA; *Killala, W.*—The health of the district was very good during the quarter. No case of infectious disease was reported, or came under my observation. The sanitary arrangements in the district are not satisfactory. Pigs and cattle are housed in many dwellings.

SWINEFORD; *Foxford.*—Domestic sanitation, though gradually improving, remains very defective. In many cases kitchens serve as byres, and windows are small and immovable. Poverty is, in the great majority of these cases, the real barrier to hygienic progress.

WESTPORT; *Achill.*—Sanitary state good. General health of district very good, and no epidemic present. A good many defaulters presented for vaccination.

WESTPORT; *Ballycroy.*—With the exception of a few cases of acute anterior polio-myelitis, and one case of typhoid fever, the health of district was good.

WESTPORT; *Islandeady.*—The sanitary arrangements of the district have been carried out in a fairly satisfactory manner. No fevers have been reported, and vaccination returns are normal.

WESTPORT; *Louisburgh.*—Sanitary arrangements in district good during quarter. Whooping-cough very prevalent in district during same period. No deaths from same registered. Vaccination postponed in a good many cases owing to prevalence of whooping-cough.

WESTPORT; *Newport.*—There is a great improvement in the general sanitation of the district, save in the town, where some of the dwellings have no proper lavatory accommodation. Vaccination very satisfactory. One death from pulmonary tuberculosis, and one from scarlatina registered.

WESTPORT; *Westport, W.*—One uncertified death, which was reported, was probably due to acute polio-myelitis.

Roscommon County.

ATHLONE; *Brideswell.*—Health of district particularly good. Sanitary condition fair. All deaths registered during quarter were of persons over 70 years of age.

ATHLONE; *Kiltoom.*—The sanitary condition of district is satisfactory.

BOYLE; *Boyle No. 1, W.*—There were some cases of scarlet fever and chicken-pox.

CARRICK-ON-SHANNON; *Aughrim.*—The health of the district continues good.

CASTLEREAGH; *Ballaghaderreen.*—The district has been in a good healthy condition during the quarter, and nothing in particular calls for special comment.

CASTLEREAGH; *Loughglinn.*—The health of the district continues favourable, however, the number of deaths from tuberculous disease is on the increase. The greater number of its victims have been in the United States. There are some cases of mumps and influenza. There has been one death from cancer. The arterial drainage that is going on in this district, and the increasing cleanliness of the majority of the people, will end in having a favourable result.

STROKESTOWN; *Roosky.*—Amongst deaths registered during quarter were one case of cancer, and three from tuberculosis of lungs. Vaccination well attended to.

Sligo County.

BOYLE; *Gurteen.*—District healthy. Vaccination progressing.

DROMORE WEST; *Castleconor.*—The sanitary condition of Enniscrone town is in a very bad state for the want of sewerage.

DROMORE WEST; *Easky, W.*—Health of district very good. Sanitation improving. Only one case of enteric fever, which was sent to Sligo Fever Hospital.

SLIGO; *Ballymote.*—Health of district during last quarter was very good.

SLIGO; *Carney, No. 1.*—The sanitary arrangements are fair. There are two cases of scarlet fever in the district at present. Otherwise the district is healthy.

SLIGO; *Carney, No. 2.*—Health of the district good.

SLIGO; *Collooney.*—Several cases of whooping-cough, one of scarlatina, one of diphtheria, and one of typhoid fever during quarter.

SLIGO; *Riverstown.*—District healthy.

TOBERCURRY; *Coolaney.*—Sanitation satisfactory.

1911.]
4th Quarter.

[No. 192.

QUARTERLY RETURN
OF THE
MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE
PROVINCES, COUNTIES, POOR LAW UNIONS, OR SUPERINTENDENT REGISTRARS'
DISTRICTS, AND REGISTRARS' DISTRICTS IN IRELAND,

WITH

*Certain Detailed Information Relative to the Deaths in each Registrar's District ;
Persons Vaccinated, &c., &c., &c.*

By Authority of the Registrar-General.

Price One Shilling.

Marriages:—JULY, AUGUST, SEPTEMBER, 1911. **Births and Deaths:**—OCTOBER, NOVEMBER, DECEMBER, 1911.

During the quarter ended 31st December last, there were registered in the 827 Registrars' Districts in Ireland 23,875 births—a number equal to an annual birth-rate of 21.8 in every 1,000 of the estimated population*—and 17,025 deaths, representing an annual rate of 15.6 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 4,791 persons emigrated.

In England and Wales last quarter, the birth-rate represented was 22.9 in every 1,000 of the estimated population, and the death-rate 13.5 per 1,000.

The birth-rate in Ireland for the quarter is 0.2 below the average rate for the corresponding quarter of the ten years, 1901–1910, and 0.1 below the rate for the fourth quarter of 1910. The deaths are 660 below those registered in the corresponding quarter of 1910; the death-rate is 0.6 below the rate for that quarter, and 0.8 below the average for the fourth quarter of the ten years, 1901–1910.

Compared with those for the corresponding quarter of 1910, the returns of pauperism furnished by the Local Government Board show a decrease of 2,422 in the average number of Workhouse inmates on Saturdays during the quarter, and a decrease of 14,622 in the average number of persons on out-door relief.

Compared with the averages for the fourth quarter of the ten years, 1901–1910, the number of Workhouse inmates shows a decrease of 4,971, and the number of persons on out-door relief shows a decrease of 16,795, the total under both heads being 21.9 per cent. under the average for the fourth quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 0.6 per cent.

The annual marriage-rate (4.8 per 1,000 of the population) represented by the marriages registered during the third quarter of 1911 is 0.1 below the average rate for the corresponding quarter of the preceding ten years.

* See page 294.

TABLE I.—Showing for each PROVINCE and COUNTY in Ireland, the Annual Rate per 1,000 of the population,* represented by the number of MARRIAGES registered during the Quarter ended 30th September, 1911, and by the BIRTHS and DEATHS registered in the Quarter ended 31st December, 1911.

* The rates for the total of Ireland and for the county boroughs of Dublin and Belfast are calculated on the estimated population in the middle of the year, Census 1911 (unrevised figures); those for Antrim and Down according to the Census of 1901, and those for the provinces and remaining counties on the population according to the Census of 1911 (unrevised figures). See note (*) page 249.

† Exclusive of Belfast Co. Borough.

MARRIAGES.

The Marriages (5,242) registered in Ireland during the third quarter of 1911 are equivalent to an annual rate of 4·8 per 1,000 of the estimated population, being 0·2 below the rate for the corresponding quarter of 1910, and 0·1 below the average rate for the third quarter of the ten years 1901–1910. Of the total number of marriages, 3,442 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,800 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 4·3 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6·3 per 1,000 of the members of all other religious persuasions. The rate under the former heading is equal to and that under the latter 0·4 below the average rate for the corresponding quarter of the previous ten years.

It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages is celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by QUARTERLY PERIODS the MARRIAGES registered in Ireland in each of the ten years 1901–1910, and the average number for that period; also the number registered in the first, second and third quarters of 1911.

BIRTHS.

The number of births registered during the quarter ended 31st December last was 23,875—12,337 boys and 11,538 girls—being equal to an annual ratio of 1 in every 45.8, or 21.8 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1901–10, was 24,232, equivalent to an annual rate of 22.0 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 22.1 per 1,000 of the population according to the Census of 1911; Munster, 21.4; Ulster, 21.9; and Connaught, 21.7.

The highest county or county borough birth-rate* is 29.1 for Dublin county borough, and the lowest 17.1 for Dublin county. Of the intermediate rates the highest five are—Belfast county borough, 25.9; Antrim, 23.3; Kerry, 22.9; Mayo, 22.7; and Limerick county and county borough, 22.7. The lowest five are—Cavan, 17.2; Meath, 17.4; Monaghan, 17.5; Wicklow, 17.6; and Carlow, 18.7.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 31st December last was 17,025—8,431 males and 8,594 females—affording an annual ratio of 1 in every 64.3, or 15.6 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years, 1901–10, was 16.4 per 1,000.

The death-rate in Leinster was 17.9 per 1,000 of the population according to the Census of 1911; in Munster, 14.7; in Ulster, 15.6; and in Connaught, 12.4.

The county or county borough death-rates* range from 11.4 in Mayo, to 23.8 in Dublin county borough. Between these rates the lowest five are—Kerry, 12.1; Roscommon, 12.1; Galway, 12.2; Clare, 12.8 and Tipperary, N.R. 12.8; and the highest five are—Kilkenny, 18.8; Queen's County, 17.7; Armagh, 16.8; Longford, 16.6; and Belfast county borough, 16.5.

See note () on page 230.

AGES.—Of the 17,025 deaths registered last quarter, 2,173, or 12.8 per cent., were of infants under one year of age; and 6,993, or 41.1 per cent., were of persons aged 65 years and upwards. The deaths of infants under one year old are equal to 91.0 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under one year old equalled 14.6 per cent. of the total deaths registered therein; in Munster, 12.5 per cent.; in Ulster, 12.5 per cent.; and in Connaught, 8.9 per cent. The deaths of persons 65 years old and upwards registered during the quarter in Leinster are equal to 35.5 per cent.; in Munster, to 43.0 per cent.; in Ulster, to 40.8 per cent.; and in Connaught, to 53.4 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

DISEASES.—The total number of deaths from the principal epidemic diseases* is 1,071, and is equivalent to an annual rate of 0.98 per 1,000 living.

The following tabular statement shows the mortality from some of the principal epidemic diseases, as registered during the December quarter of 1911, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years, 1906–1910.

Name of Disease.	Number of Deaths in Dec. quarter, 1911.	Average number of Deaths in Dec. quarter of the 5 years, 1906–1910.
Enteric Fever,	99	90
Typhus,	9	14
Small-pox,	—	—
Measles,	75	127
Scarlet Fever,	100	38
Whooping-cough,	149	179
Diphtheria,	97	93

* See note (†) on page 236.

ENTERIC FEVER.—During the quarter 99 deaths from enteric fever were registered, representing an annual rate of 0·09 per 1,000 of the population estimated to the middle of the year. The average number of deaths in the corresponding quarter of the 5 years 1906–10 was 90, and the numbers in the March, June, and September quarters of 1911 were 86, 52, and 86 deaths respectively. Of the total registered during the period under notice, 17 occurred in the superintendent registrar's district of South Dublin, 9 in North Dublin, 8 were registered in the superintendent registrar's district of Cork, and 15 in Omagh.

TYPHUS.—The mortality from typhus shows a decrease when compared with the average for the corresponding period of the 5 years 1906–10, the number of deaths registered during the quarter under notice being 9, and the average 14. In the March, June, and September quarters of 1911, 14, 15, and 5 deaths respectively, were registered. The 9 deaths registered during the quarter occurred in the following unions:—in South Dublin, 3 deaths; in Killarney, 2 deaths; and in each of the unions of Athlone, Ballina, Cahersiveen, and Cork, one death.

SMALL-POX.—No deaths from this cause were registered during the quarter under notice, nor was the occurrence of the disease reported from any registrar's district.

MEASLES.—The number of deaths from this cause, which had risen from 137 in the March quarter of 1911 to 153 in the June quarter, and fallen to 55 in the September quarter, rose in the December quarter to 75 deaths, representing a rate of 0·07 per 1,000 of the estimated population to the middle of 1911, the average number for the corresponding period of the 5 years 1906–10 being 127. Of the 75 deaths 42 were registered in Dublin county borough, 17 in the superintendent registrar's district of Cork, 6 in Newtownards, and 3 in Downpatrick.

SCARLET FEVER.—During the quarter 100 deaths from this cause were registered, equivalent to an annual rate of 0·09 per 1,000 of the estimated population. In the March, June, and September quarters deaths from this disease were respectively 78, 61, and 47 in number, the average for the fourth quarter of the 5 years 1906–10, being 38. Of the total, 23 deaths were registered in Dublin county borough, 11 in Lisburn union (all of which were deaths occurring in Purdysburn Hospital appertaining to Belfast county borough), and 9 in Belfast county borough.

WHOOPING-COUGH.—The number of deaths registered during the quarter was 149, representing an annual rate of 0·14 per 1,000 of the estimated population. The numbers in the March, June, and September quarters were 238, 197, and 176 deaths, respectively, and the average number for the fourth quarter of the five years 1906–10 was 179. Of the total, 31 were registered in Dublin county borough, 32 in Belfast county borough, and 20 in Armagh county.

DIPHTHERIA.—The number of deaths registered from this cause was 97, the average number for the corresponding quarter of the previous 5 years being 93. The 97 deaths registered are equivalent to an annual rate of 0·09 per 1,000 of the estimated population. In the March, June, and September quarters preceding the deaths from diphtheria were 100, 100, and 76, respectively. Of the total, 24 deaths occurred in Dublin county borough, and 9 in Belfast county borough, and in the following unions two or more deaths from diphtheria were registered:—in Larne, 9 deaths, in Lisburn, 8 deaths (6 of which were of persons admitted to Purdysburn Fever Hospital from Belfast county borough), in Cork, 4 deaths; in each of Dundalk, Galway, Nenagh, and Newry, 3 deaths, and in each of Banbridge, Enniscorthy, Limerick and Newtownards two deaths.

DIARRHŒAL DISEASES.—The deaths of 479 children under two years of age were caused by diarrhœa and *enteritis*. The deaths of 60 persons aged two years and upwards were caused by diarrhœa, and 3 deaths from dysentery were also registered.

TUBERCULOUS DISEASE.—The deaths registered from all forms of tuberculous disease were 2,136 in number, and represent a rate of 1·95 per 1,000 of the estimated population.

The following notes regarding tuberculous disease or circumstances affecting the public health of their districts have been selected from those courteously furnished by the Registrars, and which appear at the end of this Report:—

Rathdown; Kingstown, No. 1.—“There is a good deal of tuberculosis here.”

Cavan; Killashandra.—“The branch of the Women's National Health Association is doing good work, distributing leaflets on hygiene, and visiting the people partly under my directions.”

Glenties ; Dunglow, No. 2.—“ Phthisis is abundant.”

Millford ; Rosguill.—“ Bad housing in this district has been a fruitful cause of tuberculosis, especially of bones and joints.”

Lisburn ; Saintfield.—“ Pulmonary tuberculosis apparently on increase.”

Limavady ; Ballykelly.—“ Two deaths registered from tuberculous trouble ; one having occurred in a house with six other children, the house being in a wretched condition. It is now condemned as unfit for human habitation.”

Carrickmacross ; Donaghmoynce.—“ One of those who died from phthisis contracted the disease in U.S.A.”

Dromore West ; Easky.—“ Health of district very good, only 8 deaths registered ; most unusual. A great number of new buildings throughout the district for cattle, pigs, &c., so that the sanitary condition of the people is much improved.”

CANCER.—The deaths returned under this heading were 813 in number, and were equivalent to an annual rate of 0.74 per 1,000 of the estimated population ; the rates for the March, June, and September quarters being 0.80, 0.71, and 0.76, respectively.

VIOLENCE.—The deaths returned as having been caused by violence (accidental, homicidal, or suicidal) were 243 in number.

The Registrars, in their Notes, report the presence of the following diseases :— Measles in 9 districts, scarlet fever in 52, whooping-cough in 25, diphtheria in 30, enteric fever in 15, influenza in 13, mumps in 2, cerebro-spinal meningitis in 1, and acute anterior polio-myelitis in 1 district. [See Appendix to this Report commencing on page 295.]

INQUESTS.—There were 406 inquests reported to the Registrars during the quarter ; this number being equal to 1 in every 42 of the total deaths registered.

In Leinster there was 1 inquest to every 47 deaths registered, in Munster 1 to 51, in Ulster 1 to 30, and in Connaught 1 to 118.

DEATHS IN PUBLIC INSTITUTIONS.—Of the 17,025 deaths registered, 3,682, or 21.6 per cent., occurred in public institutions. In Leinster the percentage was 30.0, in Munster 23.8, in Ulster 16.1, and in Connaught 12.0.

UNCERTIFIED DEATHS.—According to the returns, 4,046 of the 17,025 deaths which were registered during the quarter were uncertified, being nearly 24 per cent. of the total. In Leinster the percentage was 17, in Munster 27, in Ulster 19, and in Connaught the uncertified deaths were 50 per cent. of the total deaths registered in the province.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 31st December, 1911, and in each of the eight quarters immediately preceding ; with the ratio of these deaths to the deaths from all causes and to the population :—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.									Percentage of Total Deaths.	Number in every 100,000 of the Population.
		Enteric Fever.	Typhus.	Small-pox.	Measles.	Scarlet Fever.	Whooping-cough.	Diphtheria.	Diarrheal Diseases.	Total

URBAN DISTRICTS.

Separate Statistics for the Urban Districts are given in Table V. The death-rate for last quarter in these districts, which contain nearly one-third of the total population of the country, was 17·9, and the birth-rate 24·8 per 1,000 of the population; in the remainder of the country the death-rate was 14·4 and the birth-rate 20·4 per 1,000. The annual rate represented by the deaths from the Principal Epidemic Diseases † in the Urban Districts during the quarter was 1·9 per 1,000 of the population; in the remainder of the country the rate was 0·6 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the FOURTH QUARTER of the year 1911, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES †; from TUBERCULOUS DISEASE, and from CANCER, with the number of Uncertified Deaths.

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the twenty-one Urban Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 30th December, 1911.

† Enteric fever, typhus, small-pox, measles, scarlet fever, whooping-cough, diphtheria, and diarrhoeal diseases.
 ‡ In the cases of the Dublin Registration Area, Belfast and the urban districts containing a population of over 10,000 in 1901, the population given is according to the Census of 1911 (unrevised figures), and in the other urban districts according to the Census of 1901; the rates for the districts in the Dublin Registration Area and for Belfast have been calculated on the population estimated to the middle of 1911.

(a) Including the deaths of 4 persons from enteric fever, 11 from scarlet fever, 6 from diphtheria, and 2 from tuberculous meningitis, admitted from the City of Belfast to the hospital for infectious diseases at Purdysburn, in the Registrar's District of Ballylesson, and Union of Lisburn.

* See note (†) on page 235.

VACCINATION.

According to the Returns of Primary Vaccinations received for the fourth quarter of the year 1911, there were 19,467 persons successfully vaccinated.

EMIGRATION.

The Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, show that the number of emigrants who left Ireland during the quarter ended 31st December last was 4,791 (2,274 males and 2,517 females), being 77 less than in the corresponding quarter of the year 1910, and 872 below the average number for the fourth quarter of the ten years 1901-1910.

TABLE VI.—EMIGRATION from IRELAND during the months of October, November, and December in 1910 and 1911:—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1910.	1911.	In-crease.	De-crease.	1910.	1911.	In-crease.	De-crease.	1910.	1911.	In-crease.	De-crease.
October	1,547	1,373	—	174	1,775	1,805	30	—	3,322	3,178	—	144
November	635	580	—	55	488	491	3	—	1,123	1,071	—	52
December	269	321	52	—	154	221	67	—	423	542	119	—
TOTAL,	2,451	2,274	—	177	2,417	2,517	100	—	4,868	4,791*	—	77

* Including 3,356 emigrants to the United States of America, viz.:—2,381 in the month of October, 709 in November, and 266 in December. Of 2,897 steerage passengers, 789 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was 6*d.*, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the fourth quarter of the year 1910 the average price was 6*d.*, and in the corresponding quarter of 1901 it was 5*d.*

The average price of oatmeal (1st quality) in Dublin for the quarter was 13*s.* 6*d.* per cwt. For the corresponding quarter of the year 1910 the average price was 13*s.* 6*d.*, and for the fourth quarter of 1901 the average price was 13*s.* 9*d.* per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 2*s.* 10*d.* to 3*s.* 1*d.*. In the fourth quarter of 1910 the average prices were 3*s.* 3*d.* to 3*s.* 10*d.*, and the prices for the corresponding quarter of 1901 were 1*s.* 10*d.* to 2*s.* 4*d.*

The average prices of beef at the Dublin Cattle Market during the quarter were from 54*s.* 6*d.* to 59*s.* 6*d.* per cwt. In the corresponding quarter of 1910 the average prices were from 52*s.* 6*d.* to 58*s.* 0*d.*, and in the fourth quarter of 1901 they were from 50*s.* to 55*s.* 6*d.*

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter ranged from 22*s.* to 23*s.* per ton nett.

The highest price of Consols at the Dublin Stock Exchange for the quarter was 79 $\frac{1}{8}$ and the lowest 76 $\frac{1}{2}$.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland during the quarter ended 31st ultimo, was 4 $\frac{1}{2}$ per cent.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the fourth quarter of 1911 was 38,565, or 2,422 below the average for the corresponding period in 1910.

The average weekly number of persons receiving out-door relief during the quarter was 38,945 being 14,622 below the average for the fourth quarter of 1910.

Of the persons receiving in-door relief during the fourth quarter of 1911, an average number of 1,631 in each week was located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1910 the average weekly number was 1,608.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the FOURTH QUARTER of the year 1911, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES OF PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

PERIOD.	Average PRICES OF PROVISIONS.								PAUPERISM.	
									No. OF PERSONS RELIEVED.	
	BREAD (4lb. Loaf.)		OATMEAL (Corn Exchange), per Cwt. 1st quality.	POTATOES (at Potato Market) per Cwt.		BEEF (at the Dublin Cattle Market), per Cwt.			In-door.	Outdoor.

(a) Messrs. Bolands, Limited.

(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4-lb. loaf delivered; the price in Messrs Johnston, Mooney, and O'Brien's shops, exclusive of delivery was ¼d. per 4-lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the "Dublin Gazette"; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phoenix Park, Dublin, during the fourth

* Latitude 53° 21' 48.25" north; longitude 6° 20' 59.15" west. Height above the mean sea level 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

quarter of the years 1906 to 1911, respectively, furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 244).

The mean height of the barometer during the fourth quarter of 1911 was 29.513 inches, being 0.204 below the average for the corresponding quarter of the five years 1906-1910; the highest reading (30.399 inches) was on the 10th October, at 9 A.M., wind E., and the lowest (28.545 inches) on the 31st December, at 9 P.M., wind S.W.

The mean temperature of the air during the quarter was 44.8° , being 0.1° above the average for the fourth quarter of the 5 years 1906-1910.

The maximum temperature of the air during the quarter was 73.9° and the minimum 24.7° . The maximum heat in sun was 104.0° .

Rain or snow fell on 63 days during the quarter. The rain-fall measured 10.583 inches, being 2.850 inches above the average for the fourth quarter of the five years 1906-1910. The greatest monthly rainfall was in November, when 3.735 inches were registered.

The wind blew on 17 days from W., on 15 days from S., on 14 days from S.W., on 13 days from E., on 7 days from N., on one day from N.E., on one day from S.E., on one day from N.W., and the air was calm on 23 days at 9 A.M.

October.—The mean height of the barometer during this month was 29.717 inches; the highest reading (30.399 inches) was on the 10th, at 9 A.M., wind E.; and the lowest (28.727 inches) on the 22nd, at 9 A.M., air calm. The mean temperature of the air was 49.2° , the maximum registered was 73.9° , and the minimum 35.3° . The 22nd was the warmest day, and the 29th the coldest night. The mean of the dry bulb was 49.1° , and of the wet bulb, 44.9° . The maximum heat in the sun was 104.0° , and the minimum on the grass 22.8° . The total amount of sunshine recorded was 83.1 hours, the greatest daily amount being 7.2 hours on the 8th. The minimum on the grass was below 32° on 9 nights. The maximum ozone was 0.8, the minimum 0.0, and the mean 0.4. Rain or snow fell on 18 days. The rain-fall measured 3.553 inches; the greatest amount in 24 hours was 0.820 inch on the 26th.

November.—The mean height of the barometer during this month was 29.458 inches; the highest reading (30.092 inches) was on the 29th, at 9 A.M., air calm, and the lowest (28.740 inches) on the 17th, at 9 P.M., air calm. The mean temperature of the air was 42.4° , the maximum registered was 58.3° , and the minimum 24.7° . The 5th was the warmest day, and the 11th the coldest night. The mean of the dry bulb was 42.4° , and of the wet bulb 40.3° . The maximum heat in sun was 87.9° , and the minimum on the grass 22.6° . The total amount of sunshine recorded was 62.4 hours, the greatest daily amount being 6.1 hours on the 10th. The minimum on the grass was below 32° on 12 nights. The maximum ozone was 0.8, the minimum 0.0, and the mean 0.5. Rain or snow fell on 20 days. The rain-fall measured 3.735 inches; the greatest amount in 24 hours was 0.880 inch on the 12th.

December.—The mean height of the barometer during this month was 29.363 inches, the highest reading (30.159 inches) was on the 31st at 9 P.M., wind S.W., and the lowest (28.545 inches) on the 10th, at 9 P.M., wind W.N.W. The mean temperature of the air was 42.9° ; the maximum registered was 56.8° , and the minimum 26.7° . The 19th was the warmest day, and the 6th the coldest night. The mean of the dry bulb was 42.9° , and of the wet bulb 41.0° . The maximum heat in sun was 79.1° , and the minimum on the grass 22.0° . The total amount of sunshine recorded was 42.1 hours, the greatest daily amount being 5.8 hours on the 7th. The minimum on the grass was below 32° on 15 nights. The maximum ozone was 0.7, the minimum 0.0, and the mean 0.3. Rain or snow fell on 25 days. The rain-fall measured 3.295 inches; the greatest amount in 24 hours was 0.740 inch on the 14th.

THE YEAR 1911.

The total number of births registered in Ireland during the year 1911 (as returned by the Registrars) was 101,934, or 23·3 per 1,000 of the population estimated in the middle of the year, and the total number of deaths was 72,548, or 16·6 per 1,000. Of the 72,548 deaths, 4,646, equal to 1·1 per 1,000 living, were caused by one or other of the principal epidemic diseases.†

In the Urban Districts, which contain nearly one-third of the total population, the birth-rate was 27·1 per 1,000 of the population; the death-rate (all causes), 18·4, and the epidemic death-rate, 2·0 per 1,000. The corresponding rates for the remainder of the country are—births, 21·4; deaths from all causes, 15·7; and deaths from the principal epidemic diseases, †0·6. According to the returns of Vaccination furnished by the Registrars there were 84,011 successful primary vaccinations performed during the year.

URBAN DISTRICTS.

TABLE VIII. —Births and Deaths registered during the Year 1911, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of Deaths from each of the PRINCIPAL EPIDEMIC DISEASES;† from all forms of TUBERCULOUS DISEASE, and from CANCER, Malignant Disease, with the number of Uncertified Deaths.

NOTE.—"The Dublin Registration Area" consists of the City of Dublin, and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the twenty-one Urban Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars and relate to the fifty-two weeks ending Saturday, 30th December, 1911.

† see note (†) on page 285.

In the cases of the Dublin Registration Area, Belfast, and the urban districts containing a population of over 10,000 in 1901, the population given is according to the Census of 1911 (unrevised figures) and in the other urban districts according to the Census of 1901; the rates for the total of Ireland and for the districts in the Dublin Registration Area and for Belfast have been calculated on the population estimated in the middle of 1911.

URBAN DISTRICTS—continued.

TABLE OF METEOROLOGICAL DATA FOR IRELAND.

*Prepared in the Meteorological Office under the direction of W. N. Shaw, Esq.,
LL.D., Sc.D., F.R.S.*

In compiling the following Table (pp. 246 and 247), the stations have been grouped into two Districts, namely, 1. Ireland, North; 2. Ireland, South, the former being represented by six stations and the latter by seven.

The stations selected, with the names of the Observers, are as follows:—

LIST OF STATIONS AND OBSERVERS.

STATION.	OBSERVER.
IRELAND NORTH:—	
Malin Head,	Meteorological Office.
Blacksod Point	Do.
Markree Castle,	J. R. Armstrong, for Captain Cooper.
Donaghadee,	Meteorological Office.
Armagh, The Observatory, ..	J. L. E. Dreyer, PH.D.
Belfast, Queen's College, ..	John Wylie, B.A.
IRELAND, SOUTH:—	
Dublin (City),	Sir John W. Moore, M.D.
Waterford,	J. N. White, Esq.
Birr Castle,	O. Boeddicker, PH.D., for the Earl of Rosse
Killarney,	E. W. Griffin, M.D.
Valencia,	Meteorological Office.
Roche's Point,	Do.
Limerick, Mungret College, ..	Rev. W. O'Leary, S.J.

NOTES ON THE STATISTICAL TABLES.

Hours of Observation.—The hours of observation are indicated by the type in which the names of the stations are printed. CAPITALS, normal climatological stations, 9 a.m. and 9 p.m.; *ITALIC CAPITALS*, telegraphic reporting normal climatological stations, 7 a.m., 1 p.m., 9 p.m.; Roman, telegraphic reporting stations, 7 a.m., 1 p.m., 6 p.m.; *Italics*, auxiliary climatological stations, 9 a.m. only. At Valencia and at Limerick an additional observation was taken at 3 p.m. The afternoon observations are used in preparing the wind summaries and in computing the number of days of "overcast" or "clear sky." At telegraphic reporting stations (italic capitals or Roman type) the results given under "hygrometer" and "cloud" are based on the morning observations only.

Barometer.—The correction for latitude has not been applied. The values are for station level. They are the means of readings at 9 a.m. and 9 p.m.; or 7 a.m., 1 p.m., 9 p.m.; or 7 a.m., and 6 p.m., as the case may be.

Hygrometer.—At certain stations the vapour pressure and relative humidity are the results obtained from the daily values. These are entered in italic type. At other stations the calculations are made from the monthly means of the dry and wet bulb readings.

Rainfall.—The amounts are for the 24 hours commencing at the time of morning observation.

Weather Phenomena.—The number of days of Rain, Snow, Hail, Thunderstorm, Fog, and Gale, are counted irrespective of the hours at which the phenomena occur. Except in the case of rainfall (see above) the day is the civil day. A day is reckoned as a day of "clear sky," if the average of the estimates of the "amount of cloud" at the hours of observation is less than 2, and as an "overcast" day if the average is greater than 8.

Wind Summaries.—The results given under wind direction, and the number of observations of calms and of fresh or strong wind, are based on the observations at fixed hours. At Valencia and Armagh the wind observations are based on the records of a standard Robinson anemometer (factor 2.2). Velocities of between 13 and 38 miles in the hour have been entered as "fresh or strong winds," velocities of 39 miles in the hour, or above, as gales.

Averages.—The averages used for stations are—Temperature and Rainfall for the 35 years 1871–1905; Bright Sunshine for the 25 years 1881–1905.

District Values.—The district values of temperature, rainfall, and sunshine are computed from the data for the stations included in the Weekly Weather Report of the Meteorological Office. Only a selection of these stations is included in this Report. The average values with which the current district values are compared are for the 25 years, 1881–1905. The district values for "amount of cloud" and for the extremes of temperature and the largest rainfall in a day, are taken from the Monthly Weather Report of the Meteorological Office.

TABLE X.—Meteorological Table.

STATIONS.		Height of Barometer Cistern above M.S.L.	Baro- meter.	Air Temperature.								Hygrometer.				Earth Temperature.		Bright Sunshine.			
				Mean Pressure at 32° F. at Level and Latitude of Station.	Mean of		Mean of A and B.	Difference from Normal.	Absolute Maximum and Minimum.				Mean of Observations at 9 a.m. and 9 p.m., or at 7 a.m.				At 1 foot depth.	At 4 feet depth.	Total Observed.	Difference from Normal.	Per cent. of Possible.

ABSTRACT III.—REGISTRARS' DISTRICTS, ARRANGED BY COUNTIES (*a*) AND SUPERINTENDENT REGISTRARS' DISTRICTS.*

I.---PROVINCE OF LEINSTER.

[illegible]

[illegible]

(a) See note (*), page 249.

* The Registrars' Districts (827 in number) are Sub-divisions of the Unions or Superintendent Registrars' Districts, and, with a few exceptions, are identical with the Dispersal Districts. The letter 'W' denotes that the Registrar's District contains within its limits the Workhouse belonging to the Union or Superintendent Registrar's District.

† The details concerning Births and Deaths in the above table for Districts marked thus (†) on pages 259 and 260 are extracted from the Weekly Returns made by the Registrars, and relate to the 13 weeks extending from 1st October, 1911, to 30th December, 1911. With the exception of 128 deaths of persons from localities outside the "Dublin Registration Area," the deaths in Public Institutions in these districts have been assigned to the respective districts comprised in the "Dublin Registration Area" from which the deceased were admitted.

* Exclusive of 6 deaths in the Ratdawn Union Workhouse of persons admitted from Blackrock and Kingstown, to which Urban Districts they have been assigned.

ABSTRACT III.—REGISTRARS' DISTRICTS, ARRANGED BY COUNTIES AND SUPERINTENDENT REGISTRARS' DISTRICTS—continued.

I. PROVINCE OF LEINSTER—continued.

NOTE.—This table has been constructed for the years 1837 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1911.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, 1892-1901, and 1902-1911, to allow for the discrepancy between the number thus arrived at for 1881, 1891, 1901, and 1911 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Rathvilly*.—Three cases of scarlet fever occurred in the district during the quarter in one family. Patients were removed to hospital, house fumigated, &c., and every precaution taken.

CARLOW; *Bagenalstown*.—Of the seven deaths registered during the quarter, four were of persons from the age of 73 to 86 years. One death occurred from consumption, at the age of 34 years. District healthy.

CARLOW; *Leighlinbridge*.—Health of district good.

CARLOW; *Tullow*.—The district has been in a very healthy condition during past quarter, and entirely free from any epidemic.

Dublin County.

BALROTHERY; *Kilsallaghan*.—The health of the district has been good during the past quarter, but towards the end one case of scarlatina (angino-se form) occurred, and was duly notified. The necessary prophylactic measures were taken, and, so far, no further cases have occurred. Generally speaking, this district is comparatively free from infectious disease of all kinds. Of the seven deaths registered, two were of persons over 70, two over 80, and one over 90 years of age. Vaccinations up-to-date.

CELBRIDGE; *Rathcoole*.—District healthy during quarter.

DUBLIN, SOUTH; *Clondalkin*.—There was a rather alarming outbreak of enteric fever in the Upper Palmerston portion of the district towards the end of September; traced the infection to infected ice-cream. There was one fatal case.

RATHDOWN; *Blackrock and Stillorgan, No. 2*.—District very healthy during quarter.

RATHDOWN; *Kingstown, No. 1*.—The district is in a fairly healthy condition. It is hoped to erect new houses, and clear away the slum area, also to build bath-houses for the poorer classes. There is a good deal of tuberculosis here.

Dublin County Borough.

DUBLIN, NORTH; *North City, No. 1, West*.—The district has been generally healthy.

DUBLIN, NORTH; *North City, No. 2*.—A number of unsanitary houses have been condemned in this district, and in most cases have been demolished. The district is free from infectious diseases at present.

Kildare County.

CELBRIDGE; *Celbridge, W*.—This district is very healthy.

CELBRIDGE; *Maynooth*.—There were 20 cases of enteric fever in part of my district during the quarter.

NAAS; *Ballymore Eustace*.—Health of district satisfactory. No epidemic. Amongst the ages in register of deaths for the quarter one was 95 years.

NAAS; *Kildare*.—Whooping-cough prevalent; otherwise district healthy.

NAAS; *Robertstown and Kilmeage*.—Health and sanitary condition of the district good. No epidemic of any sort during quarter.

Kilkenny County.

CALLAN; *Kilmaganny*.—District healthy.

CASTLECOMER; *Castlecomer, W*.—The district at present is in a healthy state.

KILKENNY; *Freshford*.—There were two cases of scarlet fever.

KILKENNY; *Gowran*.—The district is in a good sanitary condition.

KILKENNY; *Kilkenny*, No. 1, W.—An epidemic of measles of a mild type during this quarter.

KILKENNY; *Tiscoffin*.—Health of district very good.

KILKENNY; *Tullaroan*.—The four deaths registered were of persons aged 83, 88, 91, and 96 years. District very healthy.

THOMASTOWN; *Inistioge*.—District very healthy.

THOMASTOWN; *Knocktopher*.—Measles has been very prevalent during quarter ended through parts of district; I had only one complication—a child of 6 years, who developed broncho-pneumonia. The patient recovered.

URLINGFORD; *Balleen*.—There were four cases of scarlet fever.

URLINGFORD; *Urlingford*, W.—Some cases of typhoid fever have occurred in the district, as well as four cases of scarlet fever, successfully treated in the Fever Hospital.

King's County.

BIRR; *Frankford*.—Houses of poor very bad.

BIRR; *Kinnitty*.—Sanitary condition of Cadamstown and Kinnitty defective. The ages of the persons whose deaths were registered were 44, 68, 75, 78, 79, 90, and 91 years.

MOUNTMELICK; *Clonygowan*, No. 2.—District healthy; no epidemic.

ROSCREA; *Roscrea*, No. 2.—Whooping-cough during the quarter.

TULLAMORE; *Clara*.—There was one fatal case of tetanus. The health of the district is satisfactory. Water supply good and wholesome. One death from enteric fever, which was contracted away from district.

TULLAMORE; *Killoughy*.—The district has been very free from disease during past quarter, notwithstanding the bad water supply available.

TULLAMORE; *Phillipstown*.—District as usual; no cause of complaint; health all sound.

Longford County.

BALLYMAHON; *Abbeyshrule*.—District healthy.

BALLYMAHON; *Ballymahon*, W.—The sanitary condition of the district is satisfactory.

GRANARD; *Ballinalee*.—The district is in fair sanitary condition, and free from contagious disease.

GRANARD; *Granard*, W.—The district is in good sanitary condition, and free from contagion.

GRANARD; *Scrabby*, No. 2.—Health of the district fairly good. Within the past two weeks one case of scarlatina has made its appearance; patient convalescent. One death from tuberculosis.

LONGFORD; *Drumlisk*.—The health of this district is satisfactory, and free, during past quarter, from any epidemics. There were four deaths registered from tuberculosis disease; none of the victims were ever outside Ireland. Ten deaths registered were of persons over 70 years old.

Louth County.

ARDEE; *Castlebellingham*.—District very healthy.

ARDEE; *Collon*, No. 1.—District healthy.

ARDEE; *Dunleer*.—District healthy.

DUNDALK; *Dromiskin*.—District healthy.

DUNDALK; *Dundalk*, W.—Slight outbreak of diphtheria during the quarter ended, resulting in three deaths. Sanitary condition of town and rural district good.

Meath County.

ARDEE; *Collon*, No. 2.—District very healthy.

ARDEE; *Drumcondra*.—District free from all zymotic disease.

DROGHEDA; *St. Mary's*.—The sanitary state of district is good.

DROGHEDA; *Stamullen*.—District in a healthy state generally during quarter. One death from amyloid disease of liver, kidneys, and intestines following upon tuberculous caries.

DUNSHAUGHLIN; *Killeen*.—The district is very healthy. Only one case of scarlet fever.

DUNSHAUGHLIN; *Ratoath*, W.—Sanitary condition of the district is good.

KELLS; *Nobber*.—The general health of the district is satisfactory.

NAVAN; *Castletown*.—My district was remarkably healthy during the past half-year.

NAVAN; *Painestown*.—No epidemic disease during quarter. District in healthy and good sanitary condition.

OLDCASTLE; *Oldcastle*, W.—This district continues in a satisfactory condition, although the water supply in the town of Oldcastle is very defective.

TRIM; *Summerhill*.—Of the thirteen deaths in this district during the quarter only one died in the prime of life, and his death was due to consumption. Of the remainder, two were of infants, who did not long survive birth; the remaining ten were of old people, whose deaths occurred in most cases from the prevalent influenza.

Queen's County.

ABBEYLEIX; *Ballyroan*.—Had one case of diphtheria during the quarter.

ABBEYLEIX; *Durrow*.—Out of eleven deaths registered this quarter, four were of persons over 80 years. District in a very healthy condition.

ABBEYLEIX; *Rathdowney*.—The sanitary condition of district good.

MOUNTMELICK; *Clonaslee*.—The sanitary arrangements in my district are good, none of the diseases named in the abstracts being present.

MOUNTMELICK; *Clonygowan*, No. 1.—District healthy.

MOUNTMELICK; *Mountmellick*, W.—Sanitary arrangements in good order.

ROSCREA; *Borris-in-Ossory*.—The health of this district has been fair during the past quarter.

Westmeath County.

ATHLONE; *Glassan*.—Health of district very satisfactory.

BALLYMAHON; *Ballymore*.—One death has been registered of a man whose age was stated to be 104 years. I knew him well, and, judging from appearances, he looked to be a very old man; otherwise I have no proof as to his great age. One case of pulmonary tuberculosis registered during quarter.

MULLINGAR; *Ballynacarrigy*.—In the months of October and November there occurred many cases of articular influenza, accompanied by tonsillitis. There were a few cases of scarlet fever in October, which, fortunately, were confined to a small area, and did not spread.

MULLINGAR; *Castletown Gæghegan*.—The district is in a fair sanitary condition. Deaths of aged people were very numerous during the quarter owing to a mild form of influenza prevailing in the district during the quarter.

MULLINGAR; *Milltown*.—There was a fatal case of tuberculosis at the late age of 67 years. Within the past fortnight the Grippe epidemic has made its appearance. There was no death from cancer.

MULLINGAR; *Mullingar, W.*—Sanitary arrangements fairly good.

MULLINGAR; *Multyfarnham*.—One case of diphtheria which made a good recovery. General health of district good.

TULLAMORE; *Kilbeggan*.—Sanitary arrangements, etc., in district good.

Wexford County.

GOREY; *Coolgreany*.—Scarlet fever of a mild type has been epidemic, and there have been a great many cases of epidemic jaundice.

GOREY; *Gorey, W.*—There has been an epidemic of scarlet fever in the district during the quarter.

GOREY; *Killenagh and Wells*.—One case of scarlatina of a mild form occurred during the quarter. Part of this district is badly supplied with drinkable water, the inhabitants using chiefly marl-hole water.

NEW ROSS; *Fethard, No. 1*.—Sanitary condition of the district satisfactory. No infectious disease during the quarter.

WEXFORD; *Bannow*.—Two of the three deaths from cancer were certified as "malignant pyloric obstruction" in men æt 77 years and 78 years.

Wicklow County.

BALTINGLASS; *Baltinglass, No. 1, W.*—One case of diphtheria during the quarter.

BALTINGLASS; *Kiltegan*.—I beg to report that the outbreak of scarlatina and diphtheria has now abated, the district being now quite free from both diseases. The majority of deaths were of very old people.

NAAS; *Blessington*.—Generally speaking, the health of the district has been good. Throughout the quarter no epidemic present.

RATHDOWN; *Bray, No. 1*.—Births and deaths about the average.

RATHDOWN; *Delgany*.—Several cases of typhoid fever and gastric complaints due to drinking bad water.

RATHDRUM; *Annamoe*.—District healthy during the quarter.

RATHDRUM; *Aughrim*.—One case of diphtheria reported.

II. PROVINCE OF MUNSTER.

Clare County.

BALLYVAGHAN; *Ballyvaghan, W.*—Health of district good.

CORROFIN; *Corrofin, W.*—Influenza of mild type prevalent during last two months of quarter.

ENNIS; *Crusheen*.—Health of district good.

ENNIS; *Newmarket*.—The district has been practically free from all forms of zymotic disease, and, with the exception of chest troubles, which result from the cold, damp condition of the atmosphere at this time of the year, the health of the district has been satisfactory.

ENNISTIMON; *Ennistimon, W.*—The sanitary arrangements are satisfactory. Influenza is very prevalent.

ENNISTIMON; *Roadford*.—District has been very healthy. Sanitary arrangements satisfactory.

KILLADYSERT; *Ballynacally, W.*—One case of diphtheria.

KILLADYSERT; *Labasheeda*.—Health of the district continues good.

KILRUSH; *Carrigaholt*.—Three cases of scarlet fever at eastern extremity of district for past fortnight; otherwise health of district very good.

KILRUSH; *Kilkee*.—Sanitary state of town of Kilkee not good, owing to defective state of sewerage.

KILRUSH; *Kilmihil*.—Sanitary arrangements good.

KILRUSH; *Kilrush, W.*—Health of district very good.

LIMERICK; *Bridgetown*.—District healthy.

LIMERICK; *Coolacasey*.—The district was very healthy during the quarter, and the sanitary condition is satisfactory.

SCARRIFF; *Feakle*.—Health of district good.

SCARRIFF; *Mountshannon, W.*—District continues in a healthy state.

SCARRIFF; *Quin*.—The health of the district continues good. Vaccination has been backward, due to very inclement weather. A mild type of influenza has been prevalent.

Cork County and County Borough.

BANDON; *Innishannon*.—The district has been free from infectious diseases.

BANTRY; *Bantry, W.*—The sanitary condition of district is fairly good. No case of malignant disease.

BANTRY; *Durrus and Kilerohane*.—District very healthy. No cases of tuberculosis or cancer.

BANTRY; Glengariff.—The district is free from epidemic diseases. A peculiar form of laryngitis was prevalent during the month of December among school-children; origin not traced.

BANTRY; Kealkill.—Sanitary condition good. District free from infectious diseases.

CASTLETOWN; Kilcatherine.—District healthy. No case of cancer.

CLONAKILTY; Clonakilty, W.—Whooping-cough appeared near end of December.

CLONAKILTY; Rosscarbery.—There is an epidemic of whooping-cough in the district at present.

CORK; Blarney.—Measles of a mild nature broke out in the Rathduff portion of the district about the middle of December; in consequence of which I considered it necessary to have the National School at the place closed up.

CORK; Carrigaline, No. 1.—Vaccination has been good considering the inclemency of the weather.

CORK; Cork Rural, No. 2.—Measles very prevalent.

CORK; Douglas.—Measles prevalent in the district.

DUNMANWAY; Coolmountain.—This district continues in a healthy condition, and free from infectious disease.

DUNMANWAY; Dunmanway, W.—The sanitary condition of the district continues fairly satisfactory. There was one death certified as being due to pulmonary tuberculosis (duration two years), but the disease was not, I believe, contracted in the district.

FERMOY; Rathcormack.—The health of district has been exceptionally good during the quarter.

KANTURK; Milford.—The district is healthy.

KILMALLOCK; Charleville.—The district is very healthy.

KINSALE; Ballyfeard.—Health of district, with the exception of mild cases of bronchial affections, good. One severe case of double pleuro-pneumonia treated; made a good recovery. One death at 86, one at 79, one at 77, and one at 70 years registered.

MALLOW; Ballyclogh.—District healthy.

MALLOW; Buttevant.—The sanitary state of district is satisfactory.

MALLOW; Rahan.—District has been free from infectious diseases during past quarter.

MIDDLETON; Cloyne.—Whooping-cough of a mild type prevalent in the district. There were three deaths from consumption.

MIDDLETON; Middleton, No. 2.—The health of the district has been very good during the quarter.

MIDDLETON; Walshtownmore East.—There were two cases of diphtheria during the quarter; one died, the other was sent to the District Hospital and recovered. I attribute the cause of the disease to the pollution of the wells by surface water on account of the recent heavy rains.

MITCHELSTOWN; Mitchelstown, No. 1, W.—District healthy.

SKIBBEREEN; Dromdaleague.—District healthy.

SKULL; Goleen.—The district is in a fairly healthy condition. There is no pure water in Goleen village, and no sewerage system. This is a source of grave danger.

Kerry County.

CAHERSIVEEN; Caher, W.—District healthy.

CAHERSIVEEN; Darrynane.—The district is in a fairly good sanitary condition, except the defective sewerage in the village of Waterville. There is no form of zymotic disease at the present time.

CAHERSIVEEN; Emlagh.—The sanitary state of the district is fairly good.

CAHERSIVEEN; Glanbehy.—There was one death from cancer. Sanitary state of district fairly good.

CAHERSIVEEN; Valencia.—District very healthy. Four of the five deaths registered are those of persons whose average age is 88½ years.

DINGLE; Anascaul.—The district is healthy. Four persons suffering from phthisis and two from tuberculous disease of bones in the district.

DINGLE; Castlegregory.—There were two cases of typhoid fever in the district during the quarter.

DINGLE; Dingle, W.—The district has been in a healthy condition for the last three months. No epidemic.

DINGLE; Ventry.—The dwelling-houses are, in the majority of cases, in a very unsanitary condition. Manure and liquid manure are accumulated too near the dwellings, and animals are in a good many cases kept in the kitchen.

KENMARE; Tuosist.—District in good sanitary condition notwithstanding the extreme poverty of the people.

KILLARNEY; Coom.—District healthy during past quarter.

KILLARNEY; Killorglin.—Typhoid fever, which was prevalent in October, has now almost disappeared. Water supply faulty.

KILLARNEY; Milltown.—Vaccination very good for past quarter.

KILLARNEY; Molahiffe.—One death from typhus fever; no more cases in the district. Coughs and colds very prevalent. Sanitary arrangements fairly good.

LISTOWEL; Ballyhorgan.—Sanitary state of district good.

LISTOWEL; Ballylongford.—District healthy for quarter. No case of contagious disease. The death of an old woman registered at 99 years of age. No death from consumption.

LISTOWEL; Listowel, W.—An epidemic of typhus fever has recently occurred in urban district, due to overcrowding.

TRALEE; Brosna, No. 1.—District healthy.

TRALEE; Castlemaine.—The health of the district continues very good.

TRALEE; Kilgobban.—District healthy.

Limerick County and County Borough.

CROOM; Castletown.—District free from zymotic disease.

KILMALLOCK; Bruff.—The housing of the poor in this town is in many cases as wretched as it is well-nigh possible to imagine. The common lodging-houses are in many cases dirty. The sewerage is unsatisfactory at the rear of the houses in a lane and 3 cases of diphtheria have occurred there lately.

KILMALLOCK; Bruree.—Two cases of scarlatina, one of which developed diphtheria (laryngeal); otherwise district remarkably free from the usual winter colds and complications.

KILMALLOCK; Hospital.—District fairly healthy. Some few cases of scarlatina, but no deaths from same.

KILMALLOCK; Kilfinnane.—District healthy.

KILMALLOCK; Kilmallock, W.—Bronchial diseases of a mild type prevalent during past month. District otherwise healthy.

LIMERICK; Annacotty.—Sanitary arrangements very fair. District very healthy.

LIMERICK; Caherconlish.—Sanitary condition good.

LIMERICK; Limerick, No. 3.—The health of the district has been good, and the sanitary arrangements fairly satisfactory.

LIMERICK; Moroe.—District generally in good sanitary condition. Death-rate low. No death from tuberculous disease nor from cancer during quarter.

LISTOWEL; Glin.—I am glad to be in a position to state that the public health was excellent in this district during the quarter just closed. Save two cases of pulmonary tuberculosis, there was no infectious disease in district during the last three months.

MITCHELSTOWN; Galbally.—District very healthy.

MITCHELSTOWN; Mitchelstown, No. 2.—District healthy.

NEWCASTLE; Ardagh.—The sanitary state of the district is pretty fair. One death at 100 years of age registered.

NEWCASTLE; Feenagh.—The sanitary arrangements are fairly good. Scarlatina of a mild type has been prevalent during the quarter.

RATHKEALE; Askeaton.—During the past quarter there was one case of scarlatina, very mild, in the district. There were two deaths from cancer—one in the stomach and the other in axilla and liver.

RATHKEALE; Pallaskenry.—Excessive humidity in the air during this quarter, and consequently numerous ailments of the respiratory organs.

RATHKEALE; Rathkeale, No. 1, W.—Deaths 17, of which 8 occurred in the Union Hospital, principally due to old age. There was unusual exemption from diseases due to climatic causes and from epidemic or contagious diseases. The mortality in the rural and urban district proper was only 9, and only one case of epidemic diarrhoea in a large populous town during a tropical autumn.

RATHKEALE; Rathkeale, No. 2.—My district was in a very healthy condition. With the exception of five cases of scarlatina in one house, it was free from all contagious diseases.

TIPPERARY; Grean.—District healthy.

Tipperary County, North Riding.

BORRISOKANE; Borrisokane, W.—District healthy. There were nine uncertified deaths registered, all of persons over 70 years of age.

BORRISOKANE; Terryglass.—District was healthy during quarter.

NENAGH; Nenagh, W.—One case of scarlatina in rural district removed to hospital. Otherwise district healthy.

NENAGH; Newport.—Whooping-cough prevalent in this district during past two months.

NENAGH; Portroe.—District in a healthy condition.

NENAGH; Silvermines.—One death from pulmonary tuberculosis registered.

NENAGH; Toomyvara.—There was a continuation of the diphtheria outbreak during the quarter; it has now subsided.

THURLES; Thurles, W.—Health of district normal.

Tipperary County, South Riding.

CALLAN; Ballingarry.—The public health of the district during the quarter ended was very good and was free from all forms of infectious disease.

CALLAN; Mullinahone.—Health of district fairly good. There were cases of influenza throughout the district and 2 cases of scarlatina recently; otherwise district very healthy. Two deaths from pulmonary tuberculosis registered during the quarter. No case of cancer.

CARRICK-ON-SUIR; Garranigibbon.—The health and sanitary condition of the district are satisfactory.

CASHEL; Killenaule.—The health of the district has been very good during last quarter; no infectious diseases. Excepting some overcrowding in poorer parts of town, sanitary condition is fairly good.

CASHEL; Kilpatrick.—District healthy.

CLOGHEEN; Ardfinnan.—Owing to scarlatina there were only two vaccinations.

CLOGHEEN; Caher.—The sanitary state of district is very good.

CLOGHEEN; Clogheen, W.—District free from epidemic diseases.

CLONMEL; Kilsheelan, No. 1.—District healthy.

TIPPERARY; Bansha.—District healthy.

TIPPERARY; Cappagh.—The district is healthy.

TIPPERARY; Emly.—The health of the district is good.

URLINGFORD; Kileooly.—The sanitary arrangements in district are good and well observed by the people in general. The district was very healthy during past quarter.

Waterford County and County Borough.

CARRICK-ON-SUIR; Rathgormuck.—There were two cases of diphtheria during the quarter, but otherwise we are free from infectious disease. The sanitary condition of the district is satisfactory.

CLONMEL; *Ballymacarbry*.—Sanitary condition good. Very little sickness during quarter. One death (male) registered; age 92 years.

CLONMEL; *Kilsheelan, No. 2*.—District healthy.

DUNGARVAN; *Dungarvan, W*.—There were some cases of scarlatina and diphtheria in the district during the past quarter.

DUNGARVAN; *Whitechurch*.—One case of enteric fever during quarter.

LISMORE; *Ballyduff*.—Sanitation and general health of district very satisfactory.

WATERFORD; *Kilmeadan*.—Health of district continues very good. Sanitary condition good.

WATERFORD; *Waterford, Urban, No. 1, W*.—The sanitary arrangements in parts of the district are still bad; improvement is, however, being gradually brought about. Domestic and public scavenging leave much to be desired. The health of the district has been comparatively good. There was practically no infectious disease.

WATERFORD; *Woodstown*.—The health and sanitary condition of the district are good. No new cases of pulmonary tuberculosis occurred during past quarter.

III. PROVINCE OF ULSTER.

Antrim County.

ANTRIM; *Crumlin*.—This district has been particularly healthy these last two quarters, the death-rate being greatly below the average.

ANTRIM; *Doagh*.—There was a number of mild cases of scarlatina. Three cases of enteric fever occurred during the quarter; otherwise the district was fairly free from disease.

ANTRIM; *Randalstown*.—Three deaths from cancer and two from tuberculous disease (all forms) registered during the quarter.

ANTRIM; *Templepatrick*.—The sanitary arrangements of the district (with few exceptions) are good. There have been a few cases of diphtheria, most of which have been sent to hospital for treatment.

BALLYCASTLE; *Ballycastle, W*.—Whooping-cough has been very prevalent in the district during the quarter. One death from it. There were two cases of scarlet fever. District otherwise healthy.

BALLYCASTLE; *Cushendall*.—The health of the district is very good; not a single case of any infectious disease. The sanitary arrangements of the village of Cushendall are excellent. The cause of death in six of the deaths registered was senile decay.

BALLYMENA; *Ahoghill*.—Birth-rate lowest for the past ten years.

BALLYMENA; *Ballymena, W*.—A few scattered cases of scarlatina of a mild type have occurred during the quarter.

BALLYMENA; *Broughshane*.—Some cases of scarlatina of a mild type. Otherwise the health of district is good.

BALLYMENA; *Clogh*.—District fairly healthy. Sanitary arrangements good. Two cases of scarlatina during December.

BALLYMENA; *Galgorm*.—District healthy; no zymotic disease.

BALLYMENA; *Glenwhirry*.—Public health good. Sanitation fair.

BALLYMENA; *Portglenone*.—The health of the district is very good.

BALLYMENA; *Toome*.—Health of the district satisfactory.

BALLYMONEY; *Dirraw*.—Almost 50 per cent. of deaths registered were of persons over 65 years of age. One death registered of a person aged 102 years, and, I understand, authenticated by baptismal registration.

BELFAST; *Belfast, Rural, No. 3*.—No deaths from cerebro-spinal fever occurred during the quarter.

BELFAST; *Belfast, Rural, No. 4*.—The health of the district is exceptionally good.

LARNE; *Ballycarry*.—Sanitation of district fairly good. There is a severe epidemic of diphtheria; four deaths registered therefrom. Scarlet fever is prevalent in part of district; no deaths therefrom as yet; and also some cases of measles—one death registered.

LARNE; *Larne, W*.—Diphtheria prevalent.

LARNE; *Waterfoot*.—Sanitary arrangements of the district are very good. No infections of any kind.

LISBURN; *Dunmurry*.—The sanitary condition of this district good; No epidemic of any kind.

LISBURN; *Glenavy*.—There has been very little sickness during quarter. Sanitary arrangements and general condition of the district satisfactory.

LISBURN; *Knocknadona*.—District healthy.

Armagh County.

ARMAGH; *Armagh, W*.—One case of tetanus in the district. Birth-rate and death-rate very low in urban district.

ARMAGH; *Blackwatertown*.—Whooping-cough is prevalent.

ARMAGH; *Markethill*.—Pneumonia has been very prevalent during the past quarter.

ARMAGH; *Rich Hill*.—Pneumonia of a mild type and quinsy have been very prevalent this quarter. There were two deaths registered this quarter from phthisis pulmonalis, one was of an ex-soldier; the other was of a very delicate child.

ARMAGH; *Tynan*.—District in a very healthy condition.

LURGAN; *Lurgan, No. 1, W*.—Whooping-cough has been very prevalent during the quarter, and 17 deaths have been registered from it. The epidemic is now nearly over. A number of cases of scarlet fever occurred, but happily an epidemic was averted.

LURGAN; *Lurgan, No. 2*.—The district is in a good healthy condition, and free from any infectious disease.

NEWRY; *Mullaghglass*.—There has been an outbreak of diphtheria in the village of Bessbrook; nine persons, children and adults, affected. All were removed to hospital; one death in hospital; no case since 6th December, 1911. Sanitary defects attended to.

Belfast County Borough.

BELFAST; *Belfast, Urban, No. 4, W.*—No deaths from cerebro-spinal fever.

BELFAST; *Belfast, Urban, No. 5.*—No outbreak of any infectious disease.

BELFAST; *Belfast, Urban, No. 9.*—No deaths from cerebro-spinal fever.

BELFAST; *Belfast, Urban, No. 13.*—No deaths from cerebro-spinal meningitis.

Cavan County.

BAILIEBOROUGH; *Bailieborough, W.*—District in fairly healthy condition.

BAILIEBOROUGH; *Shercock.*—District healthy.

BAILIEBOROUGH; *Termon.*—Sanitary condition good.

CAVAN; *Killashandra.*—District healthy. The branch of the Women's National Health Association is doing good work distributing leaflets on hygiene and visiting the people partly under my directions.

COOTEHILL; *Tullyvin.*—There were twelve deaths registered during the quarter of persons over 70 years, including three who were over 80 years.

ENNISKILLEN; *Hollywell, No. 2.*—The sanitary condition of the district is fairly good. There is no infectious disease of any kind at present. Of the ten deaths registered eight were of persons aged over 70 years. There were two deaths from pulmonary tuberculosis and two from cancer.

GRANARD; *Scrabby, No. 1.*—Health of district fairly good. One death from laryngeal tuberculosis in a man over 65 years.

OLDCASTLE; *Ballyjamesduff.*—District healthy.

OLDCASTLE; *Virginia.*—District healthy.

Donegal County.

BALLYSHANNON; *Ballintra.*—The sanitary condition of district good. Of the six deaths registered during the quarter five were of persons aged 70 years and upwards.

DONEGAL; *Donegal, W.*—Whooping-cough prevalent.

DONEGAL; *Dunkineely.*—No epidemic of any kind, and district very healthy.

DONEGAL; *Laghy.*—District healthy; no epidemic during the quarter.

DONEGAL; *Mountcharles.*—District healthy, except an outbreak of diphtheria in two houses. Two deaths from diphtheria during the quarter.

DONEGAL; *Pettigoe.*—There have been a few cases of whooping-cough; otherwise the district has been generally healthy.

DUNFANAGHY; *Crossroads.*—Two deaths from diphtheria occurred in the district during the quarter.

DUNFANAGHY; *Dunfanaghy, W.*—District healthy.

GLENTIES; *Ardara.*—District healthy.

GLENTIES; *Carrick.*—Mumps is prevalent in parts of the district.

GLENTIES; *Doocharry.*—District healthy.

GLENTIES; *Dunglow, No. 2.*—The district is healthy, considering the condition of the houses of the poorer and even "comfortable" classes. There has been no epidemic. Phthisis is abundant.

GLENTIES; *Glenties, W.*—Health of the district satisfactory for the quarter. Consumption or phthisis accounts for four deaths in the case of four persons at ages from 18 to 32 years. This disease is becoming the most prevalent and undoubtedly the most dreadful scourge among the people.

GLENTIES; *Killybegs.*—District healthy.

INISHOWEN; *Buncrana.*—District healthy.

INISHOWEN; *Clonmany.*—District healthy.

INISHOWEN; *Malin.*—District healthy.

INISHOWEN; *Moville.*—District healthy.

LETTERKENNY; *Church Hill.*—District healthy.

LONDONDERRY; *Killea.*—District very healthy.

MILLFORD; *Fanad.*—District in healthy condition. One isolated case of diphtheria occurred, which was removed to hospital and recovered.

MILLFORD; *Rathmelton.*—There has been quite an extensive epidemic of mumps (parotitis) during this quarter.

MILLFORD; *Rathmullan.*—District has been healthy during quarter.

MILLFORD; *Rosguill.*—The improvements to dwelling-houses, undertaken in connection with the Parish Committee scheme of the Congested Districts Board, have in most cases been completed, which, if continued in subsequent years, will gradually effect a better sanitary condition of the houses of the small farmers generally. Bad housing in this district has been a fruitful cause of tuberculosis, especially of bones and joints. There was no case of infectious disease during quarter.

STRABANE; *Raphoe.*—District healthy. No epidemics in it during past quarter. Sanitary arrangements satisfactory.

STRANORLAR; *Cloghan.*—Sanitary arrangements satisfactory. Most of the deaths registered were of persons at an advanced age, one reaching 106 years.

STRANORLAR; *Killygordon.*—District satisfactory. No epidemics.

Down County.

BANBRIDGE; *Ballyward.*—The district has enjoyed freedom from infectious diseases. A severe outbreak of gastric influenza occurred mostly amongst the dispensary and poorer patients. There were no deaths from the disease.

BANBRIDGE; *Banbridge, W.*—Scarlatina has been very prevalent, and, had it not been for the closing of the schools, the outbreak would have been much more serious.

BELFAST; *Castlereagh, No. 1.*—No deaths from cerebro-spinal meningitis.

DOWNPATRICK; *Ballynahinch*.—Both birth and death-rates have been very low during the quarter. One death registered at 95 years. There has not been any epidemic disease prevalent in the district.

DOWNPATRICK; *Downpatrick, W.*—Two deaths attributed to influenza.

DOWNPATRICK; *Killyleagh*.—During the months of October and November of last quarter there was an epidemic of measles in this district. There were more than 100 cases. Some of the cases were complicated with broncho-pneumonia, and three deaths were due to this complication.

DOWNPATRICK; *Portaferry*.—One case of diphtheria occurred, and a good many of whooping-cough in Cloghy, Kirkistown, and Ratallagh divisions of the district. Sanitary state good.

KILKEEL; *Kilkeel, No. 2, W.*—One case of scarlatina sent to hospital.

KILKEEL; *Rosstrevor*.—The sanitary arrangements of the district are very satisfactory both as regards ventilation and cleanliness. There have been no zymotic diseases, the health of the district being very good.

LISBURN; *Annahilt*.—The sanitary arrangements in the district are good.

LISBURN; *Ballylesson*.—Two cases of scarlatina were removed to hospital during the quarter.

LISBURN; *Drumbeg*.—Births under the average. Deaths above the average. One death from diphtheria in an isolated case occurred in October. No outbreak. One-third of the total number of deaths registered were of persons over 65 years of age.

LISBURN; *Hillsborough*.—District has been particularly healthy, except for an outbreak of enteric fever. This disease has now disappeared.

LISBURN; *Saintfield*.—General health good. Pulmonary tuberculosis apparently on increase. Two cases of enteric fever in Saintfield village.

LURGAN; *Moir*.—One case of œsophageal cancer. Whooping-cough has invaded the district, but is not very extensive yet. I fear, however, that this season will probably tend to increase and make it more grave. Up to the present it has caused no death, nor have I seen any case to cause me apprehension.

LURGAN; *Waringstown*.—Scarlatina appeared in the district in the middle of December in the part next the Banbridge district, and there have been now seven cases—all have been sent to the Union Hospital, except one, which has been kept at home and isolated. The cases are all mild. The clothing and houses have been disinfected after the removal of the patients to hospital. Whooping-cough has been in another part of the district, but there have been no deaths.

NEWRY; *Donaghmore*.—The health of the district is remarkably good and comparatively free from all forms of tuberculous disease. There has been one case of scarlatina reported since the last quarter.

NEWRY; *Newry, No. 2*.—One death from tuberculosis of appendix in Newry Hospital belonged to Newry No. 1 district (Urban); also one to each of two other dispensary districts.

NEWRY; *Rathfryland*.—The sanitary condition of the district of Rathfryland has been very much improved during the past few years.

NEWTOWNARDS; *Bangor*.—Sanitary arrangements, both urban and rural, very good. Measles prevalent during quarter; one death.

NEWTOWNARDS; *Comber*.—Health of district good. No epidemics. Sanitary arrangements generally very good and steadily improving.

NEWTOWNARDS; *Donaghadee*.—Health of the district good.

NEWTOWNARDS; *Greyabbey*.—Births and deaths about average. General health of district good. Two cases of diphtheria and three cases of scarlatina were notified in the district, but these were the only ones. No epidemic.

NEWTOWNARDS; *Kilmoód*.—No infectious disease in district.

NEWTOWNARDS; *Newtownards, W.*—There has been a good number of cases of measles in the district during the quarter. The epidemic is now almost over. The general health of the district has been good.

Fermanagh County.

BALLYSHANNON; *Church Hill*.—District healthy.

ENNISKILLEN; *Enniskillen, W.*—Sanitation fairly good.

ENNISKILLEN; *Florencecourt*.—Two cases of scarlet fever occurred during the second month of quarter.

ENNISKILLEN; *Holywell, No. 1*.—The sanitary condition of the district is fairly good. The only death registered was that of a woman aged 75 years. There has been no infectious disease during the past quarter.

IRVINESTOWN; *Clonelly*.—The health of the district is good.

IRVINESTOWN; *Ederney*.—District at present healthy.

IRVINESTOWN; *Irvinestown, W.*—Only one death registered from pulmonary tuberculosis. This was, I believe, a case of direct infection. One death from whooping-cough.

LISNASKEA; *Derrylin*.—The sanitary condition of the district is very much at a standstill, if one discounts the influence of diminution of the population. There has been an unusually low disease incidence and death-rate during the quarter—five-sixths of the deaths being of persons over 65 years old.

LISNASKEA; *Lisnaskea, W.*—Sanitary state of district fair. Death rate low during quarter. Majority of deaths were of persons aged 60 years and upwards.

Londonderry County and County Borough.

COLERAINE; *Aghadowey*.—Three deaths registered from phthisis.

COLERAINE; *Garvagh*.—No epidemic during quarter. Health of district very good.

COLERAINE; *Kilrea*.—District healthy. Of the two deaths from scarlet fever registered during the quarter one occurred in the quarter ended the 30th September last, and there are no other cases of the disease in this district.

COLERAINE; *Portstewart*.—No disease was prevalent during the past quarter.

LIMAVADY; *Ballykelly*.—Two deaths registered from tuberculous trouble; one having occurred in a house with six other children, the house being in a wretched condition. It is now condemned as unfit for human habitation.

LIMAVADY; *Bellarena*.—District free from infectious disease.

LIMAVADY; *Limavady, W.*—Health of district very good.

MAGHERAFELT; *Moneymore*.—At the beginning of December one case of diphtheria took place, believed to have been imported from an outside district; strictly isolated; no spread. About the same time three cases of scarlatina appeared, at different centres; two removed to hospital and one isolated; no extensions. Near the end of month, however, one fatal case occurred, having no apparent or traceable connection with the others. District now seems to be free from infectious disease.

Monaghan County.

CARRICKMACROSS; *Carrickmacross, W.*—District in fair sanitary condition. In portions of rural district there is at present a number of cases of whooping-cough. In the urban district during the quarter there were a couple of cases of scarlatina of a mild type.

CARRICKMACROSS; *Donaghmoynne*.—Whooping-cough present in one part of district and accounts for the death of an infant. One of those who died from phthisis contracted the disease in the United States of America.

CASTLEBLAYNEY; *Castleblayney, W.*—Among the deaths registered during the quarter, three were stated to have occurred at 80 years, one at 81, one at 86, two at 87, one at 90, and one at 103. There is a recurrence of whooping-cough, and cases of influenza are numerous.

COOTEHILL; *Dawsonsgrove*.—The sanitary condition of the district is fair. One case of scarlatina occurred during quarter.

MONAGHAN; *Castleshane*.—The district is sanitary and there has been no epidemic of any kind.

MONAGHAN; *Emyvale*.—District for quarter ended has been free from any serious outbreak. Two cases of scarlatina occurred, but were mild. Four death from tuberculous disease. Three were phthisis; one patient over 50 years.

MONAGHAN; *Kilmore*.—I have seen a few cases of whooping-cough during past ten days.

MONAGHAN; *Monaghan, W.*—The sanitary arrangements of this district remain bad. There has been no epidemic during the past quarter.

MONAGHAN; *Scotstown*.—There have been nine cases of scarlatina confined to two families. The health of the district is satisfactory.

Tyrone County.

CASTLEDERG; *Castlederg, W.*—Sanitary state of district satisfactory. No epidemics of any kind.

CASTLEDERG; *Drumquin*.—The sanitary arrangements in the district are satisfactory; none of the diseases named in the abstracts or other diseases prevalent.

CASTLEDERG; *Killeter*.—State of district healthy.

CLOGHER; *Aughnacloy*.—District generally healthy.

CLOGHER; *Ballygawley*.—Health of district good.

CLOGHER; *Fivemiletown*.—The health of the district was pretty good during the quarter, except for some cases of whooping-cough.

COOKSTOWN; *Coagh*.—Two cases of a mild type of scarlatina occurred during the quarter; otherwise district very healthy.

COOKSTOWN; *Pomeroy*.—Sanitary arrangements fairly satisfactory.

DUNGANNON; *Benburb*.—Whooping-cough very prevalent. Sanitary condition of district good.

DUNGANNON; *Caledon and Ballymagran*.—Public health good. No infectious cases in district during current quarter.

DUNGANNON; *Clonavaddy*.—District in fairly good sanitary condition, none of the diseases named in the abstracts being prevalent.

DUNGANNON; *Coal Island*.—There have been numerous cases of whooping-cough during the quarter.

IRVINESTOWN; *Trillick*.—The district is healthy.

OMAGH; *Dromore*.—The sanitary condition of the district is satisfactory, and the district generally healthy.

OMAGH; *Drumquin*.—The sanitary arrangements in the district are satisfactory. None of the diseases named in the abstracts or other diseases at present prevalent.

OMAGH; *Fintona*.—The health of the district has been exceptionally good during the past quarter. Only eleven deaths and six of these old persons from 70 to 87 years of age. The sanitary arrangements are satisfactory.

OMAGH; *Omagh, No. 1, W.*—Health of district good. The rural sanitary condition is unsatisfactory in outlying districts. There are periodical outbreaks of typhoid fever, scarlatina, and diphtheria, due to dirty houses, unsanitary surroundings, cess-pools, heaps of manure, and dirty byres.

OMAGH; *Omagh No. 2*.—District healthy for the past quarter.

OMAGH; *Sixmilecross*.—We have had two cases of typhoid fever and four of scarlatina; with the exception of these, the district has been healthy. The sanitary arrangements in the district are satisfactory; there is still lack of cleanliness in a number of the cottages.

IV. PROVINCE OF CONNAUGHT.

Galway County.

CLIFDEN; *Inishbofin*.—Sanitary state of district good.

CLIFDEN; *Roundstone, No. 1*.—One death, of a child under one year, occurred from whooping-cough. District is now fairly healthy.

GALWAY; *Galway, No. 3 (Arran)*.—Health of district very good.

GALWAY; *Moycullen*.—The sanitary arrangements are very fair.

GALWAY; Oranmore.—District continues healthy.

GALWAY; Spiddle.—Health of district continues satisfactory. There was one death from diphtheria—that of a child aged 14 months, who had just come from America.

GORT; Gort, W.—The health of the district during the quarter has been good.

GORT; Kinvarra.—The health of the district is good, fortunately; but the sanitary condition of the town of Kinvarra is deplorable.

LOUGHREA; Bullaun.—There were three deaths registered—one at 77 and two at 78 years of age.

LOUGHREA; Woodford.—Scarlatina was prevalent in October, but has entirely disappeared.

MOUNT BELLEW; Mount Bellew, W.—Health of district good. No fever. Sanitation fair.

OUGHTERARD; Cloonbur, No. 1.—Influenza prevalent.

OUGHTERARD; Lettermore.—There was a slight epidemic of whooping-cough this quarter, but no deaths occurred.

PORTUMNA; Portumna, No. 1, W.—District in a fairly good sanitary condition, and free from infectious disease, as far as I am aware.

TUAM; Tuam, No. 1, W.—Health of district was good during the quarter. There were some cases of acute pneumonia during November, mostly all confined to one quarter of the district. Sanitation improving.

TUAM; Tuam, No. 2.—District healthy during quarter. No deaths from tuberculosis.

Leitrim County.

BALLYSHANNON; Kinlough.—Number of deaths below the average. Of the 13 deaths registered, 9 of them were old-age pensioners, four of them being over 80 years of age.

CARRICK-ON-SHANNON; Drumshanbo.—Two cases of enteric fever occurred during the quarter. Both recovered. District healthy otherwise.

CARRICK-ON-SHANNON; Jamestown, W.—Two cases of scarlatina in district.

MOHILL; Carrigallen.—The health and sanitary state of the district have been fairly good during the quarter. Half the deaths were of persons over 65 years. Of the total deaths, were one of cancer at 68 years, one of rheumatism at 84 years, and three of pulmonary tuberculosis at 54 years, 31 years, and 29 years respectively.

MOHILL; Rinn.—The district is healthy, and free from epidemics.

MOHILL; Rowan.—No complaints regarding the sanitary condition of the district.

Mayo County.

BALLINA; Ballina, W.—During the quarter ten deaths were registered as due to different forms of tuberculosis, making a total of 31 deaths from that disease for the year 1911, compared with 37 deaths for year 1910. One death from cancer registered in the quarter, making a total of 7 deaths for the year 1911, compared with 17 for 1910. The mortality amongst infants under one year is high, 10 deaths being registered during

the quarter, making a total for the year 1911, of 41 deaths out of 439 births registered, compared with 38 deaths out of 505 births registered for the year 1910. Some cases of scarlet fever were reported in the district, but it did not spread to any extent.

BALLINA; Crossmolina.—Sanitary condition of district fair.

BALLINROBE; Ballinrobe, W.—Health of district remains good.

BALLINROBE; Cappaghduff.—The sanitary arrangements are not as satisfactory as I would wish. In some cases cattle are in houses and manure not removed.

BALLINROBE; Cong.—Health of district good.
BALLINROBE; Hollymount.—The general health of the people good during the quarter.

BELMULLET; Binghamstown, W.—Health of district satisfactory.

BELMULLET; Knocknalower.—There was a serious epidemic of influenza during quarter, and frequent cases of pneumonia. There were also two cases of typhoid fever without fatality. A case of diphtheria is being treated at present.

CASTLEBAR; Balla.—District healthy.

CASTLEBAR; Castlebar, No. 1, W.—Health of district fairly good.

CASTLEBAR; Castlebar, No. 2.—Sanitary arrangements are very primitive, but are showing improvement. In many houses cattle are kept in the kitchen, which latter is used as a sleeping apartment.

CLAREMORRIS; Ballyhaunis.—General health of district has been good. There was one case of simple continued fever, now convalescent, and a case presenting febrile symptoms which I sent to hospital. Tuberculous and rheumatic affections are, and will be, prevalent so long as arterial drainage is neglected. There was one death from epithelioma of lip and neck.

CLAREMORRIS; Claremorris, W.—One death registered at age of 105 years. One case of tuberculosis, one case of cancer; otherwise there is nothing remarkable in the return for this quarter. We have no epidemic disease in the district.

KILLALA; Ballycastle.—The death of one person was registered whose age was stated to be 100 years. The informant told me his mother was 34 years old in the year 1845, when she married. There has been an epidemic of whooping-cough in the district during the past quarter.

KILLALA; Killala, W.—The health of the district was very satisfactory during the quarter.

SWINEFORD; Foxford.—Two cases of diphtheria and one of scarlet fever occurred during the quarter.

WESTPORT; Achill.—Sanitary state and general health of district good.

WESTPORT; Ballycroy.—The epidemic of acute anterior polio-myelitis, to which I drew attention a few quarters ago, still continues; no case fatal, but results are very bad.

WESTPORT; Islandeady.—The sanitation of the district is good.

WESTPORT; Louisburgh.—The sanitary condition of district has been very much improved during quarter, and practically free from infectious disease with the exception of one case of diphtheria, which recovered.

WESTPORT; *Newport*.—One death from cancer registered; also the death of a man who was over 100 years of age. Health of district very good. The sanitation of the town is in a very bad condition.

Roscommon County.

ATHLONE; *Brideswell*.—Health of district good; sanitation fair. The unsanitary conditions drawn attention to by reports are in a great many instances repeated in a similar manner.

ATHLONE; *Kiltoom*.—The sanitary condition of this district is in a fairly satisfactory condition.

BOYLE; *Boyle, No. 1, W.*—There was a mild epidemic of scarlet fever.

CARRICK-ON-SHANNON; *Aughrim*.—The sanitary condition of the district is satisfactory.

CASTLEREAGH; *Castlereagh, W.*—Sanitation of district improving.

CASTLEREAGH; *Loughglinn*.—The health of the district has been most favourable, and free from disease. No infectious fevers; no carcinoma or cancer.

STROKESTOWN; *Roosky*.—The sanitary arrangements of the district are fairly satisfactory. Twelve deaths of persons over 65 years of age, five deaths from tuberculous disease, and two deaths from cancer were registered during quarter.

STROKESTOWN; *Strokestown, W.*—One death occurred from cerebro-spinal meningitis.

Sligo County.

BOYLE; *Gurteen*.—District healthy. Sanitary condition improving.

DROMORE WEST; *Castleconor*.—The sanitary state of the district is good with the exception of the town of Enniscrone, which comprises over 70 houses, which cannot be properly drained owing to the want of a main sewer to drain into.

DROMORE WEST; *Easky, W.*—Health of district very good. Only eight deaths registered; most unusual. A great number of new buildings throughout district for cattle, pigs, &c., so that the sanitary condition of the people is much improved. No case of infectious disease during quarter.

DROMORE WEST; *Skreen*.—District sanitary, and general health good.

SLIGO; *Ballymote*.—One case of typhoid fever during quarter. District otherwise healthy.

SLIGO; *Carney, No. 1*.—There have been some few cases of typhoid fever in the district; one death. There have been also some cases of scarlatina, and one of diphtheria; all recovered.

SLIGO; *Carney, No. 2*.—Health of district good.

SLIGO; *Collooney*.—Two cases of diphtheria during quarter; both recovered. One case of scarlatina.

SLIGO; *Riverstown*.—District very healthy.

TOBERCERRY; *Aclare*.—Sanitary arrangements are improving. Two cases of scarlet fever occurred during quarter.

TOBERCERRY; *Coolaney*.—Sanitation satisfactory.

Vaccination Statistics.

Of the 101,758 children whose births were registered in Ireland during the year 1911, there were 73,856 returned as having been successfully vaccinated; 2,990 as having had their vaccinations postponed; 151 were returned as unsuccessful, on the ground of constitutional insusceptibility of the vaccine disease; 6,434 as having died before vaccination; 4,518 were returned as "unaccounted for owing to removal from district or otherwise," and 13,809 were reported as defaulters who had not been granted an extension of time under Form B., First Schedule. When expressed in percentages, it appears that 72·6 per cent. of the total were reported as successfully vaccinated; that 2·9 per cent. were postponed on account of the children being unfit for vaccination; that 0·2 per cent. were insusceptible of vaccination; that 6·3 per cent. died before they were vaccinated; that 4·4 per cent. were "unaccounted for owing to removal from district or otherwise;" and that 13·6 per cent. were returned as defaulters.

The following table gives the condition as regards vaccination of the children whose births were registered in the year 1911, as compared with each of the preceding 7 years:—

TABLE I.—Showing particulars regarding the Vaccination of the Children whose Births were registered in Ireland during each of the eight years 1904–1911, with their percentage to the total Births registered during each year.

Years.		Successful Vaccina- tions. (Form A, First Schedule).	Vaccina- tions postponed. (Form B, First Schedule).	Insusceptible of Vaccine Disease (Schedule D).		Died before Vaccina- tion.	Unac- counted for owing to removal from District or other- wise.	De- faulters who have not been granted an ex- tension of time under Form B, First Schedule.	Total Births registered.
				On the ground of Constitu- tional Insuscep- tibility of the Vaccine Disease.	In respect of the Children already having had Small- pox.				
1904	Numbers ..	84,068	2,184	118	2	7,105	3,774	6,560	103,811
1905	Numbers ..	84,326	2,505	90	—	6,624	3,625	5,662	102,832
1906	Numbers ..	83,223	2,555	121	—	6,955	4,229	6,453	103,536

1909	Numbers ..	80,455	2,715	118	—	6,651	3,884	8,936	102,759
1910	Numbers ..	78,839	2,754	83	—	6,680	3,694	9,913	101,963
1911	Numbers ..	73,856	2,990	151	—	6,434	4,518	13,809	101,758
1904	Percentage ..	81·0	2·1	0·1	0·0	6·9	3·6	6·3	100·0
1905	Percentage ..	82·0	2·4	0·1	—	6·5	3·5	5·5	100·0
1906	Percentage ..	80·4	2·5	0·1	—	6·7	4·1	6·2	100·0
1907	Percentage ..	80·4	2·3	0·1	—	6·6	3·5	7·1	100·0
1908	Percentage ..	78·9	2·5	0·1	—	6·7	3·2	8·6	100·0
1909	Percentage ..	78·3	2·6	0·1	—	6·5	3·8	8·7	100·0
1910	Percentage ..	77·3	2·7	0·1	—	6·6	3·6	9·7	100·0
1911	Percentage ..	72·6	2·9	0·2	—	6·3	4·4	13·6	100·0

From a comparison of the figures in Abstract I. (page 4) relating to the provinces, it appears that the successful cases of vaccination in the province of Leinster numbered 16,651, or 61·0 per cent. of the total births registered; that in Munster the successful vaccinations numbered 16,512 or 70·2 per cent. of the total births registered therein; that in Ulster the successful vaccinations numbered 30,858 or 82·6 per cent. of the total births registered; and that in the province of Connaught the number of successful vaccinations reported was 9,835 or 72·3 per cent. of the total births registered.

Detailed information regarding vaccinations for the counties; superintendent registrars' districts (or poor law unions), arranged by provinces and counties; registrars' districts; and superintendent registrars' districts, arranged alphabetically, will be found in Abstracts I., II., III., and IV., respectively, appended to this Report. Extracts from the notes presented by the registrars are also published.

In the following tabular statement the number of successful vaccinations returned for each of the years 1882-1911 is given:—

TABLE II.—Showing the Number of Successful Primary Vaccinations in Ireland during each of the years 1882 to 1911. [Extracted from Quarterly Reports.]

Year.	Number of Successful Primary Vaccinations in each year.	Year.	Number of Successful Primary Vaccinations in each year.	Year.	Number of Successful Primary Vaccinations in each year.
1882	107,613	1892	89,527	1902	94,303
1883	106,961	1893	88,695	1903	95,955
1884	105,021	1894	107,204	1904	91,976
1885	102,680	1895	92,227	1905	89,394
1886	97,137	1896	88,817	1906	90,171
1887	96,866	1897	89,732	1907	89,207
1888	93,520	1898	87,169	1908	88,576
1889	92,621	1899	84,937	1909	86,799
1890	93,368	1900	91,150	1910	88,698
1891	92,237	1901	88,520	1911	84,011

The following table shows the number of deaths from small-pox registered in Ireland in each of the years 1864-1911:—

TABLE III.—Showing the Number of Deaths from Small-pox registered in Ireland in each of the 48 years, 1864 to 1911.

Year.	Number of Deaths registered from Small-pox.	Year.	Number of Deaths registered from Small-pox.	Year.	Number of Deaths registered from Small-pox.
1864	854	1880	389	1896	4
1865	461	1881	72	1897	3
1866	194	1882	129	1898	—
1867	21	1883	16	1899	1
1868	23	1884	1	1900	1
1869	20	1885	4	1901	2
1870	32	1886	2	1902	1
1871	665	1887	14	1903	40
1872	3,248	1888	3	1904	16
1873	504	1889	—	1905	5
1874	569	1890	—	1906	—
1875	535	1891	7	1907	1
1876	24	1892	—	1908	—
1877	71	1893	1	1909	—
1878	873	1894	72	1910	—
1879	672	1895	146	1911	—

It will be observed that the last record of mortality from small-pox in Ireland was in the year 1907, when one death was registered.

VACCINATION STATISTICS, IRELAND.

RETURN of Particulars relative to VACCINATION regarding the CHILDREN whose BIRTHS were registered during the year 1911 in the Provinces, Counties, Superintendent Registrars' Districts (or Poor Law Unions), and Registrars' Districts of Ireland.

ABSTRACT I.—PROVINCES AND COUNTIES.

Provinces and Counties.	Area in Statute Acres.	Population in 1911.	Successful Vaccina- tions up to 31st Dec., 1912, of Children whose births were registered in 1911 (Form A, First Schedule).	Vaccina- tions still postponed at 31st Dec., 1912, on ground of Children being unfit (Form B, First Schedule).	Insusceptible of Vaccine Disease (Schedule D).		Died before Vaccina- tion.	Unac- counted for owing to removal from District or other- wise.	De- faulters who have not been granted an ex- tension of time under Form B, First Schedule.	Total Births registered in 1911.
					On the ground of Constitu- tional Insuscep- tibility of the Vaccine Disease.	In respect of the Children having already had Small- pox.

WILLIAM J. THOMPSON,
Registrar-General.

GENERAL REGISTER OFFICE,
CHARLEMONT HOUSE,
DUBLIN, 23rd June, 1913.

APPENDIX.

EXTRACTS from the REGISTRARS' NOTES to the RETURNS of VACCINATIONS regarding the CHILDREN whose BIRTHS were registered in IRELAND in 1911.

The Registrars alone must be considered responsible for the opinions which they express.

I. PROVINCE OF LEINSTER.

CARLOW COUNTY.

CARLOW; *Clonegall*.—Strong feeling against vaccination in district owing to Anti-vaccination League.

CARLOW; *Fennagh and Myshall*.—The Guardians have decided not to prosecute defaulters.

DUBLIN COUNTY BOROUGH.

DUBLIN NORTH; *North City No. 2*.—Every effort was made to have the one case of insusceptibility successful; in fact, the child was inoculated on four different occasions and still proved insusceptible.

DUBLIN SOUTH; *South City No. 2*.—Vaccination has practically ceased for the past four months.

KILDARE COUNTY.

ATHY; *Athy*.—No action taken to enforce vaccination. Defaulters' lists regularly returned.

BALTINGLASS; *Baltinglass No. 2*.—Primary vaccination backward in the district. No recent primary vaccinations owing to prevalence of influenza.

NAAS; *Robertstown and Kilmeague*.—I notice that a number of people from reading local reports have got the idea that vaccination is not compulsory.

KILKENNY COUNTY.

KILKENNY; *Tullaroan*.—Vaccination well carried out in my district.

LONGFORD COUNTY.

GRANARD; *Scrabby No. 2*.—Vaccination backward, probably owing to the severe winter.

LOUTH COUNTY.

ARDEE; *Castlebellingham*.—I find no difficulty in getting the children brought in for vaccination.

DROGHEDA; *Drogheda No. 2*.—I am sure that most of the 41 returned in Col. 7 have been vaccinated; but as parents in many cases do not bring children back for inspection I must return them as defaulters.

MEATH COUNTY.

EDENDERRY; *Ballyboggan*.—All the children of 1911 have been successfully vaccinated.

KELLS; *Kilskeer*.—One defaulter since vaccinated.

NAVAN; *Painestown*.—The only defaulter has been vaccinated, but has not complied with the inspection regulation.

WESTMEATH COUNTY.

MULLINGAR; *Ballynacarrigy*.—Children not yet vaccinated, will be presented in April, and are of parents living at long distances from Depôt, or who have been ill and unable to present children in 1912.

MULLINGAR; *Mullingar*.—Number in Col. 6 accounted for by soldiers leaving district for places unknown.

WEXFORD COUNTY.

ENNISCORTHY; *Ferns*.—The Vaccination Act is not now enforced in this Union.

ENNISCORTHY; *Newtownbarry*.—Anti-vaccination League is very strong in district.

GOREY; *Coolgreany*.—Anti-vaccination agitation is accountable for the large number of defaulters.

GOREY; *Gorey*.—There is practically no vaccination done here at present.

GOREY; *Killenagh and Wells*.—I have registered only one vaccination in 1912. I performed no vaccination myself in 1912.

WEXFORD; *Bridgetown*.—The large number of defaulters is due to the fact that there is no pressure put on parents to have their children vaccinated.

WICKLOW COUNTY.

BALTINGLASS; *Baltinglass No. 1*.—Primary vaccination backward at present in the district. Vaccination postponed this year so far in consequence of prevalence of influenza.

RATHDRUM; *Arklow*.—Vaccination is very backward in this district, only 32 children being vaccinated during 1912.

RATHDRUM; *Newcastle*.—Many children were affected with urticaria during hot summer, and influenza and whooping-cough prevailed in the spring and winter. These conditions prevented vaccination being carried out to a large extent.

RATHDRUM; *Wicklow*.—Impossible to vaccinate children owing to a serious outbreak of measles and whooping-cough.

II. PROVINCE OF MUNSTER.

CLARE COUNTY.

ENNIS; *Newmarket*.—Vaccination has been effected without much difficulty, the only objection being having to come to the dispensary during frost or inclement weather.

KILRUSH; Kilkee.—Scarlet fever partly stopped vaccination, and widespread measles in the late autumn and early winter.

CORK COUNTY AND COUNTY BOROUGH.

CORK; Douglas.—Several have been vaccinated, but not inspected.

MALLOW; Buttevant.—The principal part of the removals occurred in the military changes from here. The one case of insusceptibility was vaccinated with fresh lymph on three separate occasions without success.

MIDDLETON; Cloyne.—Scarlatina prevalent in the district; vaccination was suspended for a considerable time.

MILLSTREET; Millstreet.—The two cases in Col. 6 were children of tramps born in the workhouse and left shortly after.

KERRY COUNTY.

DINGLE; Anascaul.—The Guardians of the Union have passed a resolution stating they would not have the vaccination laws put into force.

KENMARE; Kenmare.—Owing to chicken-pox vaccination was not carried out.

KILLARNEY; Killarney No. 1.—Vaccination very poor last year owing to constant rain.

LISTOWEL; Listowel.—Board of Guardians has declined to prosecute defaulters.

TRALEE; Ardfer.—No steps being taken to compel the children to be brought.

TRALEE; Brosna No. 2.—Owing to a resolution made by the Tralee Board that vaccination be not compulsory, parents are not complying with the vaccination law.

TRALEE; Castlemaine.—Vaccinations not complied with owing to resolution of the Guardians of the Tralee Union.

TRALEE; Tralee No. 1.—Vaccinations not carried out owing to measles in district for months past.

LIMERICK COUNTY AND COUNTY BOROUGH.

KILMALLOCK; Kilmallock.—The great majority of the children who left the district were born in the Kilmallock Workhouse.

TIPPERARY, SOUTH RIDING.

CARRICK-ON-SUIR; Garrangibbon.—Vaccination well attended to.

CASHEL; Kilpatrick.—Vaccination postponed owing to whooping-cough being prevalent in March, April, and December of 1912.

CLOGHEEN; Clogheen.—Vaccination is carried out well in this district, but there is considerable trouble in getting the children back for inspection at the 7th or 8th day.

WATERFORD COUNTY AND COUNTY BOROUGH.

KILMACTHOMAS; Bunmahon.—I have reported no defaulters for two years.

YOUGHAL; Ardmore.—Vaccination well attended to.

III. PROVINCE OF ULSTER.

ANTRIM COUNTY.

ANTRIM; Crumlin.—Vaccination has been much more satisfactory since the Clerk of the Union commenced sending warning notices on receiving my defaulters' list.

BALLYCASTLE; Croagh.—None object to vaccination.

BALLYMONEY; Dirraw.—Those in Col. 2 are eczematous and strumous children.

LISBURN; Dunmurry.—The one case of insusceptibility was vaccinated four times, each time with fresh lymph, and all with a negative result.

BELFAST COUNTY BOROUGH.

BELFAST; Belfast Urban No. 10.—Eleven of the defaulters have been reported as vaccinated, but no successful certificate received.

BELFAST; Belfast Urban No. 11.—Sixteen in Col. 1 have been reported to me by Vaccination Officer as vaccinated, but I have not received a medical certificate of successful vaccination from any. The "8 cases of insusceptibility of vaccination" are quite correct. Personally, I never pronounce a case as insusceptible till after at least three attempts, and I have obtained a successful result on the fifth attempt.

CAVAN COUNTY.

CAVAN; Cavan.—Numbers of children whom I have vaccinated have never been brought back to be inspected. I have not registered them as successful.

GRANARD; Scrabby No. 1.—Vaccination very backward, probably owing to the severe wet weather.

OLDCASTLE; Ballyjamesduff.—Parents are anxious to have their children vaccinated and, although there may be delay, they are eventually vaccinated.

OLDCASTLE; Virginia.—Children will be vaccinated at the opening of the season.

DONEGAL COUNTY.

DUNFANAGHY; Dunfanaghy.—Of those in Col. 7, some of the parents have asked time for various reasons, and probably but for the severe winter the children would have been vaccinated.

STRANORLAR; Cloghan.—Defaulters much reduced.

STRANORLAR; Killygordon.—Vaccination returns latterly have been very satisfactory.

DOWN COUNTY.

BANBRIDGE; Ballyward.—Of the 9 in Col. 2, 7 have been vaccinated during January. There is no trouble in getting the parents to submit their children to vaccination, and the lymph has given excellent results.

LISBURN; Drumbeg.—Percentage of deaths appears large, about 14·7; the majority are due to premature birth.

LISBURN; Saintfield.—Re cases in Col. 7; some may have been vaccinated and not registered. Am making all enquiries.

LURGAN; *Moir*.—Those in Col. 6 frequently are brought back and are vaccinated or certificate produced. Defaulters often caused by sickness in the houses, or by distance.

NEWRY; *Rathfriland*.—The Guardians of this Union have decided to prosecute defaulters no longer.

FERMANAGH COUNTY.

ENNISKILLEN; *Enniskillen*.—I consider the 37 children unvaccinated are due to District Council refusing to enforce Vaccination Acts.

LONDONDERRY COUNTY AND COUNTY BOROUGH.

COLERAINE; *Aghadowey*.—The number in Col. 2 (14) is large and due to the fact that erysipelas and measles towards the end of 1912 involved postponement.

COLERAINE; *Portstewart*.—The law governing vaccination is very well observed here.

MONAGHAN COUNTY.

MONAGHAN; *Emyvale*.—I consider that vaccination is very well attended to in my district. People delay sometimes in taking children out owing to weather, or in labouring time.

TYRONE COUNTY.

COOKSTOWN; *Stewartstown*.—One child postponed on account of eczema, five died, and one removed to Canada.

DUNGANNON; *Benburb*.—Several children died from whooping-cough before vaccination.

IV. PROVINCE OF CONNAUGHT.

GALWAY COUNTY.

BALLINASLOE; *Ahascragh*.—Vaccination only occasionally performed in this district.

BALLINASLOE; *Laurencetown*.—Of the defaulters, 2 were vaccinated but were not brought back for inspection.

GALWAY; *Spiddle*.—The case in Col. 7, although not officially certified, is unfit for vaccination (rash all over body).

GLENNAMADDY; *Dunmore*.—Children unfit, due to skin diseases.

TUAM; *Dunmore*.—Cases postponed owing to skin diseases.

LEITRIM COUNTY.

MOHILL; *Carrigallen*.—Six, I believe, were successfully vaccinated but were not brought back for inspection.

MAYO COUNTY.

BALLINA; *Ballina*.—The number of defaulters is large, and, I fear, will remain so until some prosecutions are ordered.

BALLINROBE; *Cappaghduff*.—Weather having been bad caused most of the defaulters.

BELMULLET; *Knocknalower*.—Skin disease prevalent in the district.

SWINEFORD; *Kiltimagh*.—Owing to the early and cruel winter several parents have postponed vaccination till about April next.

WESTPORT; *Achill*.—The weather has been so bad that children could not be brought from distances.

WESTPORT; *Ballycroy*.—The unvaccinated children live miles in most cases off roads, hence there is a great difficulty in taking them to stations.

WESTPORT; *Newport*.—Vaccination very slack during latter part of year owing to inclemency of weather.

SLIGO COUNTY.

DROMORE WEST; *Easky*.—I expect that the 15 cases outstanding will come in at end of the quarter if weather conditions are favourable.

SLIGO; *Carney No. 1*.—No vaccinations in district during latter half of 1912 owing to scarlatina.

SLIGO; *Sligo No. 1*.—Thirteen of the defaulters were born in the Workhouse, and may have left the district.
